Proceedings

OF THE

Government of His Highness the Maharaja of Mysore

MAY 1913.

BANGALORE:
PRINTED AT THE GOVERNMENT PRESS.
1913

CONTENTS FOR MAY 1913.

PART I, IN EXTENSO.

I. REVENUE.

PAGES

SECTION 1—LAND REVENUE.

No. R. 6381-6424—L. R. 480-12-1, dated 5th—

Issuing instructions in the matter of the grant of compensation for the lands to be acquired in connection with the Kannambadi Reservoir Project and the re-settlement of the displaced population ... ... 1—4

No. R. 6854-63—L. R. 604-11-2, dated 17th—

Passing orders in the matter of giving intimation to Deputy Amildars of the revenue collections of their sub-taluks credited in the Taluk Treasury, so as to enable them to exercise greater control over the collections of their sub-taluks 5

No. R. 6962-73—L. R. 250-12-3, dated 22nd—

Reviewing the Report on the Administration of the Revenue Department for the year 1911-12 ... ... 6—10

SECTION 2—LAND SURVEY.—*Nil.*

SECTION 3—AGRICULTURE.

No. R. 6988-97—Agri. 125-12-2, dated 23rd—

Reviewing the Report on the Rainfall Registration in Mysore for the calendar year 1912 1

No. R. 7247-55—Agri. 41-12-8, dated 30th—

Recording the Revenue Commissioner's review on the statement showing the losses in cattle of various kinds for the quarter ending 31st December 1912 .. .. 2—5

SECTION 4—FORESTS.

No. R. 7077-8—Ft. 81-12-5, dated 26th—

Recording and communicating to the Conservator of Forests and the Deputy Commissioner, Mysore District, the correspondence relating to the repair and realignment, by the Madras Government, of the portion of the Begur-Bavali cart-track lying within the State ... ... 1—2

No. R. 7119-23—Ft. 65-12-8, dated 27th—

Approving of the Settlement of the Heggavadi Forest, Block I, in the Gundlupet Taluk and directing the publication of the boundaries thereof ... 3—12

No. R. 7204-5—Ft. 136-12-2, dated 29th—

Reviewing the Report of the Conservator of Forests on his inspection of the Hassan District Forest Office held on 9th March 1913 ... ... 13—17

SECTION 5—REVENUE MISCELLANEOUS.—*Nil.*

II. FINANCIAL.

SECTION 1—GENERAL FINANCE.

No. Fl. 6956-7001—G. F. 146-12-2, dated 30th—

Reviewing the statements of audit objections raised by the Comptroller prior to 30th June 1912 and outstanding on the 31st October 1912 ... 1

PAGES

SECTION 2—SEPARATE REVENUE.

No. Fl. 6827-36—S. R. 230-12-8, dated 20th—

Directing the introduction of certain modifications so as to emphasize the liability of the owner of trees tapped for toddy in case of default of licensee embodied in Section 19 of the Excise Regulation and to make the legal position of the occupant clear to him every time he grants permission to a licensee to tap his toddy trees 1

SECTION 3—BANKING.—*Nil.*

SECTION 4—SALARIES AND ALLOWANCES.

No. Fl. 6414-59—S. & A. 4-11-18, dated 3rd—

Inviting the attention of all officers of Government to Articles 69 and 70, Civil Account Code, Vol. I, which prescribe that a register showing correct office copies of every travelling allowance bill that passes through it should be maintained and directs that the rules therein laid down should be strictly followed in future 1

SECTION 5—CIVIL ACCOUNTS.—*Nil.*

SECTION 6—CENSUS.—*Nil.*

III. JUDICIAL AND LEGISLATIVE.

SECTION 1—LEGISLATION.—*Nil.*

SECTION 2—COURTS

No. J. 3339-50—Cts. 83-12-3, dated 3rd—

Ordering that the Courts of the Bench Magistrates in the Cities of Mysore and Bangalore be continued as permanent institutions 1

SECTION 3—PRISONS AND JAILS.—*Nil.*

SECTION 4—REGISTRATION.

No. J. 3665—Regis. 46-12-3, dated 29th—

Recording the Report on the working of the Joint Stock Companies and Literary, Scientific and Charitable Societies in Mysore during the year ending with 31st March 1913 1

SECTION 5—POLICE.—*Nil.*

IV. LOCAL FUND AND SANITARY.

SECTION 1—LOCAL BOARDS.—*Nil.*

.. .. SECTION 2—MUNICIPAL

No. 9545-57—Ml. 138-12-10, dated 31st—

Prescribing revised heads of account for recording the income and expenditure of the Municipalities in the State from the 1st July 1913 and also an additional Appendix VIII-A to the Municipal Annual Administration Report for showing the details of income from octroi . .. 1—5

No. 9381-8—Ml. 195-12-10, dated 26th—

Directing that foils of birth and death registers be invariably submitted to the District Offices and that they should be preserved for ten years ... 6

No. 9432-5—Ml. 80-09-48, dated 29th—

Reviewing the Report on the audit of the accounts of the Bangalore City Municipality from 1902-03 to 1908-09 7—8

SECTION 3—MEDICAL.—*Nil.*

SECTION 4—SANITARY.—*Nil.*

PAGES

SECTION 5—EDUCATION.

. 8834-40—Edn. 462-09-24, dated 1st—

Approving of a general scheme for the improvement of Industrial and Technical Education in the State; and sanctions the organization of the Chamarajendra Technical Institute at Mysore and the opening of Mechanical Engineering and Commercial Schools at Bangalore ... ... 1—38

. 9157—Edn. 62-12-5, dated 19th—

Reviewing the Report on Public Instruction in Mysore for 1911-12 ... 39—41

. 9180-1—Edn. 311-12-3, dated 20th—

Sanctioning increases of monthly grants to certain schools amounting to Rs. 3,090 per annum 42

SECTION 6—EXAMINATION.—*Nil.*

V. GENERAL.

SECTION 1—REPORTS.

. G. 7631-80—G. R 11-12-1, dated 29th—

Publishing the Dasara Calendar for the year 1913 ... 1

SECTION 2—PRESS.—*Nil.*

SECTION 3—MISCELLANEOUS.

. G. 6755-6—G. M. 52-12-90, dated 1st—

Directing that copies of the supplement to the *Mysore Gazette* containing the abstract Proceedings of the Legislative Council Meetings may be made available for sale to the Public 1

. G. 6768-809—G. M. 68-12-25, dated 1st—

In modification of Rule 7 of Appendix B to Government Order No. G. 6787-819—G. M. 36-07-39, dated the 16th May 1908, raises the limit of the cost of a peon's badge to Rs. 4 2

. G. 6766-7—G. M. 68-12-24, dated 1st—

Directing the inclusion of the name of the Superintending Engineers in the list of officers whose menials are entitled to the free supply of clothing, the number of menials to be supplied be limitted to two for each Superintending Engineer 3

. G. 7388-436—G. M. 326-12-1, dated 22nd—

Sanctioning the opening of a class in the Commercial School to teach printing, and stating that the Superintendent, Government Press, will help private firms with respect to their equipment 4

SECTION 4—MILITARY.

. G. 7473-4—Mily. 2-12-14, dated 23rd—

Approving of the amendment of para 665 of the Standing Orders of the Mysore Imperial Service Lancers regarding the badges of rank to be worn by the Commissioned Officers 1

. G. 7506-7—Mily. 293-11-6, dated 26th—

Sanctioning the proposal of the Chief Commandant regarding the formation of a separate "Forge Fund" for the Local Service Regiment 2

VII. MUZRAI.—*Nil.*

VIII. PUBLIC WORKS.

. 549-53—3533-37, dated 2nd—

Conveying sanction to a consolidated estimate for Rs. 12,012 for all necessary improvements carried out to "Ballabrooie" bungalow at Bangalore ... 1

. 251-4—C. P. S., dated 12th—

Reviewing the Administration Report of the Electrical Department for the year 1911-12 2

PAGES

No. 270-3—C. P S, dated 14th—

Approving of a revised schedule of rates for supply of electric power within the city limits for cooking and heating units of a larger capacity than 20 points maximum demand 3

No. 682-6—4437-41, dated 30th—

Conveying approval to a schedule, showing the distribution of the work of the Public Works Department and the Secretariat, between the Chief Engineer and the Deputy Chief Engineer of Mysore... 4

IX. RAILWAYS.

No. 1338-42—Ry F 21-12-13, dated 26th—

Sanctioning the authorization rolls amounting to Rs 32,810, for the working of the Bowringpet-Kolar Railway during 1913-14 . .. 1—7

PART I

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

(1) Government Proceedings No. 317-20—L. R. 173-12-2, dated the 8th July 1912, stating that land compensation would be preferable to money compensation with respect to lands submerged by the Cauvery Reservoir.

(2) Provisional Note by the Special Land Acquisition Officer, dated the 4th December 1912.

(3) Memo from the Deputy Commissioner, Mysore District, dated the 13th December 1912.

(4) Memo from the Deputy Commissioner, Mysore District, dated the 23rd January 1913, drawn up in consultation with the Chief Engineer.

(5) Letter No. 187, dated the 24th January 1913, from the Deputy Commissioner, Mysore District, enclosing memoranda from Mr. L. Krishna Rao, on the subject of recovery of contribution and water-rate.

(6) Revenue Commissioner's Office Note, dated the 3rd February 1913, commenting on the Deputy Commissioner's proposals.

(7) Memorandum from the Superintending Engineer, Cauvery Reservoir Works, dated the 10th February 1913, explaining the points raised by the Revenue Commissioner.

(8) Letter No. 6693, dated the 12th February 1913, from the Revenue Commissioner, with its enclosures.

No. R. 6381-6424—L. R. 480-12-1, DATED BANGALORE, 5TH MAY 1913.

ORDER THEREON.—The construction of the new Cauvery Reservoir at Kannambadi involves the submersion of about 5,000 acres of wet land and 4,656 acres of dry land situated in forty-eight villages, of which eight villages will be more or less completely submerged, and also the displacement of a population of about 5,000 souls.

2. The question of acquiring these lands by payment of compensation and of resettling the population displaced on new land has been engaging the anxious attention of Government for some time past. On account of the magnitude of the work, the problem of land acquisition in this case offers certain peculiar difficulties, necessitating the adoption of measures of an exceptional character.

3. In their Proceedings No. 317-20—L. R. 173-12-2, dated the 18th July 1912, Government appointed Mr. L. Krishna Rao, as Special Acquisition Officer to investigate the question on the spot and suggest the best means of protecting the interests of the affected people. This officer, in conjunction with the Superintending Engineer, Mr. B. Subba Rao, has submitted tentative proposals which are generally concurred in by the Deputy Commissioner and the Chief Engineer. The proposals are now before Government with the observations of the Revenue Commissioner.

4. The simplest solution of the question is to acquire the lands under the Land Acquisition Regulation from private owners after paying them compensation in the usual way, and this method is favoured by the Revenue Commissioner. But the displaced population will in that case be unable, if left to themselves, to get other lands for purposes of cultivation and will not have an opportunity of resettling as agriculturists in the same neighbourhood. Experience elsewhere has shown that if Government content themselves with paying money compensation to owners of land and no steps are taken to resettle them, it will, in the great majority of cases, end in reducing the people to the condition of day labourers.

5. For these reasons, it has been the aim of the officers, who prepared the project to attempt to provide the displaced raiyats with lands in exchange, as far as possible, supplemented, where necessary, by money compensation. In such cases, the displaced population is usually settled on land brought under irrigation by the construction of the Reservoir. But happily in the present case, there exist in the immediate neighbourhood facilities for carrying out three channel extension projects which might be taken advantage of for the present purposes. The Alalhatte,

Hemagiri and the Mandagiri channel projects roughly estimated to cost abou 25 lakhs, were prepared some years before the Kannambadi project was thought o The Acquisition Officer's report shows that with certain additions and alteration these projects can now be utilised.

6. The amount of compensation for acquiring land included in the sanctione estimate for the first stage of the project is about 10 lakhs This estimate wa based on the figures furnished some years ago by the late Revenue Commissioner Mr. A. Rangaswami Iyengar. It is pointed out that if money compensation alon is paid in the usual way, the estimate of 10 lakhs would be considerably exceeded If land compensation is attempted, it is reported that Government may have t spend about 13 lakhs more. But the additional 13 lakhs which would enabl Government to carry out three important channel extensions would be a remunera tive outlay in itself. Although these projects were ready some years ago and thei construction was repeatedly urged in the Representative Assembly, they could no be sanctioned as there was uncertainty about the water-supply. Now that th Reservoir will protect all irrigated area below it, the extension of the upper channel can be carried out without detriment to irrigation in the lower reaches.

7. Worked with proper safe-guards, Government feel assured that th proposal to give land in exchange will be more economical from the point of vie of the State, and that by adopting it, Government will be consulting the permanen interests of the displaced population.

8. The main outlines of the scheme which is based chiefly on the proposal of the Land Acquisition Officer prepared in consultation with the Superintendin and Chief Engineers, are as follows:—

(1) As far as possible compensation shall take the form of land to be give in exchange for the land taken up for the Reservoir.

(2) For this purpose all available cultivable Government land in th neighbourhood shall be utilised when it is expected that the holders o occupied lands under the Alalkatte, Hemagiri and Mandagini channel could be induced to part with portions of their holdings, in consideratio of provision being made for irrigation facilities for the remainder. It i stated that a large number of cultivators have agreed to such a arrangement and that the displaced cultivators are willing to remove t the new lands proposed to be made available.

(3) Before the projects are finally sanctioned, the rate of contribution to b paid by the owners of occupied lands, which will be benefited by th projected canal works and the conditions on which they will agree t give up the lands shall be definitely settled and embodied in th *mutchalikas* executed by them.

(4) Where land taken is superior in quality to that given in exchange, money compensation to make up for the difference in value shall b given.

(5) With suitable provision for compensation for loss of rent and othe necessary modifications, the same principle may be applied in the cas of inam lands.

(6) Where the owners of lands that are to be taken up have only a limite interest in them, an agreement shall be entered into with the creditor or other persons concerned for an exchange of land on the above lines failing which money compensation will be awarded for the whole lan under the provisions of the Land Acquisition Regulation. In deservin cases, loans may also be given to the indebted raiyats on the securit of the land given in exchange to enable them to pay off the creditor and convey a free title to the Government, the loan to be repayable i convenient instalments and to be recoverable, in default of payment, a an arrear of land revenue.

(7) A supplementary money grant not exceeding a fixed scale may also b made to the raiyats where land given in exchange is new and require some initial outlay to render it fit for purposes of cultivation

Land Revenue, dated 5th May 1913.

(8) Where the land taken up is wet or garden and the land to be given in exchange is dry, but which can be made irrigable, the wet assessment to be imposed thereon may be totally or partially remitted according to the circumstances of each case for a term of years.

(9) Where for any reason, it is not found practicable to settle by private negotiation, the grant of land in exchange for land, a money compensation shall be fixed and awarded under the usual acquisition proceedings.

(10) The expropriated owners of the submerged lands who consent to receive lands in exchange should be required to execute mutchalikas to that effect and in case there are other subordinate interests in the land, similar mutchalikas should be taken from the persons concerned. The form of the mutchalika should be settled in consultation with the Government Advocate and submitted for the approval of Government.

(11) As soon as the expropriated owners have agreed to receive other lands in exchange, possession should be taken on behalf of Government of the lands which will be submerged and if the lands to be given in return are immediately available, the exchange should be given effect to at once. In case it is likely to take some time to provide the land, the expropriated owners may be allowed to continue in possession of the land taken up on behalf of Government until it is submerged, or lands in exchange have been given. In exceptional cases, where some time is likely to elapse between the submersion of the land and the grant of other lands in exchange, a reasonable amount not exceeding the net profit on the land may, with the sanction of the Deputy Commissioner, be given to the expropriated owners.

(12) The raiyats of Government and Inam villages, who have to abandon their houses in the Reservoir bed and take up lands in exchange elsewhere, may be allowed in addition to the compensation, free grants of timber and other building materials on the same scale as is allowed to agriculturists, whose houses have been destroyed by fire.

9. Government are pleased to approve of the general lines of the scheme of settlement and compensation set forth above. The details of the scheme may be worked out, if need be, in convenient instalments and submitted through the Revenue Commissioner for the final orders of Government. Maps and statements should be submitted separately for each village taken up as well as for the corresponding area in which it is proposed to settle the displaced population.

Government desire that, in cases of doubt or difficulty, the Deputy Commissioner of the Mysore District, the Superintending Engineer in charge of the work and the Special Acquisition Officer should form themselves into a Committee and submit their recommendations to Government in the Public Works Department through the Revenue Commissioner.

10. The Chief Engineer is requested to submit rough plans and estimates, for all the canal extension projects proposed, within three months and detailed plans and estimates within six months.

11. In para 7 of his letter, the Deputy Commissioner recommends that a separate Revenue Sub-Division be constituted of the area over which land acquisition operations extend and that the Special Acquisition Officer be invested with the powers of a Revenue Sub-Division Officer and given the services of two capable Deputy Amildars and four shekdars under him. These proposals which are supported by the Revenue Commissioner are sanctioned.

12. Government are also pleased to direct that Rule 14 of the Rules under the Land Acquisition Regulation will not apply to the Special Acquisition Officer. Only such cases as involve an excess of 10 per cent over the estimate prepared by him regarding the compensation payable, or where the amount of compensation to be paid in an individual case exceeds Rs. 2,000, may be referred to the Deputy Commissioner. If after further experience, it is found necessary to raise these limits, fresh proposals may be submitted.

Proceedings of the Government of His Highness the Maharaja of Mysore.

13. A quarterly report should be submitted to Government in the Public Works Department by the Land Acquisition Officer through the Revenue Commissioner, showing the progress made in the settlement work, commencing from the quarter ending 30th June 1913.

14. Before concluding, Government desire to express their appreciation of the care and interest with which the Special Acquisition Officer, Mr. L. Krishna Rao, has dealt with the preliminary stages of this difficult question.

K. R. SRINIVASIENGAR,
Offg. Secy. to Govt., Gen. & Rev. Depts.

To—The Secretary to Government, Public Works Department.
The Revenue Commissioner in Mysore
The Heads of Departments
The Deputy Commissioner, Mysore District
The Superintending Engineer, Cauvery Reservoir Works.
The Superintending Engineers of Circles.
The Comptroller, Mysore Government.

Exd.—C. R.

Proceedings of the Government of His Highness the Maharaja of Mysore, Land Revenue, dated 17th May 1913.

READ AGAIN—

Government Order No. R. 6274—L. R. 198-10-1, dated the 4th May 1912, requesting the Revenue Commissioner in Mysore, to report on the practicability of requiring the Taluk Treasury officials to intimate to the Deputy Amildars concerned, the revenue receipts of their sub-taluks credited in the treasury, so as to enable the Deputy Amildars, who are responsible for the revenue collections of their sub-taluks, to know independently each month how much of the amount collected has been paid into the treasury and thus exercise greater control over the collections of their sub-taluks.

READ—

Letter No. 14174, dated the 11th June 1912, from the Revenue Commissioner in Mysore, suggesting that, as duplicate chalans are presented with every payment made into the treasury, the duplicate relating to the revenue collections of a sub-taluk, which is now filed in the Taluk Treasury, may be sent to the Deputy Amildar concerned, so as to enable him to find out the amount of revenue collections of his sub-taluk credited in the treasury and exercise greater control over them.

No. R. 6854-63—L. R. 604-11-2, DATED BANGALORE, 17TH MAY 1913.

ORDER THEREON.—Government are of opinion that as the Deputy Amildar of a sub-taluk is solely responsible for the proper collection of revenue in the sub-taluk, and for the prevention of embezzlements or other irregularities in connection therewith, he should receive independent information of the revenue collections credited in the treasury. Rule 39 of the Taluk Treasury Manual requires that all payments made into a Taluk Treasury must be accompanied by a chalan in Form No. 7, in duplicate, one copy being meant to be sent to the District Treasury with the account and the other being retained in the taluk office. Government direct that in the case of remittances relating to a sub-taluk, the duplicate of a chalan, instead of being filed in the taluk office, be sent to the Deputy Amildar of the sub-taluk, so as to enable him to keep independent account of all remittances made to the treasury in respect of his sub-taluk. They are also pleased to direct that separate demand, collection and balance statements be prepared for the sub-taluk by the Deputy Amildar from the departmental records and the entries verified as far as possible by means of the above chalans, and sent along with the duplicates of the chalan to the Amildar of the taluk in which remittances from the sub-taluk are received, who will incorporate the demand, collection and balance statements with those sent from the taluk after obtaining the necessary certificate from the Taluk Treasury as usual.

2. In this connection Government desire to impress on the Amildars the necessity for the preparation of the demand, collection and balance statements in the Account Department of their office independent of the treasury and then verifying the same with the treasury figures. Government have reason to believe that strict attention is not always being paid to this wholesome rule in all the offices; and they request the Deputy Commissioners to see that the rules prescribed in this respect are strictly adhered to in future.

3. The same remarks apply *cæteris paribus* to the preparation of the demand, collection and balance return in the District Office.

K. R. SRINIVASIENGAR,
Offg. Secy. to Govt., Gen. & Rev. Depts.

To—The Revenue Commissioner in Mysore.
The Deputy Commissioners of Districts.
The Comptroller to Government.

Exd.—C R.

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

The report on the Administration of the Revenue Department for the year 1911-12, received with the Revenue Commissioner's letter No. 3163, dated the 30th September 1912.

No. R. 6962-73—L. R. 250-12-3, DATED BANGALORE, 22ND MAY 1913.

ORDER THEREON.—*The Revenue Commissioner.*—The Office of Revenue Commissioner was held by Rajasabha Bhushana Dewan Bahadur Mr. K. P. Puttanna Chetty, Member of Council, from the 1st July 1911 to the 18th February 1912, when he retired from service and was succeeded by Mr. K. S. Doraswami Iyer. Para 3 of report.

2. *The District Administration Reports.*—The report of the Revenue Commissioner was submitted to Government in due time, notwithstanding the delay in the receipt of the reports of the districts of Bangalore and Hassan. With regard to the Sub-Division Officers' reports, the Revenue Commissioner observes that punctually in their submission to the Deputy Commissioner is more an exception than the rule and that many of them are not in the prescribed form. Government cannot but consider this state of things as unsatisfactory. The Revenue Commissioner is requested to inform Assistant Commissioners by a circular that the punctual submission and the quality of these reports in future will be considered as one of the tests of efficiency and will be taken into account in making promotions and that the names of those who either fail to submit their reports in time or to take sufficient pains to make the reports useful will be reported to Government. Para 2 of report

3. *Season and Agriculture.*—The year was on the whole unfavourable from an agricultural point of view. The rainfall was deficient throughout the State. The average for the whole State was only 33·22 inches. This was 15·24 inches or 31·45 per cent less than the quantity gauged in the previous year and 5·14 inches less than the average for the past 31 years. In the maidan parts of the State, there was very little rain in the months of July, August and September and the outturn of crops was in consequence seriously affected. In the malnad, however, the rainfall was more timely and sufficient and the outturn of crops was satisfactory. The average yield of paddy and ragi was 9·5 annas and 7·4 annas against 10·2 annas and 9·5 annas in the previous year. The average prices of ragi and rice (second sort) rose by about 11 and 18 per cent respectively during the year, the rates quoted being 16·40 seers and 7·83 seers per rupee as against 18·52 and 9·21 seers in the previous year. Paras 6, 7, to 14 & 1

4. *Coffee and supari.*—The prospects of the coffee and the supari industry showed great improvement owing to the rise in prices. In the malnad parts of the Shimoga District, where the supply of labour is mainly drawn from the adjacent parts of North and South Canara, there has been a steady decrease in the annual influx of coolies and the question of the deficiency of labour is engaging the attention of the Deputy Commissioner of the district. There was no noticeable expansion of trade or industries in the State during the year, though everywhere there are encouraging signs among the people of an awakening of the spirit of enquiry and enterprise. Government are conscious of the defects in the present method of collecting trade statistics referred to by the Revenue Commissioner in his report. He is requested to place himself in communication with the Director of Industries and Commerce and prepare in conjunction with that officer, at an early date, a workable scheme for the correct registration of all trade statistics. Government will be glad to receive definite proposals on this subject within two months. Paras 14 19

5. *Darkhasts.*—As a consequence of the deficient rainfall, the number of darkhasts for land received during the year was only 9,224 and was less than that in the previous year by 4,265. The fall is noticeable in all the districts except Kadur where there was an increase of about 500. Including the number pending from the previous year, *viz.*, 9,537, the total number of darkhasts for disposal was 18,761. The number actually disposed of was 10,479 or 55·85 per cent of the total number against 13,489 or 61 per cent in the previous year. The arrears were greatly reduced in the Kolar and the Chitaldrug Districts but the number pending is still Para 45.

large in all the districts, particularly so in Mysore, Bangalore, Kadur and Hassan In the Mysore District a large number of darkhasts is reported as remaining undis posed of pending the orders of Government regarding the disposal of lands com manded by the Cauvery Reservoir. Government have since issued full instructions in the matter and it is expected that there will be no further delay in the disposa of the pending cases. In the Bangalore District, the accumulation is said to be due to the heavy work involved in the sub-division of the lands applied for, espicially in the Kankanhalli Taluk, where the survey numbers are generally large in extent. Government have already sanctioned the deputation of two mojinidars for six months to attend to this work and they trust that the Deputy Commissioner will see that the sub-division of survey numbers applied for is carried out without delay In the Hassan District, the large number pending is stated to consist mostly of cases requiring personal inspection by the higher Revenue and Forest officers as they refer to lands containing water-courses and head-springs of rivers applied for for cardamom cultivation. The Revenue Commissioner and the Conservator of Forests should see that such delays are avoided. The Revenue Commissioner's report shows that the area of assessed land available for cultivation at the beginning of the year was 1,062,729 acres, out of which the area taken up was only 67,161 acres. After making every allowance for fluctuation in the number of applications, due to the vicissitudes of the seasons, Government cannot help feeling that the smallness of the area of new lands taken up for cultivation is partly due to delay in the disposal of darkhasts and that more earnest efforts are needed on the part of Revenue officers in this respect.

Para 45. 6. *Eksal darkhasts.*—Under the rules relating to *eksal* darkhasts (applications for temporary occupation of lands for a single year), an extent of about 200 acres of assessed lands was given out for temporary cultivation. As the system has been newly introduced and the orders of Government in this respect do not appear to be sufficiently well known, the Deputy Commissioners are requested to take necessary action to give wide publicity to the new rules.

Paras 8, 9 and 18. 7. *Transfers of lands and area cropped.*—Notwithstanding the unfavourable seasonal conditions, there was no increase in the area relinquished during the year, which was apparently due to the unwillingness of raiyats to give up lands once acquired. There was a slight increase of 744 in the number of transfers of lands from agriculturists to non-agriculturists and the net decrease in the area held by agriculturists was 1,300 acres. The net increase in the area brought under cultivation, after deducting the area of lands relinquished, was 50,054 acres and the net increase in the assessment was Rs. 37,855. There was a slight rise in the area cropped in the districts of Bangalore, Mysore, Shimoga and Kadur, but in all the other districts there was a noticeable fall, the largest being in the Tumkur District, where the area cropped decreased by 85,012 acres. There was a net decrease in the area cropped of 140,660 acres the total area cropped being 6,047,453 acres as against 7,545,449 acres under occupation throughout the State.

Para 21. 8. *Jamabandy work.*—The Jamabandy work left much to be desired both as regards punctuality and thoroughness. In nearly all the districts the Jamabandy was neither commenced in time nor completed before the *khist-bandi*. The ordinary duration of Jamabandy in the different taluks is reported to have varied from 7·8 to 14·1 days, but two taluks in the Bangalore District were settled, one in three days by the Deputy Commissioner and the other by the Sub-Division Officer Mr. C. Venkata Rao, in four days. Government cannot but view with displeasure the perfunctory and mechanical manner in which the work must necessarily be done when it is rushed through in such haste; and they trust that the Revenue Commissioner will see by getting regular progress reports and other methods that the Jamabandy is made to fulfil its proper object, namely, a through examination of the Revenue management of each taluk once a year.

Paras 28 and 29. 9. *Revenue—demand and collection.*—The net recoverable demand for the year was Rs. 1,19,11,905 on account of land revenue and Rs. 3,55,658 under mohatarfa. The collections were somewhat better than in the previous year, the amounts collected being Rs. 1,06,20,994 and Rs. 2,82,145 respectively, representing 89 and 79 per cent of the demand under Land Revenue and Mohatarfa. Under Land Revenue, 93·6 per cent of the current demand and 57 per cent of the outstanding arrears were collected. The collection of the current demand though fairly satisfactory, still

leaves much room for improvement. It is brought to notice that a considerable proportion of the arrears relates to 1908-09, and that it is remaining unadjusted as final enquiries regarding the remissions granted on account of the seasonal conditions of the year have not as yet been completed in some of the districts. The Revenue Commissioner is requested to report whether the accounts have since been completed and if not what is the cause of the delay. The final adjustment of these items in the accounts should be made before the end of 1912-13.

10. *Coercive processes.*—The number of coercive processes issued was 80,583 as against 89,302 during the previous year, but the number of actual sales rose from 1,469 to 2,045. The total amount realised by means of coercive processes was Rs. 15,76,068 or 14·8 per cent of the collection, of which nearly two-thirds were realised by the mere issue of notices of demand. The amount realised by sale was Rs. 40,888. Para 28.

11. *Restoration and maintenance of major and minor tanks.*—The number of major tanks restored or repaired during the year was 414 as against 358 in the previous year and the amount spent on them was Rs. 2,46,158 as against Rs. 2,16,803 in the previous year. The number of minor tanks dealt with was 473 as against 477 in the previous year, the amount spent by Government thereon being Rs. 82,137 as against Rs. 83,769. Increased interest was shown by the raiyats in respect of the restoration and maintenance of tanks, the value of earthwork done by them to major and minor tanks amounting to Rs. 51,295 and Rs. 86,116 respectively, as against Rs. 39,884 and Rs. 78,819 in the previous year. Government look forward to increased activity in the coming years in the restoration of both major and minor tanks with a view to promote the expansion of wet cultivation in the State to the ırgest extent possible. The Revenue Commissioner is requested to place himself ı communication with the Chief Engineer and co-operate with that officer in push-ıg through schemes of development of irrigation, now being worked out in the ublic Works Department, so that some substantial progress may be achieved in ıe ensuing year. Para 30

Tank Panchayet Regulation.—Though it is more than two years since the ank Panchayet Regulation was passed, it is disappointing to read in the Revenue ommissioner's Report that no steps have been taken to give effect to it. Govern-ıent are anxious that the scheme should be tested practically at as early a date s may be feasible. The Revenue Commissioner is requested to complete the neces-ıry preliminaries in consultation with the Public Works Department so that the heme may be introduced in the case of some selected tanks at least by 1st Janu-y 1914. A monthly progress report of measures taken to this end may be submitted.

12. *Land Improvement Loans and Takavi advances.*—Government view with ıncern the apathy shown by the Revenue officers not utilising fully the large lotments made annually for loans for Land Improvement and for Takavi advances. he amount sanctioned by Government for this purpose during the year under review as Rs. 1,25,000 but the amount utilised was only Rs. 52,000 the loans having been anted in 502 cases chiefly in the Kolar, Tumkur and Bangalore Districts. Out this amount, Rs. 17,183 were devoted to sinking irrigation wells and Rs. 10,407 miscellaneous improvement of lands. The total number of applications to be alt with during the year is stated to have been 1,310 for an aggregate amount of s. 2,40,164; but of these only 732 applications were disposed of (229 applications of hich being rejected or withdrawn) leaving 578 pending at the close of the year. Paras 32 to 35.

13. *Recoveries under loans and advances.*—Out of a total amount of Rs. 1,83,484 at was due from the raiyats in respect of advances granted during previous years, sum of Rs. 1,26,339 or nearly 69 per cent was actually recovered—a result which ust be deemed unsatisfactory. With regard to the two large loans referred to in e report as outstanding in the Hassan District for a long time one for Rs. 6,000 om Puttannaiya and his brother and the other for Rs. 5,000 from shanbhog Das-pa, the Deputy Commissioner should be directed to complete the necessary pro-edings without further delay and report the matter to Government. Paras 32 to 35.

14. *Inspection of boundary marks.*—The systematic inspection of boundary arks was attempted only in the taluks of the Shimoga District and in the Anekal, ankanhalli, Mysore, T.-Narsipur and Nagamangala Taluks. Government are of Paras 49 and 50.

opinion that occasional inspection of a few boundary marks by the Amildars and other officers cannot result in much benefit and that every attempt should be made to enforce a systematic inspection according to the rules. If the existing rules are in any way unsuitable, the Government will be prepared to reconsider the situation; but until then, the Revenue Commissioner should see that proper effect is given to the rules in force. The frontier boundary marks were not inspected in the Shimoga District, nor was their inspection satisfactory in the Hassan, Chitaldrug and Kadur Districts.

Paras 51 and 52.

15. *Avenue trees and roads.*—The condition of avenue trees is stated to be good and the planting of new trees where there are vacancies to have been regularly attended to. Some interest was taken in opening out village roads in the Hassan and Shimoga Districts, 64 miles of new roads having been opened in the former and 320 miles of road having been either repaired or opened in the latter. Various measures were undertaken by Revenue officers for the improvement of sanitation in rural areas.

Para 44.

16. *Inspection of Treasuries.*—Government note with satisfaction the improvement in the inspection of treasuries during the year. The District Treasuries in the Kolar, Tumkur, Shimoga, Kadur and Chitaldrug Districts were inspected twice in detail by the Deputy Commissioners as required by the Standing Orders. Of the 68 Taluk Treasuries, 61 were inspected twice in detail and the rest (chiefly in the Tumkur and Mysore Districts) were inspected once.

Para 61.

17. *Village officers.*—The work of the village officers is reported to have been on the whole satisfactory. Classes for training shanbhogs and patels in survey work were opened in the districts of Kolar, Tumkur, Mysore and Chitaldrug. In the Bangalore District, a sufficient number of patels and shanbhogs did not come forward to undergo the training. No action appears to have been taken in the matter in the other districts. The Deputy Commissioners should induce as many village officers as possible to undergo the training.

Paras 65 to 67.

18. *Itineration of the Deputy and Assistant Commissioners.*—Government consider that there is still much scope for improvement in the inspection work done both by Deputy Commissioners and Sub-Division Officers. The Deputy Commissioners of Bangalore, Tumkur, Mysore, Hassan and Chitaldrug have not camped out even for the minimum number of days prescribed under Government Orders. None of the Assistant Commissioners camped out for the minimum number of days prescribed for their itineration. Government consider it unsatisfactory that, in spite of repeated orders on the need for systematic tours, so little attention was paid during the year to comply with them. In view of the difficulties which have been experienced in enforcing the Standing Orders regarding itineration of Revenue officers, it would be useful if the Revenue Commissioner insisted upon each officer sending a half-yearly programme of inspections in advance and checked it subsequently with the actual itineration statements, bringing to the notice of Government at the same time every individual case in which there has been a tendency to shirk this important duty.

19. From the report of the Revenue Commissioner it is evident that there is a marked indifference on the part of several Revenue officers in the discharge of the following important duties:—

(1) Preparation of Administration Reports.
(2) Disposal of darkhasts.
(3) Jamabandy and scrutiny of revenue accounts.
(4) Collection of revenue.
(5) Inspection of tanks and boundary marks.
(6) Touring.

It will not be possible for Government to take any action on general statements regarding these defects made in the course of an Administration Report The Revenue Commissioner is requested to single out bad cases of neglect of duty in any of these respects and submit the same for the Orders of Government with the explanation of the officer concerned.

Land Revenue, dated 2nd May 1913.

20. Government look upon the Revenue Officers as primarily responsible for the prosperity and development of the tracts within their charge and a high order of efficiency in this department is indispensable. The Deputy Commissioner of the Tumkur District states that there is a tendency on the part of Amildars to rely mainly on shekdars' reports and avoid all responsible action. Government consider that all such tendencies should be checked and Revenue officers of all grades should be encouraged to show initiative and resourcefulness. Government trust that the defects pointed out will receive special attention from the Revenue Commissioner in the coming year.

21. Subject to the foregoing observations, Government consider that the work of the department was on the whole satisfactory.

K. R. SRINIVASIENGAR,

Proceedings of the Government of His Highness the Maharaja of Mysore, Revenue (Agriculture), dated 23rd May 1913.

READ—

Letter No. 398, dated the 2nd April 1913, from the Chief Observer in charge of the Mysore Meteorological Department, submitting the Report on the Rainfall Registration in Mysore for the calendar year 1912.

No. R. 6988-97—AGRI. 125-12-2, DATED BANGALORE, 23RD MAY 1913.

ORDER THEREON.—Recorded.

2. The average rainfall all over the State during the year 1912 was 45·73 inches as against 35·91 inches during 1911 and 37·11 inches, the average of the past 42 years from 1870 to 1911, both inclusive.

3. Out of 220 rain-gauge stations in the whole State, 188 or 85 per cent were inspected during the year, as compared with 88 per cent in the previous year. The Mysore District shows the smallest percentage of inspections, only 22 out of 40 stations having been inspected during the year. Government desire that the Amildar and the Jamabandi officer should make it a part of their duty during jamabandi to inspect all rain-gauges in each taluk and the Deputy Commissioner should insist on this being done. Government trust that there will be no further necessity to reiterate orders on this small matter.

4. It is noted with regret that, notwithstanding the instructions issued in para 3 of Government Order No. R. 6418-27—Agri. 122-11-2, dated the 7th May 1912, a large number of discrepancies has been allowed to occur between the figures in the monthly statements submitted to Government by the Deputy Commissioners and those supplied by them direct to the Meteorological office at the close of the year. The Deputy Commissioners are once again requested to see that such mistakes are not allowed to occur in future. Government are glad to notice that the report of the Chief Observer has been compiled with care.

K. R. SRINIVASIENGAR,
Offg. Secy. to Govt., Gen. & Rev. Depts.

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

Letter No. 10159, dated the 20th May 1913, from the Revenue Commissioner in Mysore, forwarding a copy of the statement showing the losses in cattle of various kinds for the quarter ending 31st December 1912, together with a copy of his review (printed with the statement as an accompaniment) thereon.

Revenue Commissioner's Official Memorandum No. 10150-8, dated 20th May 1913.

SUBJECT—

Statements showing the losses in cattle of various kinds received from the Deputy Commissioners of Districts for the quarter ending 31st December 1912.

Recorded.

2. The accompanying consolidated statement shows the extent of cattle mortality in the State during the quarter ending 31st December 1912, as compared with the corresponding quarter of the previous year.

3. It is satisfactory to note that the total loss of cattle during the quarter under review was nearly 600 less than during the corresponding quarter of the previous year, the totals for the quarters being 15,624 and 16,190, respectively.

Statement showing the losses in cattle of various kinds in the Mysore State for the quarter ending the 31st December 1912.

Revenue (Forest), dated 26th May 1913.

ACCOMPANIMENT No. 1.

Memo No. 7642, dated the 21st October 1912, from the First Assistant to the Hon'ble the Resident in Mysore.

Letter No. 2071E—12-4, dated the 16th December 1912, from the Secretary to the Government of Madras, Revenue Department, to the Hon'ble the Resident in Mysore:—

"I am directed to invite a reference to the correspondence ending with Sir Frederick Price's letter R. No. 106—Political, dated 6th May 1895, regarding the Begur-Bavali cart-track, which was declared by a notification in the *Mysore Gazette* to be one of the authorized roads by which timber and other forest produce might be imported into Mysore territory.

2. Starting from the Begur forests in the Malabar District, this cart-track passes through a belt of Mysore forests for about five furlongs and then joins the Manantoddy-Mysore road east of the Bavali bridge. I am to invite attention to the fact that at present this road is merely a twisting and irregular cart-track and that it would be a great advantage to this Government if it could be converted into a properly aligned road.

*Vide sketch enclosed which may be kindly returned

3. I am therefore to request that the Durbar may be moved to permit the repair and realignment of the road by the Madras Forest Department which is also prepared to undertake all future maintenance charges which may be necessary in order to keep the road in good order after repair. The road would always be open for the traffic of Mysore timber carts as well as for those coming from British forests "

A copy of the foregoing letter, with enclosure is forwarded herewith to the Government of His Highness the Maharaja of Mysore for information, with reference to the correspondence ending with this office letter No. 1622, dated the 13th May 1895, with the request that the Resident may be favoured with the views of the Durbar in the matter.

†Return is requested.

ACCOMPANIMENT No. 2.

Letter No. Pol. 857, dated the 8th April 1913, from the Officiating Secretary to Government of His Highness the Maharaja of Mysore, to the First Assistant to the Hon'ble the Resident.

With reference to your memo No 7642, dated the 21st December 1912, forwarding for the opinion of the Durbar copy of letter No. 2071E—12-4, dated the 16th December 1912, from the Secretary to the Government of Madras, Revenue Department, in the matter of the Madras Forest Department being permitted to realign and repair the portion of the Begur-Bavali cart-track, which is within the limits of the Mysore State, I am directed to state that the Durbar consider it desirable that the work of repairing and realigning the road should be done by their own officers and that if the Madras Government consent to pay the cost thereof, the Durbar will arrange to get the work done in accordance with the specification, if any, which may be furnished by the Madras Government.

As the track runs along the outskirts of the Mysore Forest, it is reported to be of no use to the Mysore Forest Department and the Durbar have therefore no objection to allow the Madras Forest Department to maintain it subject to the condition that it will be open to other traffic also and that the Madras Government will have no other right over the road except that of sending their timber carts over it.

The enclosure to your memo under reference is herewith returned.

ACCOMPANIMENT No. 3.

Letter No. 2662, dated the 2nd May 1913, from the First Assistant to the Hon'ble the Resident in Mysore.

I am directed to acknowledge the receipt of Mr. Srinivasa Iyengar's letter No. 857—Pol, dated the 8th April 1913, and in reply, to communicate to the Durbar the thanks of the Government of Madras, for the readiness with which the Government of Mysore have agreed to the repair and realignment of the Begur-Bavali cart-track.

2. It is assumed that the last six words of paragraph 2 of Mr. Srinivasiengar's letter are not intended to limit the traffic that may pass over the road strictly to timber carts, and that these words mean no more than 'using it for the passage of traffic." On this assumption the Madras Government accept the conditions laid down by the Durbar and have instructed the Conservator of Forests, Western Circle, to settle details in direct correspondence with the Conservator of Forests in Mysore.

ACCOMPANIMENT No. 4.

Letter No. Pol. 988, dated 24th May 1913, from the Officiating Secretary to Government, to the First Assistant to the Hon'ble the Resident.

With reference to your letter No. 2662, dated 2nd May 1913, in the matter of the repair and realignment of the Begur-Bavali cart-track, I am directed to state that in the circumstances explained the Durbar do not desire to restrict the use of the track to the carting of timber alone by the Madras Government and that they have no objection to the cart-track being used for the passage of traffic of all kinds.

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

Government Notification No. R. 8426—Ft. 122-08-2, dated the 15th April 1909, declaring the proposal to constitute the Heggavadi Block I as a State Forest and appointing a Forest Settlement Officer to make the necessary enquiries.

2. Letter No. 4348, dated the 15th November 1912, from the Revenue Commissioner in Mysore, submitting the following letter from the Forest Settlement Officer reporting on the conclusion of his settlement of the block.

No. 387, dated 26th June 1912, from C. Venkata Rao, Esq., B. A., Forest Settlement Officer in Mysore, to K. S. Doraswami Iyer, Esq., Revenue Commissioner in Mysore, through the Deputy Commissioner, Mysore District.

I have the honour to report on the conclusion of the settlement of the Heggavadi Block I in the Gundlupet Taluk.

2. The initial notification under Section 4 of the Mysore Forest Regulation, proposing to constitute the area into a State Forest appeared on pages 136 and 137 of the English issue of the *Mysore Gazette*, Part I, dated the 15th April 1909, and the proclamation under Section 5 of the said Regulation was issued by my predecessor Mr. M. Shama Rao, and the same appeared on pages 395 and 396 of the Kannada issue of the *Mysore Gazette*, Part II, dated the 26th May 1909.

3. The proclamatory notices were got served on the villagers concerned through the Amildar of the Gundlupet Taluk.

The tract was perambulated and inspected by me in company with the Range Officer and the Amildar, on the 29th and 30th May 1911.

During the enquiry, the raiyats of the four villages affected by the proposed reservation of the block in question represented to me that as they are greatly in need of lands for cultivation purposes, an adequate extent of lands out of those proposed to be included in the Reserve, may be excluded from it. As I was convinced that the raiyats' representation was very reasonable, I have, for reasons detailed in the 'B' Register, excluded a large extent of lands for the benefit of the raiyats concerned.

4. The following 9 claims were preferred to me during the enquiry :—

(i) Three claims to right of way;

(ii) Four claims for the exclusion of more lands for cultivation;

(iii) Two claims not falling under any of the above.

(i) Two claims were admitted. As regards the remaining claim no finding was recorded, as the path-ways in respect of which the claim was set up, falls outside the settled boundary line of the Reserve in question.

All the claims in (ii) were admitted and sufficient lands for the purposes mentioned therein were excluded.

Of the 2 claims in (iii) one was admitted and the other rejected.

5. The Deputy Commissioner of the Mysore District has intimated in his docket No. 2892, dated the 4th November 1911, that no appeals have been preferred to him against my decision relating to the settlement of this block.

6. The following records are herewith submitted :—

(1) 'B' Register,

(2) 'C' Register,

(3) The sketch map,

(4) The draft boundary notification, and

(5) The topo-tracing.

7. The date from which the reservation of the block in question is to take effect may be kindly inserted in the draft boundary notification.

B.—Register of claims to lands, rights to forest produce or easements in the proposed Heggavadi State Forest, Block I.

No	Name of claimants	Date of presentation of claims	Nature and extent of claims preferred	Brief summary of the evidence adduced in support of claims	Brief summary of the Forest Officer's arguments and evidence produced by him	Brief abstract of decision and final disposal of the claims by the Forest Settlement Officer	Brief abstract of decision, if any, of Court of final appeal and settlement	Remarks
1	2	3	4	5	6	7	8	9
1	Balakrishnaiah, patel of Bachahalli on behalf of the villagers	26th May 1911	Begs that adequate area may be excluded from the extent proposed to be included within the reserve and that if this cannot be done, the raiyats may be given the privilege of removing from the reserve, fuel, wooden materials for agricultural implements, thorns for fencing purposes and materials for putting up lofts	...	Adequate area may be excluded from the reserve, but the soil is very poor and it may not be paying to grow any crops In case the lands remain uncultivated the option of taking the lands by the Forest Department may be given	*Claims 1, 3, 6, 7 and 8.* In my perambulation I found that the cultivation in all the four villages had reached the edge of the adjacent hill hills and even to their slopes, owing to all assessed waste lands having already been brought under cultivation As there is a great demand for lands for agricultural purposes and as several raiyats of the depressed classes are very eager to take up lands on darkhasts, adequate provision has to be made for expansion of cultivation The only argument that could be advanced in favour of the reservation of the tract in its entirety is, that it contains a series of hillocks adjoining the already settled forests of Bandipur and Mowai and that in the long future, the raiyats in the neighbourhood may be benefitted by the reservation Taking all these circumstances into consideration, I am of opinion that the reservation of the tracts in its entirety is not compatible with the exercise of the rights and privileges of the agricultural population in its neighbourhood and have accordingly decided to leave for the use of the raiyats, a large extent of lands out of the area proposed to be included within the reserve The boundary line will therefore be modified as follows:— The line starting from the junction of Yedlutta and the Moyar State Forest, will be deviated at a point 40 chains north east from the said junction and made to run in a north easterly direction, so as to meet the southern boundary of Survey No 245 of the Bachahalli village at a point about 40 chains east from the south-east corner of Survey No 273 of the said village, then due north at right angles to southern boundary of Survey No 245		

Revenue (Forest), dated 27th May 1913.

					till it meets the southern boundary of Survey No. 284 of the same village at a distance of about 56 chains north-east from the south-east corner of Survey No. 272; then along the southern boundary of Survey Nos. 281 and 283 till it meets the gudi bundhu of the Heggavadi village and the Yeriyur village; then along the western boundary of the Yeriyur village for a distance of about 23 chains, thence in an easterly direction for 50 chains till it meets the western boundary of the Heggavadi village at a point about 35 chains north-west from the southernmost corner of Survey No. 248 of Heggvadi; thence south-east for a distance of 32 chains till it meets the western boundary line of Survey No 225 of the Heggavadi village at a point about 15 chains north from the north-east corner of Survey No. 239 of the said village, thence south-east in a straight line till it meets the western boundary of the Kundakere village at a point about 45 chains north from the point of tri-junction of Heggavadi and Kundakere villages and the Mysar State Forest; thence north-east through Survey No. 124 of the Kundakere village for a distance of 79 chains till it meets the common bandhs of Survey Nos. 124 and 125 of the Kundakere village. By this arrangement an extent of 1,644 acres in the case of Rachahalli, 158 acres in the case of Yeriyur, 562 acres in the case of Heggavadi, and 905 acres in the case of Kundakere, will be left out of the proposed area for the benefit of the raiyats. (Sd.) C. VENKATA RAO, Forest Settlement Officer. 2nd June 1911.		
				This is only a jungle track for fetching fuel, etc., from the forest and as such there seems to be no necessity to give it as a right of way.	As these tracks, *viz.*, i, ii, iii, fall outside the settled line, no orders are necessary. (Sd.) C. VENKATA RAO, Forest Settlement Officer. 2nd June 1911.	
			.....			
alakrishnaiah, patel of Hachahalli.	26th May 1911	Claims right of way over the following tracts:— (i) Cart-track from his village to Chigarukadvinahalla, through Survey Nos. 241, 242, 264 and 245. (ii) Cart-track from his village to the said halla, through Survey Nos. 241 and 264. (iii) Foot-path leading from the Mahdeswara temple in Survey No. 272 to the Bandipur District Forest.		The right of using the foot path may be given.		
			...			

B.—Register of claims to lands, rights to forest produce or easements in the proposed Heggavadi State Forest, Block I—*concld.*

o	Names of claimants	Date of presentation of claims	Nature and extent of claims preferred	Brief summary of the evidence adduced in support of claims	Brief summary of the Forest Officer's arguments and evidence produced by him	Brief abstract of decision and final disposal of the claims by the Forest Settlement Officer	Brief abstract of decision, if any, of Court of final appeal and settlement	Remarks
1	2	3	4	5	6	7	8	9
3	Basavarajiah, patel of Yeriyur, on behalf of the rayats	26th May 1911	Represents that some new survey numbers formed out of the big gomal Survey No. 92 of his village, and given out for cultivation, are included in the reserve and that they, as well as some more lands, may be excluded from it		Nil	*Vide* Claim No 1		
4	Do ..	Do .	States that there is a katte in Survey No 92, to which his village cattle go for water. This may be excluded with a right of way thereto		Nil	As the katte falls outside the settled line no orders are necessary (Sd) C VENKATA RAO, Forest Settlement Officer 2nd June 1911		
5	Do ..	30th May 1911	Right of way to the cart track leading to the hamlet known as 'Upkara' may be admitted		The use of the cart track leading to Upkara may be admitted	Right of way to the cart track leading from Yeriyur to Upkara will be admitted for men cattle and carts all the year round Width to be 15 ft (Sd) C VENKATA RAO, Forest Settlement Officer 2nd June 1911		
6	Dyavegowda, a rayat of Heggavadi	Do	States that as there is no assessed waste land in the village, the rayats intend taking up for cultivation a portion of Survey No 225 (kharab) in which the preliminary demarcation line passes and that a strip of land close to the preliminary demarcation line was applied for, for cultivation and the darkhast was rejected pending the settlement of the block Prays therefore that his darkhast may be sanctioned		Nil	*Vide* Claim No 1		
7	Malliah, a rayat of Kundakere	Do	States that the preliminary demarcation line runs close to his field adjoining Patnakatte and that it may be shifted further away from his field		Nil	*Vide* Claim No 1		

Revenue (Forest), dated 27th May 1913.

9	Forest Settlement Officer, on behalf of the raiyats	Do	...	Represents that his application for some lands for cultivation, situated close to his field, was rejected as the same had been proposed to be included within the reserve and requests that sufficient extent of land for being taken up on darkhasts may be excluded	...	Nil	Rights of way to cart tracks leading to Upkara from Heggavadi and Kundakere respectively, will be admitted for men, cattle and carts, all the year round, width being 15 ft. (Sd.) C. VENKATA RAO, Forest Settlement Officer 2nd June 1911	..	

N. B.—The following survey numbers of the Heggavadi village will be treated as enclosures within the block :—

227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 298, 299, 300, 301, 302, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 321, 321, 326, 376, 377, 378, 379, 380, 381, 382, 383, 384 and 386.

No. R. 7119-23—Ft. 65-12-8, dated Bangalore, 27th May 1913.

Order thereon.—The Settlement is approved. The block will be declared a State Forest with effect from the 1st of July 1913.

The Deputy Commissioner, Mysore District, is requested to duly promulgate the boundaries of the block in the localities in which it is situated.

K. R. SRINIVASIENGAR,
Secy. to Govt., Gen. & Rev. Depts.

To—The Revenue Commissioner in Mysore.
The Conservator of Forests in Mysore.
The Superintendent of Revenue Survey and Settlement.
The Deputy Commissioner, Mysore District, with map and statements.
The Forest Settlement Officer in Mysore.

NOTIFICATION.

No. R. 7124—Ft. 65-12-9, dated the 27th May 1913.

The Government of His Highness the Maharaja of Mysore are pleased to declare, under the provisions of Section 17 of the Mysore Forest Regulation (XI of 1900), that, from 1st July 1913, the area, the boundaries of which are set forth in the Schedule annexed to this Notification, shall be deemed to be a "State Forest," subject to the exercise of rights specified at foot thereof:—

SCHEDULE.

District	Taluk, hobli and village	Approximate area	Name of block	Boundaries
Mysore	Gundlupet Taluk Hangala hobli, Bachahalli village Terakanambi hobli; Yeriyur, Heggavadi and Kundakere villages	4·48 sq. miles	Heggavadi Block I	*Situation.*—The tract of jungle in the Gundlupet Taluk, lying to the north of the Moyar State Forest. *Boundaries.* *North*—Starting from a point on the east side of Survey No. 247 of Bachahalli village about 40 chains north from the tri-junction bandhs of the Moyar State Forest, Bachahalli and Yalchatti, the line runs north-east in a straight line through Survey No. 246 of Bachahalli to a point on the south side of Survey No. 245 about 40 chains east from the south-west corner of the latter survey number: then north through the same survey number for 40 chains to a point on the north side of the said survey number about 55 chains north-east from the south-west corner thereof: then in a north-easterly direction along its north side to the south-west corner of Survey No. 243: then east along the south side of the last named survey number to its south-east corner which is also the point of tri-junction of Bachahalli, Yeriyur and Heggavadi villages: then north-west along the western boundary of Yeriyur for about 23 chains: then east through Survey No. 92 of Yeriyur in a straight line to a point on the western boundary of Heggavadi about 35 chains north-west from the southernmost corner of Survey No. 238 of Heggavadi: then south-east through the last named survey number to a point on the western boundary of Survey No. 225 of Heggavadi about 11 chains north-west from the north-west corner of Survey No. 232: then south-east for about 27 chains to a point on the south side of Survey No. 225 about 7 chains north-east from the north-east corner of Survey No. 231: then in the same direction through Survey No. 226 of Heggavadi to a point on the western boundary of Kundakere about 45 chains north from the tri-junction of Heggavadi, Kundakere and Moyar State Forest: then north-east in a straight line through Survey No. 124 of Kundakere for about 79 chains to the south-east corner of Survey No. 123 of the said village.

East and South —Thence along the Moyar State Forest boundary to the tri-junction bhands of the said State Forest, Yalchatti and Bachahalli.

West —Thence noth-east in a straight line along the east side of Survey No. 247 of Bachahalli for about 40 chains to the starting point.

REMARKS.

Right of way to the following cart-tracks is admitted within the Block, for men, cattle and carts all the year round :—

(i) Cart-track (15 feet wide and 28 chains long) leading from Yeriyur to Majre Upkara village. It enters the forest in its northern boundary at a point about 33 chains south-east from the south-east corner of Survey No. 163 of Yeriyur, goes south through Survey No. 92 for 28 chains and reaches the enclosure (Upkara hamlet) at a point about 2 chains west from the south-east corner of Survey No 92.

(ii) Cart-track (15 feet wide and about 15 chains long) from Heggavadi to Majre Upkara. It enters the forest in the northern boundary at a point about 10 chains north from the north-west corner of Survey No. 232 of Heggavadi, goes south-west for about 15 chains through Survey Nos. 225 and 238 and reaches the enclosure at a point about 5 chains north from the north-west corner of No. 233 of Heggavadi.

(iii) Cart-track (15 feet wide and 110 chains long) from Kundakere to Majre Upkara village. It enters the forest in the northern boundary at a point about 55 chains south-west from the southernmost point of Survey No. 123 of Kundakere, goes south-west, west, north-west and west to Survey No 124 of Kundakere and Survey No. 226 of Heggavadi and reaches Upkara hamlet at a point about 5 chains east from the south-east corner of Survey No. 227 within the enclosure.

B.

The following survey numbers of the Heggavadi village are treated as enclosures within the block, with a margin of 5 chains all round :—

227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 298, 299, 300, 301, 302, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318. 319, 320, 321, 322, 323, 324, 326, 376, 377, 378, 379, 380, 381, 382, 383, 384 and 385.

By Order,

K. R. SRINIVASIENGAR,

Secy. to Govt., Gen. & Rev. Depts.

To—The Compiler, *Mysore Gazette.*

Exd.—C. L

EAD—

Letter No. 8060, dated the 8th April 1913, from the Conservator of Forests in Mysore, bmitting the following * report on his inspection of the Hassan District Forest Office held the 9th March 1913.

No. R. 7204-5—Ft. 136-12-2, dated Bangalore, 29th May 1913.

Order thereon.—Recorded.

There has been an interval of four years between the inspection under report and e previous one. The defects and irregularities noticed on the previous occasions ould have justified more frequent inspections.

2. *Para 8.*—It is not explained why a sum of Rs. 154-3-0 stated to be outanding against one Thimme Gowda is remaining unadjusted since 1897. The eputy Commissioner should give prompt attention to this matter, as also to the ljustment of the several items standing against him.

3. Government are unable to understand how the sandal revenue of the year)11-12 due from Mr. Gunda Setty should have been left unrealized till March)13. In the case of numbers 11 to 13, it would have been more useful if the dates om which the amounts have been outstanding had been given.

4. *Para 18.*—It is unsatisfactory that the report called for from the District orest Officer four years ago in the matter of security deposits should still have mained unsubmitted.

5. *Para 27.*—It is observed that no efforts are evidently being made to inimise delays in the submission of travelling allowance bills of the protective tablishments. Those for the Arsikere Range were due for six months.

6. The correct maintenance of the registers and the punctual submission of e returns should be insisted upon. Government hope that the Conservator of orests will adopt vigorous measures to see that his instructions are scrupulously rried out by the District Officers.

K. R. SRINIVASIENGAR,
Secy. to Govt., Gen. & Rev. Depts.

Proceedings of the Government of His Highness the Maharaja of Mysore,

Accompaniment.

INSPECTION REPORT OF THE HASSAN DISTRICT FOREST OFFICE.

Date of inspection.—9th March 1913.

Date of previous inspection.—30th April 1909.

Officer in charge.—Mr. H. Srinivasa Rao, Assistant Conservator of Forests, 1st grade, since 28th September 1911.

Office building.—The apartment at the top of the stair-case still continues to be in the possession of the Meteorological Department in spite of Government Order No. R. 1384-85—Ft. 61-08-11, dated the 13th August 1909.

Furniture.—Sufficient.

I. RECORDS.

MANAGEMENT AND WORKING OF FORESTS.

1. *Register of State Forests.*—Maintained.

2. *Maps of State Forests.*—4" scale maps have been supplied for two State Forests, *viz.*, (1) Seegedugudda—Ramadevarahalla, (2) Hurikalgudda. The other forests are being surveyed. Maps should be supplied as follows :—

For the District Forest Officer and Range Officers, each—one copy, wall map.

For the District Forest Officer and Range Officer, each—one mounted map in full sheets for field work.

For the Foresters, each—one mounted map in full sheets for field work.

3. (*a*) Control book, Form No. 2.

(*b*) Register of yield and outturn.

(*c*) Record of works of improvement, Form No 3.

The above three registers were inspected. They have not been posted up-to-date nor have the mistakes and omissions pointed out at the previous inspections been rectified and supplied. It is doubtful whether the present District Forest Officer or his predecessor saw these registers since the Conservator's last inspection, although distinct orders had been given that they should be posted up by the District Forest Officer in person ; *vide* note to para 4 of the Inspection Report of 1909. Sample forms have now been supplied and it is hoped that the District Forest Officer will make an effort to prepare, correct and up-to-date registers.

4. *Forest journal.*—No progress has been made in the compilation of this important register since the last inspection, nor has the District Forest Officer paid any heed to the orders given then.

5. *Register of receipts and issues of timber and other produce in depots, Form No. 6.*—Maintained up to end of January 1913. The settlement of the timber stock accounts is still pending and the report promised by the District Forest Officer and due in May 1909 has not been submitted. The earnest attention of the District Forest Officer is directed to this matter.

The reconciliation of the difference in the stock between the District Forest Officer's and Range Officer's book has been effected in the case of two depots. The remaining depots must be dealt with immediately.

The irregularities pointed out must be explained early.

6. *Register of sales of timber and other produce cut and collected by Government Agency, Form No. 7.*—Maintained up to end of January 1913. A few items of difference between the District accounts and Range returns as well as the several discrepancies observed at the inspection between Forms Nos. 7 and 6 have been pointed out and necessary explanation called for.

7. *Register of timber and other produce cut, collected and removed by consumers and purchasers, Form No. 9.*—Maintained up to the end of January 1913, but it has been compiled without any reference to Form F. The latter has not been carefully filed in the office.

The differences observed between the District and Range accounts have been pointed out and explanation called for.

8. *Outstandings on account of revenue, Form No. 10.*—Maintained. Most of the arrears observed at the previous inspection have since been recovered and settled.

Revenue (Forest), dated 29th May 1913.

Particulars of present outstandings are:—

No.	Name of purchaser	Sub-head	Amount	Remarks
1	2	3	4	5
			Rs. a. p.	
1	Y. Thimmegowda	I *a*	151 3 0	Relating to the value of dugout boats. Pending from April 1897, with the Hassan D. C.
2	Deputy Commissioner, Hassan 1910-11 ..	I *a*	118 11 9	
3	Do 1911-12 ...	I *a*	1,646 13 6	
4	Do 1910-11 ...	I *b*	13 5 0	
5	Vice President, Hassan Town Municipality.	I *b*	7 11 0	
6	Deputy Commissioner, Hassan, 1907 08 ..	I *c*	14 12 0	D. F. O Shimoga addressed on 29th February 1913, for recovery.
7	Do 1909-10 ..	I *c*	25 2 6	This is to be written off the accounts.
8	Do 1910-11 ...	I *c*	710 4 11	
9	Do 1911-12 ..	I *c*	1,408 14 6	
10	Mr. Gunda Setty, Sub-dal Revenue, 1911-12 ...	I *d*	3,000 0 0	Action taken for the recovery by the Conservator.
11	H. Nanjunda Setty, lne lease of Arsikere Range	II *c*	750 0 0	Rs. 700 of this is to be written off the accounts.
12	Mohamed Gouse, lne lease, Hassan District ...	II *c*	91 8 0	Action taken for the recovery
13	Balanna, tangadi lease	II *c*	213 0 0	Under correspondence. Party cannot be traced.
	Total		8,387 12 2	

9. *Register of drift and waif wood, Form No. 8.*—Not maintained.

10. *Register of free grants, Form No. 11.*— Maintained up to the quarter ending December 1912.

11. *Bill book, Form No. 12.*—Not maintained. It is not understood how the supplies f plague shed materials are billed for in the absence of this book.

12. *Receipts book, Form No. 13a.*—Maintained.

II. STOCK.

13. *Register of stores, tools and plant.*—Maintained in the prescribed form, but the ethod of posting is capable of improvement.

14. *Dates of last stock-taking*—

Hassan Range Office	...	...	30—6—12.
Arsikere Range Office	...	...	11—2—12.
Manjarabad Range Office	...	...	30—4—12.

15. *Unserviceable stores*—

Armed chairs.—2 broken and useless.
Camp chairs.—2 broken and useless.
Almirah.—1 old and broken to pieces and useless.

If irreparable, these might be sold.

16. *Equipment of stores, whether sufficient or excessive.*—Sufficient.

Timber, etc., in depots—,

17. *Dates of last complete stock-taking.*—

Heggade, 18th April 1912.
Kemphole (19th-22nd), April 1912.
Bisle (23rd-25th), April 1912.
Seegodugudda, 5th April 1912.
Ramadevarabetta, 6th December 1912.
Arsikere Depot, 26th November 1912.
Hassan Koti, 6th April 1912.

III. CASH ACCOUNTS.

18. *Cash book.*—Maintained, but the manner in which it is written leaves somewhat o be desired. There are several avoidable corrections and these are due, it is explained to ntimations of issues of cheques being received late when the District Forest Officer is out in mp. To avoid this in future all cheques must be transmitted through the office.

2. The irregularities pointed out at the last inspection have been attended to. The port of the District Forest Officer as regards recoveries on account of security deposits, hich at previous inspections were found to be not properly accounted for must be expedited.

(*a*) Entries were compared with the vouchers for February and March 1913 and found to tally.

(*b*) Cash book was written up to 7th March 1913.

(*c*) The subordinates' returns were received and written up to end of January 1913. Those for February 1913, received from all the Ranges have not yet been incorporated in the District Cash Book.

19. *Cash balance.*—Rs. (42-9-6) Rupees forty-two, annas nine and pies six only. Found correct.

20. *Record of sanctioned works, Form No. 28.*—Maintained but wanting in details. Completion report had not yet been submitted for the repairs of the Arsikere Depot for which Rs. 250 were sanctioned so far back as February 1907.

21. *Register of Licenses, Form B.*—Maintained correctly noting license book numbers, etc.

22. *Register in Form C.*—Written up correctly.

23. *Register of passports, register, etc.*—Not maintained although the omission was pointed out at the previous inspections. This must be explained.

24. *Copies of establishment pay bills.*—Maintained up to end of September 1912. But consolidated copies of pay bills have not been submitted to the Comptroller since July last.

25. *Acquittance roll.*—Maintained correctly.

26. *Usual date of payment of salaries.*—By the 2nd or 3rd of each month at headquarters.

27. *Copy of travelling allowance bills.*—Maintained correctly.

Particulars of bills due are :—

Protective establishment, Arsikere, due from September 1912.
Range Office, Hassan, due from January 1913
Protective Establishment, Hassan Range, due from October 1912.
Range office, Manjarabad, due from January 1913.
Protective establishment, Manjarabad Range, due from December 1912.
District Forest Office, due from February 1912.

28. *Cheque books.*—Kept in the personal custody of the District Forest Officer and written up by himself.

29. *Account current, Form No. 18.*—Written up-to-date.

30. *Register of cheques, Form No. 19.*—Maintained up-to-date.

(*a*) Accounts maintained with
(1) Hassan District Treasury.
(2) Manjarabad Taluk Treasury.
(3) Arsikere Taluk Treasury.

(*b*) Last quarter to which the Register (Form No. 18) has been balanced.
Quarter ending 31st December 1912.

(*c*) The Register has been written up to 7th March 1913.

(*d*) Entries of cheque books have been compared in detail with the cash book from January 1908 up-to-date and found to agree.

31. *Contractors' and Disbursers' ledger, Form No. 24.*—Maintained but not up-to-date. Transactions have not been entered as they occurred. Details under "Particulars" column are still meagre. Balances are not regularly reconciled with those of the Ranges. Many irregularities observed have been pointed out and explanation called for.

32. *Monthly abstract of the contractors' and disbursers' ledger, Form No. 25.*—This has been posted up to end of January 1913.

33. *Dates of submission of the cash and stock accounts.*—A systematic delay of over a month in the submission of cash accounts and of nearly three months in that of the stock accounts has been observed. The attention of the District Forest Officer is invited to Articles Nos. 169 and 170 of the Forest Code and he is asked to explain the delay which is not creditable in a light district like Hassan.

34. *Schedule of remittances.*—Consolidated schedules of remittances received from the District Treasury have been filed in the office for the last six months.

35. *Objection statements.*—Two statements are pending disposal from April and May last. The objections chiefly relate to high rates.

36. *Register of disallowances, fines, etc.*—Maintained up to end of February 1913. Details are wanting in a few cases.

Revenue (Forest), dated 29th May 1913.

IV. OFFICE BUSINESS.

37 *Keeping of documents.*—The records were overhauled and are being arranged now

38. *Register of books and maps*—Maintained correctly.

39. *Registers of receipts and issues of correspondence.*—Maintained up-to-date.

40. *Destruction of useless documents.*—A list is promised after the sorting of the records now in progress.

41. *Neatness in keeping*—Leaves much to be desired

42. *Punctuality in correspondence*—There has been some improvement since the advent of the present District Forest Officer.

43. *Pending papers*—The following are the particulars of pending papers —

For over three years	..	...	.. 2
For over two years	.		. 2
For over 1 year	.	.	.. 6
Within one year		...	.. 18
			28

44. *Custody of stationery*—The stationery is in the custody of the 1st Clerk now. Registers for receipts and issues have been correctly maintained.

45. *Forest Department Code, Service Regulations and Civil Account Code.*—All the three have been kept corrected up-to-date.

46. *Forest Regulation and Rules.*—Corrected up-to-date.

47. *Record of cases compounded and prosecuted, Form No 35.* Maintained correctly, 83 cases have been reported during the current year.

48. *Register of Life Insurance Premiums.*—Not maintained.

49. *Register of security deposits.*—The register has not been posted up-to-date.

50. *Service books.*—The service books of the whole staff in the district are in the District Forest Office now, but no attention has been paid to their yearly verification The District Forest Officer's attention is directed to Article 230 of the Forest Code as well as to Government Circular Order No Fl 7215-55—S. & A. 484-08-1, dated the 7th May 1909. He is asked to explain how the Schedule of Establishment was prepared and certified to without any verification of the entries in the register.

51. *Diaries of the District Forest Officer.*—Not bound up at all.

52. *Gazette files.*—Bound up to end of December 1910.

53 *General state of discipline.*—Fair.

54. *Efficiency of establishment.*—The accountant is reported to be inefficient.

M. MUTHANNA,
Conservator of Forests in Mysore.

Proceedings of the Government of His Highness the Maharaja of Mysore, Financial (General Finance), dated 30th May 1913.

READ AGAIN—

Government Order No. Fl. 2282-91—G. F. 592-11-2, dated the 24th September 1912, reviewing the statements of audit objections raised by the Comptroller prior to the 30th June 1912 and outstanding on the 31st October 1912

READ—

Letter No. 5001—1175, dated the 28th January 1913, from the Comptroller to Government, forwarding the statements of objections raised prior to the 30th June 1912 and outstanding on the 31st October 1912, and stating that out of the total balance of Rs. 3,16,852 shown as outstanding on the 31st October 1911, items amounting to Rs. 1,95,258 have been adjusted during the year 1911-12.

No. FL. 6956-7001—G. F. 146-12-2, DATED BANGALORE, 30TH MAY 1913.

ORDER THEREON.—The outstandings under the several heads of the objection books of the Comptroller's office up to the end of 31st October 1912 were as follows:—

Treasuries	Advances recoverable	Suspense	Items adjusted but awaiting clearance	Service payments for recovery	Total
	Rs. a. p	Rs. a. p	Rs a. p	Rs. a. p.	Rs. a. p.
State Huzur Treasury ...	5,587 5 9	...	2,501 4 0	.....	8,088 9 9
Bangalore District Treasury	32,087 3 6	138 0 0	47,087 10 3	1,727 7 1	81,040 4 10
Kolar District Treasury	10,151 6 6	..	25,867 2 4	906 14 9	36,928 7 7
Tumkur District Treasury	11,818 10 7	16 15 0	7,942 5 4	370 7 9	20,148 6 8
Shimoga District Treasury	882 13 10	...	3,580 2 10	571 1 7	5,034 2 3
Kadur District Treasury	1,179 8 4	...	87 4 3	115 12 11	1,412 9 6
Hassan District Treasury	4,676 15 7	...	2,449 0 2	296 5 10	7,422 5 7
Mysore District Treasury	13,882 14 8	716 4 2	9,850 2 5	912 8 3	25,361 13 6
Chitaldrug District Treasury	2,166 0 10	...	4,584 10 2	39 13 8	6,790 8 8
Total ...	82,135 15 7	871 3 2	1,03,949 9 9	4,970 7 10	1,92,227 4 4

Advances recoverable.—Figures shown against the Bangalore District are heavy. Many of the items which make up the total as regards this treasury are more than four years old. Next comes Mysore District, where items relating to 1905-06 and 1907-08 are still awaiting adjustment. The items pending in the Kolar and Tumkur Districts continue to be large. The Deputy Commissioners concerned should give this matter their personal attention and take steps for the early adjustment of the items.

3. *Items adjusted but awaiting clearance.*—These relate to items kept under formal objection for want of compliance with the requirements of audit rules. If the disbursing officers pay particular attention to standing orders on the subject there is no reason why this head should show any item as remaining unadjusted. It is hoped that these will be cleared early.

4. *Service payments for recovery.*—Government fail to see why service payments ordered for recovery should remain unrecovered for over four months. The attention of the Deputy Commissioners in the Treasury Department is drawn to Article 16 of the Civil Account Code and to the instructions given therein which should be implicitly followed.

5. The Comptroller is requested to classify his objections and show separately in his future reports how many of these objections are mainly due to inattention to rules on the part of Treasury Officers.

J. S. CHAKRAVARTI,
Financial Secretary to Government.

To—The Comptroller, Mysore Government.
The Revenue Commissioner in Mysore.
The Deputy Commissioners of Districts.
The other Heads of Departments.

Exd.—C. R.

Proceedings of the Government of His Highness the Maharaja of Mysore, Financial (Separate Revenue), dated 20th May 1913.

READ—

Government Order No. Fl C. 137-146—S R 230-11-3, dated the 17th October 1912, directing that pending further orders the provisions of Section 19 of the Excise Regulation in so far as they relate to the adoption of coercive measures against the owners of trees for recovering tree tax on trees tapped for toddy when the contractor becomes a defaulter, be held in abeyance.

No. Fl. 6827-36—S. R. 230-12-8, DATED BANGALORE, 20TH MAY 1913.

ORDER THEREON.—Government have again considered the question as to whether the liability of the owner for tree tax on trees tapped for toddy, in case of default by the licensee, embodied in Section 19 of the Excise Regulation, should be done away with, and have come to the conclusion that no change is needed in this respect. In the first place, a provision against collusion between the occupant and the licensee, to the prejudice of the Excise Revenue of the Government, is indispensable. In the second place, the liability of the occupant is, according to Section 19 itself, not of a primary character. Lastly, it is further open to him to protect even his secondary liability by refusing permission to tap his trees to all but solvent licensees who alone are as a rule accepted by the Excise Department.

Nevertheless, the Government are prepared to give due weight to the argument that an occupant does not receive sufficient and timely warning of his secondary liability. To remedy this inconvenience, the Government of His Highness the Maharaja are pleased to direct the following modifications, so as to emphasize the provisions of Section 19 and to make the legal position of the occupant clear to him every time he grants permission to a licensee to tap his trees :—

1. In para 4 of Rule 17 of the Rules applicable to Toddy Licenses (Condition No. XXI of Auction Sale), after the words "in token of his consent" the following shall be added :—

"To the trees being tapped and to holding himself liable for the tree tax in case the license-holder fails to pay it."

2. The certificate prescribed in the last column of T. T. No. 4 (application for tree tax licenses) will be amended as follows :—

"I hereby certify that..... .....has been permitted to draw toddy from my trees standing in my number shown in column 6 and I hold myself liable to pay the tree tax in whole or in part in case the said. .....fails to pay the same."

The Revenue Commissioner in Mysore.
The Deputy Commissioners of Districts.

Exd.—C. R.

Proceedings of the Government of His Highness the Maharaja of Mysore, Financial (Salaries and Allowances), dated 3rd May 1913.

READ—

Letter No. 6259—T. A. 79, dated 19th April 1912, from the Comptroller to the Government of Mysore, reporting upon a second claim for travelling allowance made by an officer for the same purpose, when the claim had once been already passed.

No. FL. 6414-59—S. & A. 4-11-18, DATED BANGALORE, 3RD MAY 1913.

ORDER THEREON.—In this case, it has been found that the second claim was preferred by a mistake made in good faith which was due to the failure of the officers concerned to maintain the prescribed registers.

2. Attention of all officers of Government is invited to Articles 69 and 70, Civil Account Code, Vol. I, which prescribed that a register showing correct office copies of every travelling allowance bill that passes through it should be maintained. The omission to maintain the Register has, in the case under advertance, rendered a second claim possible.

3. Government therefore direct that the rules therein laid down should be strictly followed in future.

Government Proceedings No. J 3203-14—Cts. 202 07-4, dated the 19th April 1909. inaugurating as an experimental measure, the system of Benches of Honorary Magistrates in the Cities of Bangalore and Mysore.

2 Letter No S. 120, dated the 19th September 1912, from the District Magistrate, Bangalore District, reporting in detail on the working of the scheme of the Bench of Magistrates in the Bangalore City, and requesting for reasons stated therein that the institution may be made permanent.

3 Letter No. 194, dated the 12th October 1912, from the District Magistrate, Mysore District, furnishing a similar report on the working of the system in the Mysore City and recommending the permanent continuance of the Court.

No. J. 3339-50—CTS. 83-12-3, DATED BANGALORE, 3RD MAY 1913.

ORDER THEREON.—The system of Benches of Honorary Magistrates has been working for nearly four years at Bangalore and Mysore. The District Magistrates of both in their yearly Administration Reports and in the special reports now received spoken well of the work turned out by the Benches, and Government have expressed their approbation of the same in annual reviews of criminal administration.

2. Government are therefore pleased to direct that the Courts of Bench Magistrates be continued as permanent institutions in both the Cities of Bangalore and Mysore.

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

Letter No 6819—L. A. D. 962, dated the 9th April 1913, from the Comptroller, Mysore Government, submitting a statement showing revised heads of account for recording the income and expenditure of the Municipalities in the State.

No. 9545-57—ML. 138-12-10, DATED BANGALORE, 31ST MAY 1913.

ORDER THEREON.—The present heads of Municipal account were prescribed in Government Order No. 1114-26—Ml. 433-08-3, dated 29th July 1909. In connection with the revision of the Municipal budget forms, the Comptroller, who was consulted unofficially in the matter, suggested the desirability of reducing some unnecessary details in the Municipal heads of account as in the case of the District Fund heads of account sanctioned in Government Order No. 7883-93—L. B. 201-10-3, dated 26th April 1912. The Comptroller was thereupon requested in para 5 of Government Order No. 2243-54—Ml. 138-12-1, dated 11th September 1912, to report in detail the alterations he proposed to make in the Municipal heads of account. With the letter read above, the Comptroller has submitted a statement showing the revised heads and explaining the principal modifications proposed by him.

2. On a careful consideration of the subject, Government are pleased to approve of the suggestions of the Comptroller with slight modifications and they direct that the revised heads of account appended hereto be adopted for recording the income and expenditure of the Municipalities in the State with effect from the 1st July 1913.

3. The most important modification hereby introduced is the omission on the receipt side of the account of details of income from octroi. This no doubt simplifies the preparation of the Municipal Accounts. Government, however, consider that the details of income in each Municipality from each article, etc., subject to octroi, is necessary in connection with the review of the Municipal Annual Administration Reports and they are accordingly pleased to direct that an additional Appendix VIII-A in the form appended hereto be submitted to Government along with the Municipal Annual Administration Reports and statements prescribed in Government Order No. 1104-20—Ml. 83-10-2, dated 2nd August 1910.

4. The Comptroller is requested to be good enough to revise the monthly Municipal cash account form and statements explaining the difference between the accounts of the Presidents and the Treasury Officers and forward them to the Superintendent of the Government Press for being printed. The Deputy Commissioners and Presidents are requested to send at once indents for the number of copies of the revised cash account form required by them to the Superintendent of the Government Press and Stationery for compliance.

K. R. SRINIVASIENGAR,
Secy. to Govt., Gen. & Rev. Depts.

To—The Comptroller, Mysore Government.
The Superintendent, Government Press and Stationery.
The Deputy Commissioners of Districts.
The President of the Bangalore City Municipal Council.
The President of the Mysore City Municipal Council through the Deputy Commissioner of the Mysore District.
The President of the Sringeri Municipality through the Deputy Commissioner of the Kadur District.

Do	378, dated 22nd March 1913		do	do	Kadur	do.
Do	860, dated 3rd April 1913		do	do	Kolar	do.

No. 9381-8—ML. 195-12-10, DATED BANGALORE, 26TH MAY 1913.

ORDER THEREON.—The Deputy Commissioners of Bangalore, Tumkur (Mr. C. S. Balasundaram Iyer), Shimoga and Kadur (Mr. A. Subrahmanya Iyer) support the proposal made by the Deputy Commissioner of Hassan District, that the foils may be destroyed after two years. The Deputy Commissioners of Mysore and Chitaldrug (Messrs. Chandy and Krishna Iyer) consider that the foils should be preserved for longer periods, *viz.*, ten years and eight years, respectively, on account of their evidential value. The Deputy Commissioner of Kolar (Mr. P. F. Bowring) considers that they should be preserved like the originals.

2. From the replies received it is also learnt that a uniform practice is not observed in regard to the submission of foils to the District Offices. It is reported that in the Bangalore, Kolar and Kadur Districts, the foils are not submitted to the District Offices.

3. Recognising the necessity for their longer preservation and with a view to secure uniformity of practice, Government direct that these foils of registers be invariably submitted to the District Offices and that such foils should be preserved for ten years.

K. R. SRINIVASIENGAR,
Offg. Secy. to Govt., Gen. & Rev. Depts.

To—The Deputy Commissioner, Hassan District.
The Deputy Commissioners of other Districts.

Proceedings of the Government of His Highness the Maharaja of Mysore,

READ—

Letters Nos. 7098 and 7099, dated the 11th May 1912, from the Comptroller, submitting reports on the special audit of the accounts of the Bangalore City Municipality ordered in Government Proceedings No. 2332-3—Ml. 80-09-2, dated the 9th September 1909.

No. 9432-5—Ml. 80-09-48, DATED BANGALORE, 29TH MAY 1913.

ORDER THEREON.—The accounts of the Bangalore City Municipality up to the end of June 1903 were audited by Mr. Kiernander. The present audit covers a subsequent period of seven years up to the end of June 1909. It was conducted under the marginally noted heads of accounts.

1. Conservancy cess accounts.
2. Market accounts.
3. Mohatarfa accounts.
4. Public Works accounts.
5. Octroi accounts
6. Excess water accounts.
7. Cattle pound accounts.
8. Animal and vehicle license accounts.
9. Site value accounts.
10. Miscellaneous accounts

2. The audit disclosed :—

(i) that there were defalcations of Municipal revenue ;

(ii) that the outstanding arrears were very heavy ;

(iii) that the registers and accounts have not been properly maintained; and

(iv) that some of the registers and accounts have been missing.

3. As regards defalcations, some of the defaulters have been prosecuted and convicted, some who were under trial have been acquitted or discharged and steps are being taken to bring the other offenders to justice. Government regret to observe that the above irregularities were mainly due to want of supervision and control on the part of the executive officers of the Municipality.

4. The improvements suggested to better the unsatisfactory condition of the Municipality are chiefly—

(i) appointments of a full-time President,

(ii) re-organization of the office with a view to keep the cash and account branches distinct,

(iii) leasing out the market collection in its entirety,

(iv) farming of octroi revenue or its abolition,

(v) compilation of an office manual for the guidance of officials,

(vi) revision of forms and accounts.

5. Effect has been given to suggestion (i) by the appointment of a non-official whole-time President for the Bangalore City Municipality. The proposal to separate the cash and account branches is engaging the attention of Government. The farming out of the collection of octroi revenue is opposed to the standing orders of the Government of India communicated in the late Chief Commissioner's Proceedings No. 2637—Ml. 277, dated the 26th October 1877. As regards its abolition Government have already passed orders to the effect that if any Municipal Council is disposed to abolish octroi partially or entirely, it may do so after submitting definite proposals and obtaining sanction of Government. The Comptroller is taking necessary action for including in the Municipal Account Code the suggestion of the audit officers with regard to the revision of forms.

6. Excepting the reports relating to the conservancy cess and Market accounts which have been already forwarded to the President, a copy of each of the audit reports now received will be forwarded to the President who is requested to examine it in detail with a view to his noticing the irregularities and setting matters right, in consultation with the Municipal Council. A report of the action taken with regard to each audit report with the result thereof should be submitted for the orders of Government as early as practicable.

7. A copy of the audit report on the excess water accounts will be forwarded to the Chief Engineer for similar action being taken in the matter, as the collection of charges on account of excess water consumption now devolves on the Public Works Department. A copy of the audit report on Public Works accounts will also be forwarded to him for necessary action.

Local Fund and Sanitary (Municipal), dated 29th May 1913.

8. It is finally observed that the delay in the audit of accounts was due to non-production of accounts and records by the Municipal staff. For the same reason it is stated that the extent of defalcations could not be determined and detected. The President is requested to examine the case thoroughly, detect loss of Municipal revenue by enquiries and other means and take steps for guarding against similar losses in future.

K. R. SRINIVASIENGAR,
Secy. to Govt., Gen. & Rev. Depts.

To—The Comptroller, Mysore Government.
The President of the Municipal Council, Bangalore City.
The Chief Engineer of Mysore
The Comptroller, Public Works and Railway Accounts.

Ead—C. R.

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

(1) Correspondence ending with letter No. 86, dated the 10th September 1912, from the Special Committee appointed in Government Order No. 3585-9—Edn. 462-09-2, dated the 28th October 1910, to consider the subject of the improvement of Industrial Education in the State and to submit a detailed report in the matter.

Letter No. 86, dated 10—17th September 1912, from the Committee for Industrial Education.

We have the honour to submit a detailed report comprising a scheme of Technical Education in Mysore as called for by Government in their Proceedings No. 3585-9, dated the 28th October 1911. In compliance with instructions received, a comprehensive programme with defined courses of training has also been indicated as far as it is possible to do so in a general scheme of this sort.

With a view to submit proposals for immediate action, the Chairman of this Committee addressed you recently asking for information as to the amount Government were prepared to spend on Technical Education in the current year as well as in the next two or three years. We notice from your reply No. 1657, dated 20th August 1912, that a grant of Rs. 50,000 capital and of Rs. 10,000 recurring has been sanctioned.

2. Before any practical programme can be drawn up, it is important that Government should be prepared to state what money they desire to spend for a definite term of years. In the absence of specific instructions on this point, we have thought it necessary to assume figures as under, which we consider reasonable for the next three and a half years:—

	Capital Rs.	Recurring. Rs.
1912-13	30,000	30,000
1913-14	50,000	1,35,000
1914-15	50,000	1,55,000
1915-16	50,000	1,60,000

3. The draft report on the scheme of Technical Education was prepared in November 1911 and copies were submitted to Government and simultaneously circulated to members of the Economic Conference and other gentlemen interested in the subject with a request that they would favour the Committee with their criticisms and suggestions. These opinions have now been received.

The scheme was also placed before the Economic Conference during the last Birthday Session, but for want of time, it was not taken up for discussion.

We understand that the Education Committee of the Economic Conference have gone into the scheme and made certain recommendations.

Some selected opinions received have been printed as an enclosure to this letter.

4. The opinions given by the gentlemen consulted show that no serious objection has been taken in any quarter either to the scheme as a whole or any important section thereof, save in respect of the proposed College of Technology in Bangalore. After a careful consideration of the suggestions received, we have thought it desirable to suggest the postponement of the establishment of a college for the present, but we consider it necessary that a beginning should be made with at least a few classes which should form the nucleus of a future college. As suggested in the report, all necessary scientific training that is available in the Institute of Science and the Central College should be fully availed of by the students of these classes.

5. It would be possible to provide staff and conveniences, including a hired building, at an outlay of Rs. 25,000 per annum to commence with. We attach great importance to the training of leaders and managers of industries, which shall be the object of this class. Some selected students and apprentices to the number of about a dozen may be admitted to the class from 1913. The workshop in Bangalore will have to be enlarged. We understand that proposals, to this end, are under consideration in the Public Works Department.

6. The grant for the current year for developing the Chamarajendra Technical Institute in Mysore stands at Rs. 50,000 capital and Rs. 10,000 recurring. As it is understood that

Proceedings of the Government of His Highness the Maharaja of Mysore,

the building is not likely to be ready for some months to come, we propose to redistribute the grant as follows:—

	Rs.
(1) Classes for the higher Industrial Education (Equipment and Apparatus)	12,500
(2) Chamarajendra Technical Institute	22,500
(3) Subsidies and Grants-in-aid and Model and Demonstration Schools	12,500
(4) Direction and Control	12,500
Total ...	60,000

Out of a total of Rs. 60,000 granted for this year, Rs. 22,500 may be given for capital and recurring outlay in connection with the Chamarajendra Technical Institute and the balance of Rs. 37,500 utilised for making a commencement with the working of a Technical Education programme as recommended above.

The workshop in Bangalore has to be developed and subsidies and grants-in-aid given, as local bodies or individuals come forward with sufficient funds to supplement Government grants. It is important that the foreign sholarships should receive early attention if we are to get trained men within the next few years for industrial and commercial work within the State.

7. The Committee therefore beg to recommend that the annual expenditure for the three years, commencing from 1913-14, inclusive, may be as shown below:—

Items	1913-14	1914-15	1915-16
	Rs.	Rs.	Rs.
1. Higher Industrial Education	25,000	25,000	25,000
2. Chamarajendra Technical Institute	25,000	25,000	25,000
3 Improving existing Industrial Schools	10,000	25,000	25,000
4. Subsidies and Grants-in-aid and Model Institutions ...	10,000	15,000	20,000
5. Scholarships and Foreign Training	40,000	40,000	40,000
6. Direction and Control	25,000	25,000	25,000
Total ...	1,35,000	1,55,000	1,60,000

The capital outlay in each of the three years may be taken at Rs. 50,000.

8. In connection with the general scheme we have recommended an initial capital outlay of Rs. 5 lakhs spread over three years and a recurring outlay of Rs. 3 lakhs. Our present proposal for a commencement is the modest one indicated in paragraph 6 above which involves a capital outlay of Rs. 35,000 in the current year, of Rs. 50,000 in each of the succeeding three years, besides a recurring outlay of Rs. 25,000 for the current year, and Rs. 1,35,000, 1,55,000 and 1,60,000, respectively, in the succeeding three years. Government have already sanctioned Rs. 60,000 for the current year and we now propose merely to redistribute the grant. No additional grant will, therefore, be needed till the 1st July next if these proposals are sanctioned.

9. As two months of the official year have already elapsed, we request that Government will be pleased to sanction the programme outlined in this letter at a very early date. The details may be worked up in consultation with the Education Department by the Special Adviser for Industries and Commerce to whom we recommend that the execution of the proposals may be entrusted. The Adviser may be required to work in consultation also with the Education Committee as well as with the Committee for Industries and Commerce of the Mysore Economic Conference.

10. We also beg to suggest that a small Committee be at once formed with Mr. Chatterton as Chairman and the Inspector-General of Education, Mr. Subbaswami Iyer and Mr. B. C. Srinivasiengar as members to report for the sanction of Government a detailed scheme of work and proposals for spending the grants recommended for the current and the coming year.

11. To sum up, we recommend that—

(1) The scheme of Technical Education in Mysore elaborated by the Committee be approved by Government as a basis for practical action for the next five years.

Local Fund and Sanitary (Education), dated 1st May 1913.

(2) The full scheme which involves a capital outlay of Rs. 5 lakhs and a recurring annual outlay of Rs. 3 lakhs be brought into operation as early as circumstances permit

(3) That for the next 3½ years commencing from 1st January 1913, the programme of work and the expenditure suggested in this letter be sanctioned

(4) A Committee, with the Special Adviser for Industries and Commerce as President, be appointed at once to formulate detailed proposals to give effect to the programme and utilise the funds, allotted in the current year and to be allotted for the year 1913-14, in consonance with the principles indicated in this letter and the accompanying report.

---

(2) Letter No 343, dated the 20th September 1912, from the Provisional Secretary to the Economic Conference, submitting the resolutions of the Education Committee of the Conference on the scheme for the improvement of Industrial Education prepared by the Committee appointed by Government

Resolutions I to IX passed at the meeting of the Education Committee held on the 24th August 1912 in regard to the draft report of the Committee appointed for the improvement of Industrial Education in the State.

I. That the scheme for the Chamarajendra Technical Institute given on pages 10 to 13 be recommended for adoption with the following modifications —

(*a*) the words 'or an entrance examination held by the school authorities' to be inserted after the words 'the School Final Examination' in paras 34 and 36.

(*b*) Group (*d*) of para 36 may be omitted (Passed by a majority)

(*c*) the following remark to be added at the end of para 38.

'Instruction in subjects mentioned in the above para will be limited to those for which provision can be conveniently made.'

(*d*) The following remark to be appended to para 40 —

'Instruction in subjects mentioned in this para will be confined to pupils mentioned in para 38.'

II. That the scheme for the improvement of existing Industrial Schools in the State (pp. 13-16) be recommended for adoption with the following modifications —

(*a*) 'Coir brushes' to be inserted before 'weaving and carpentry' against Chiknayakanhalli in para 49

(*b*) Rs. 50—10—100 for Rs. 100 and Rs 50 for Rs. 75 to be substituted in para 51.

(*c*) A remark to the effect that an attempt will be made gradually to withdraw scholarships and to introduce payment for actual work done to be added to the first para of Section 53.

III. That the ideas of the Committee developed in pages 16—24 about model institutions appear to be sound and useful but that it is doubtful whether any town or important village will desire to pay for them or apply to Government for help to start them; that it would be useful if Government would from its own funds maintain or subsidize liberally some girls' industrial schools (p. 22) and special classes and lectures (pp. 23 and 24).

IV. That if there is demand, it would be desirable for Government to give two scholarships in addition to the Damodar Dass scholarships every year for training in such technical or other practically useful branches of knowledge as may be selected and that a scholarship of £200 would as a rule be liberal enough. (Para 98)

V. The Committee cannot endorse the recommendation contained in para 99 in that form but they consider that it would be useful to depute selected officers or others to foreign countries when any enquiry and study on the spot is necessary in any particular well defined subject.

VI That the Committee endorse the opinion contained in para 105, that there should be a Director for the control of Industrial Education; but consider that an officer on a salary not exceeding Rs. 1,000 a month should be secured not only to do this work but also to act as Director of Industries and that there would not be sufficient definite work for a full-time Director of Industries at present.

VII. That an Inspector may be appointed later on when the necessity for the appointment is felt.

VIII. That while a Technological College on the scale proposed is somewhat too costly for the present, a modest beginning may be made to start a school in Bangalore for some selected subjects such as Electrical Engineering and those mentioned in para 21, an effort being made to arrange the work so as to lead to the facilities provided by the Institute of Science being utilised for more advanced education in the branches selected.

IX. That with the qualifications given above, the Committee consider that the scheme submitted by the Committee appointed by Government is well considered and ably worked out and that the recommendations deserve to be carried out by Government.

---

(3) Letter No. 9177—506, dated the 14—17th February 1913, from the Inspector-General of Education in Mysore, submitting proposals for opening a Mechanical Engineering School at Bangalore.

I have the honour to forward herewith certain proposals for the opening of a Mechanical Engineering School at Bangalore for the consideration and sanction of Government. The whole subject was considered by a Committee informally nominated by the Dewan, consisting of myself as President, Mr. K. Srinivas Iyengar, Executive Engineer, Water-Supply and Stores Division, as Secretary, and Messrs. V. Rangaswamy Iyengar, Superintending Engineer, Southern Circle, and M. G. Rangiah, Assistant Engineer, Public Works Secretariat. I enclose the report of the Committee with a plan and estimates for the building and equipment, etc., required, as well as a preliminary note by Mr. V. Rangaswami Iyengar. I request that the Government may be pleased to sanction the establishment of a Mechanical Engineering School at Bangalore on the lines mentioned in the report of the Committee.

2. The initial cost for building, furniture, workshop, machines, tools, etc., demonstration models, motor car, engines, pumps, etc., and library, as per detailed estimates enclosed will be Rs. 24,049 as given in para 4 of the Committee's report, and the recurring expenditure as given in para 8 of the same report, on the staff, establishment, workshop expenses and scholarship to students will be for the first year Rs. 15,780, for the second year Rs. 17,700 and for the third year Rs. 19,620. In the estimate under scholarships, provision has been made for two foreign scholarships, of the value of £200 per annum for the study of Mechanical Engineering. This amount is the same as given to holders of Damodar Dass Scholarships. In addition about £100 for passages and £25 for kit for each student will also be required as in the case of Damodar Dass scholars. In granting the scholarships, preference may be given to such of the applicants as are ready to meet a portion of the expenses, say one-third, from their own funds. As proposed in para 13 of the report, an extra sum of Rs. 1,500 may be sanctioned for making advances to students who are unable to find funds at once for purchasing instruments, etc. The whole of the cost, initial as well as recurring, may be met from the allotment of Rs. 60,000 provided in the State Funds Budget of the current year for the improvement of Industrial Schools.

3. The number of admissions to the school will be 50 per annum and the course will extend over three years, and the Committee consider that the whole of the staff should be regarded as temporary to begin with, and that it is desirable to revise the scale and grade the different appointments and put them on a permanent footing after a period of three years.

4. As proposed in para 9 of the report the triangular plot of ground between the Revenue Survey office and the new High School appears to be a suitable site for the school, being near the Public Works Workshops, and I request that permission may be kindly accorded by Government to have the necessary buildings on this plot of ground.

5. As regards the Superintendent, some difficulty may be apprehended to find a competent person at once and in para 14, the Committee have proposed the names of three Public Works Department Officers in the order of fitness, *viz.*, Messrs. S. Venkata Subba Chetty, Assistant Engineer, V. Ganapathy Iyer, Sub-Assistant Engineer and S. Muthuswami Iyer, Overseer. I am of opinion that temporarily the services of Mr. Venkata Subba Chetty may be lent for being employed as Superintendent and as he will be stationed at Bangalore, the Electric Department can utilize his services for short periods, if absolutely needed, although the arrangement may not be satisfactory in actual working. I beg also to propose for the sanction of Government that the same Committee which has now submitted the report may be appointed to manage the Mechanical Engineering School when started. Pending the construction of a building, permission may also be accorded as stated in para 12 of the report, to hold the school in the Sir Sheshadri Memorial Hall, from where the sloyd classes have been removed.

Local Fund and Sanitary (Education), dated 1st May 1913.

ENCLOSURES.

(1) Report of the Committee appointed to consider and submit proposals for start a Mechanical Engineering School at Bangalore.

1. The Committee having considered in detail the recommendations of Mr. V. Ra swami Iyengar as contained in his note, dated 4th February 1913, is of opinion that t may be generally adopted and a school started from the 1st of April 1913.

2. The Committee suggests that the management of the school be vested in Educational Department assisted by an Advisory Committee.

3. The Committee has slightly modified the estimate framed by Mr. V. Rangasw Iyengar which provides for an initial expenditure of Rs. 20,000.

4. The initial cost of the scheme as now recommended amounts to Rs. 24,000 (as detailed estimates submitted).

5. The number of admissions may be increased from 25 to 50 (40 students and teachers) per annum, the number of scholarships being correspondingly increased from to 20.

6. It is also recommended that provision may be made for two foreign scholarsl of the value of Rs. 250 per month for the study of Mechanical Engineering.

7. As much difficulty is experienced at present in getting suitable teachers for different industrial schools in the Province, provision should be made for the training of s teachers. Candidates for admission to this class must have at least passed the Matricula Examination or its equivalent. The course of study will be three years.

8. The recurring expenditure will be as under :—

1. Staff.

	Rs.
One Superintendent on	250
One Shop Instructor	100
One Drawing Master	75
Three Mestries on Rs. 50, 40 and 35	125
One teacher for Class Room	75
Total ...	625
Allowances to some of the local Engineer Officers of the Public Works Department for lectures on special subjects	150
Total ..	775

2. Establishment.

One clerk	25
Two peons at Rs. 7 each	14
Two watchmen at Rs. 7 each	14
One sweeper	7
Contingencies	20
Total . .	80
Total of staff and office establishment	855 per month.

Note.—The whole of the staff will be temporary to begin with and it will be desirable to revise the scale and grade the different appointments and put them on permanent footing after a period of three years.

3. Workshop expenses.

	Rs.
Including materials required, etc.	300 per month.

4. Scholarships to students.

First year 20 students at Rs. 8	160
Second year 40 do	320
Third year 60 do	480

The yearly expenditure will thus amount to as under :—

		Rs
1st year—		
Staff 855 × 12 or	...	10,260
Workshop expenses 300 × 12 or	...	3,600
Scholarships 160 × 12 or	...	1,920
Total	...	15,780
2nd year—		
Staff and materials as above	...	13,860
Scholarships 320 × 12 or	...	3,840
Total	...	17,700
3rd year—		
Staff and materials as above	...	13,860
Scholarships 480 × 12 or	...	5,760
Total	...	19,620

9. The Committee considers that the triangular plot of ground between the Revenue Survey Office and the New High School will be a suitable site for the school, being in fair proximity to the P. W. Workshops.

10. The course of study as per syllabus attached may be adopted for the present. It may be revised later on, if necessary. Some slight modification will, however, be made in the case of "teacher" pupils so as to allow more time say three hours per day for class work. Details will be worked out in due course.

11. The accompanying plans and estimates got up by the Executive Engineer, Water-Supply and Stores Division, for the School Building and Workshop may be sanctioned.

12. As it will take not less than three months from date of sanction for the proposed building to be fully equipped and got ready for practical work, sanction may be accorded as a temporary measure for holding the classes in the Sheshadri Memorial Hall, temporary arrangements being made in the Workshop for practical work.

13. Provision has been made in the estimate for the purchase of the necessary drawing boards, T and Set-squares. All other instruments should preferably be purchased by the students. But as many of them will probably find difficulty in the matter of funds, it is proposed that the amount (which may come to about 35 rupees per student) be advanced by Government in the first instance and recovered from the students in easy instalments. A sum of Rs. 1,500 may kindly be sanctioned for this purpose.

14. The Committee will take steps to secure the services of a competent staff for the school. But as there may be some difficulty in getting immediately a suitable man for the post of Superintendent, it is suggested that selection may be made from the three following names for temporarily filling the place.

The names are given in the order of fitness :—

Mr. S. Venkata Subba Chetty, Assistant Engineer.

Mr. V. Ganapathy Iyer, Sub-Assistant Engineer.

Mr. S. Muthusamy Iyer, Overseer.

All the three have had College training in Mechanical Engineering. The first has had the advantage of foreign training both in Mechanical and Electrical Engineering

---

SYLLABUS.

SCHOOL OF MECHANICAL ENGINEERING, BANGALORE.

The school will impart instruction in the principles and practice of the following :—

(1) Management and care of steam and oil engines.

(2) Management, care and erection of machinery and mill work.

(3) Electrical work including operating.

(4) Care and driving of motor cars.

(5) Carpentry including cabinet-making.

Local Fund and Sanitary (Education), dated 1st May 1913.

2. There will also be established a special class for training teachers for Industrial Schools.

3. The instruction given will be of such a character that the students will have had a sound and comprehensive education both in theory and practice, the practical side predominating.

4. For the present, the number of students that will be admitted to the school will be restricted to 50 every year. Candidates for admission should be between 15 and 18 years of age and shall have passed at least the Mysore Lower Secondary Examination unless specially exempted.

5. No fees will be levied, but students should provide themselves at their own cost text-books, note-books and the necessary drawing instruments.

6. Workshop tools, drawing boards, T-squares and Set-squares will be provided by the school.

7. *Attendance.*—The hours of attendance will be from 8 A.M. to 12 noon and 2 to 5 P.M. Every Saturday will be a half holiday. The important Government holidays will also be considered as holidays.

Out of the daily seven hours of work, five hours will be spent in the Workshop and the remaining two hours will be devoted to class and drawing work.

8. *Session or terms.*—The session or year commences on first Monday in July and will consist of two terms. The first term commences on the first Monday in July and ends on the 24th of December. The second term commences on the 5th of January and ends on the 30th of June.

9. *Course.*—The course will extend over $3\frac{1}{2}$ years in the case of Branches 1, 2 and 5 (the last six months being a sort of practical course in one of the Pumping Stations or where large works are in progress) and $2\frac{1}{2}$ years in the case of Branches 3 and 4.

10. *Examination.*—An examination will be held yearly at which students who have put in the full course will be allowed to sit. The examination will cover all the subjects of the course and comprises both written and practical.

Students who qualify themselves and obtain not less than 30 per cent in any one of the subjects and 50 per cent in the aggregate will be given a Diploma (after the completion of the practical course).

A student who fails to secure a pass at the first sitting may be allowed a second time and no more. But if he is found to have acquired average proficiency, he may be given a certificate instead of a Diploma and be allowed to undergo the six months' practical course.

11. *Application for admission.*—Application for admission which shall be in the candidate's own handwriting must be made on or before the first week in June on forms which can be obtained from the Superintendent. The application should be accompanied by two certificates (1) certificate of age from parent or guardian that the applicant is between the years 15 and 18, (2) certificate of character from the Head Master of the school in which he was studying last testifying to his general good behaviour while in the school.

Course of studies.—Branches I and II, *i.e.* (1) management and care of steam and oil engines, and (2) management, care and erection of machinery and mill work:—

1. *Mathematics.*—Arithmetic, Algebra, Euclid, Mensuration (Matriculation Standard).

2. *Science.*—Elements of Physics and Chemistry (Matriculation Standard).

3. *Drawing.*—Geometrical, Machine and Freehand and Elementary Building, Drawing and Isometric projection.

4. *Estimating.*—Estimating of simple structures and machines.

5. *Applied mechanics.*—Strength of materials and designing of simple structures and machine parts. Graphic statics.

6. *Elements of mechanism.*—Description of the ordinary machines such as lathes, drills, etc., and workshop appliances, etc.

7. *Materials of construction.*—Building materials (timber, stone, lime and cement); brass, iron and steel; paints and varnishes.

8. *Steam, oil and petrol engines.*—Properties of steam, various kinds of fuel, theory of internal combustion engines, gas producers, suction gas engines, description of various types and parts of engines (oil and steam).

9. *Pumping and pumping machinery*.—Rudiments of hydraulics, description and working of various types of pumps, calculation of discharge and efficiency.

Note.—Students taking Branch I will spend the last six months of their course in one of the Pumping Stations and those taking Branch II in the Workshop.

Branch III, *i.e.*, electrical work including operating :—

1. *Mathematics.*—As per Branches I and II.
2. *Science.*— Do
3. *Drawing.*— Do
4. *Applied Mechanics.*—Strength of materials and graphic statics.
5. *Elements of Mechanism.*—Same as for Branches I and II.
6. *Materials of construction.*—Same as for Branches I and II.
7. *Electricity and Magnetism.*—Electrical units, production of currents by induction, dynamo, alternators and transformers Incandescent and arc lamps, electrolysis, electro-plating, elements of telegraphy and telephony, storage-battery.
8. *Laboratory work.*—Electrical measurements, testing of instruments and motors.

Branch IV, *i.e.*, Care and driving of Motor Cars :—

1. *Mathematics.*—Arithmetic and Mensuration.
2. *Science.*—Same as for Branches I and II.
3. *Drawing.*—Same as for Branches I and II, except building drawing.
4. *Applied Mechanics.*—Strength of materials and designing of simple machine parts.
5. *Elements of Mechanism*—Same as for Branches I and II.
6. *Materials of construction.*—Brass, iron and steel. Paints and varnishes.
7. *Steam oil and petrol engines.*—Same as for Branches I and II excepting gas producers and suction gas plant.
8. *Motor cars.*—Different types, their construction and management.

Branch V, *i.e.*, Carpentry including cabinet-making :—

1. *Mathematics.*—Arithmetic and Mensuration.
2. *Science.*—Same as for Branches I and II.
3. *Drawing.*—Geometrical, free-hand, elementary building drawing, isometric projection.
4. *Estimating.*—Estimating of simple structures and different classes of furniture.
5. *Applied Mechanics.*—Strength of materials and designing of simple structures.
6. *Elements of Mechanism.*—Same as for Branches I and II.
7. *Materials of construction.*—Timber, brass, iron and steel ; paints and varnishes.
8. *Carpentry.*—Joints, scaffs, trussed and built up beams, roofs, floors, partitions and stair-cases.
9. Cabinet-making.

(4) Memorandum on the establishment of Commercial Classes in Bangalore received from the Inspector-General of Education with his letter No. 432, dated 24th February 1913

The need for Commercial Education in India is gradually growing in intensity, at any rate, on the part of the thinking portion of the population. Till a few years ago, before the development of the existing world-wide facilities for travelling and transport, commercial transactions were simple and needed no special training. Dr. Buchanan who visited Mysore in the year 1800, wrote that the maximum distance to which paddy was carried was only 60 miles. Similarly several other articles from Mysore were not carried beyond the present limits of the Madras and the Bombay Presidencies. Now-a-days, however, the oil seeds of Arsikere and other parts are easily carried to the ports of France, and the cocoanuts of Tiptur and other taluks find an easy sale in the markets even at the foot of the Himalayas Hitherto, the talk has more or less been on the development of industries, but it must be acknowledged that unless commercial knowledge marches hand in hand with the growth of rawmaterial and the increase of manufactured articles, there can be no uniform or assured progress for the country. How little commercial knowledge has as yet attracted attention is clear from the fact that in the Quinquennial Report on Education for 1902-7, the total number of Commercial Institutions for all India is mentioned as being only 12, of which 9 were maintained by Government, 2 were aided institutions, 7 were unaided, and 1 was

Local Fund and Sanitary, (Education), dated 1st May 1913.

upported by a Municipality. Even at the present time there are, as stated in the recent esolution of the Government of India on their Educational Policy, only 26 institutions for ommercial Education, 3 of which are under the management of Government. The tandard attained, it is also stated, in a majority of these institutions is not high and the nstruction given in them prepares for clerical duties in Government and business offices, ather than for conduct of business itself. In the Mysore State, in the year 1911-12, there ere only 3 Commercial schools of which 2 received aid from Government, and 1 was naided. Of these 3 institutions, in the Aided Institution maintained by Mr. Lakshminarayya at Bangalore, were taught the subjects of Book-keeping and Accountancy, Correspondence and Office Routine, Short-hand, Banking and Currency, Type-writing, Commercial History and Geography, Commercial Law and Esperanto. This school prepares pupils for he Public Examinations held by the Madras Government, London Chamber of Commerce, Birmingham Union of Institutions, London, National Union of Teachers, Institute of Commerce, etc. The Aided Hardwicke Commercial School at Mysore teaches Type-writing, Short-hand, and Book-keeping, and prepares pupils for the Madras Government Technical Examinations and the Examinations held by the National Union of Teachers, London. The Unaided Commercial School known as the Friends' Union Commercial Institute was started only last year in Siddicutta, Bangalore. This institution also teaches Short-hand, Type-writing and Book-keeping.

2. Considering, however, the experimental stage in which Commercial Education is still at present in the Western Countries of the world, the smallness of Commercial Institutions in India need not be felt as disappointing. In the United States of America, the real history of Commercial Education is said to have begun only from the year 1892. In Germany the advance became marked since the latter part of the last century, especially since 1887. England is even now far behind in Commercial Education. France is said to have a few old and well established schools of Commerce, though as yet the system is not very extensive. In Japan the first Commercial School was established in 1875, by a body of private individuals, which has now developed into the Tokio Higher Commercial School or College whose graduates, it is stated, occupy at the present day the foremost positions in the commercial world of Japan. The following extract taken from a recent publication puts the whole case for Commercial Education in a nut-shell.

"Commercial Education is now generally understood to include all education which prepares specifically for business careers. It is no longer limited to the narrowly technical or practical training which fits the students to perform the various operations that are necessary in the exchange of commodities, but it is generally taken to exclude the training that prepares for the work of production. With the practical training there is usually associated a certain amount of the liberal, or cultural, element of education..... .... Recognition of this branch of education has been somewhat tardy, and can hardly be said to be complete even now. One reason for this is obviously the fact that a century ago the transaction of business was a simple matter compared with the complexity of our present organization. Commercial life itself was not very highly developed, and was, indeed, considered too humble a form of activity for the exercise of great talents, or for any special preparation. All this has been changed now. Commerce has so extended its sphere, and has so developed its organism that it has become the field for the greatest intellects. Thorough preparation for it has become recognised as necessary, though there are still great divergences of opinion as to the form this preparation should take."

3. In the light of what is contained in the above para, neither explanation nor apology is needed for creating facilities at once for Commercial Education in Mysore, especially when we have a well thought-out scheme ready to hand, contained in the Report on Technical Education in Mysore prepared by the Committee appointed in Government Order No. 3585-9 —Edn. 462-09-2, dated 28th October 1910. In this report, it is proposed to make provision for higher Commercial training in the College of Technology to be established in Bangalore, and for Secondary Commercial Education and Lower Commercial Education in other institutions. As regards Higher Commercial Education it is doubtful if at once facilities should be created. Such facilities may be needed a year or two hence when the College of Technology becomes fully established and when the Elementary and Secondary Commercial Schools or classes develop. In the meanwhile the Aided Commercial High School maintained by Mr. Lakshminaranayya may be utilized for the training of teachers as far as possible. A syllabus, however, for Higher Commercial courses has been prepared by Mr. V. Subramanya Iyer in consultation with Mr. Lakshminaranayya and may be readily adopted when necessary.

4. For Elementary and Secondary Commercial Education, however, classes may at once be started in the building of the Government High School, Bangalore, under the supervision of a Committee consisting of the Inspector-General of Education as President, Mr. V. Subramanya Iyer, Head Master of the High School as Secretary, and Messrs. J. S. Chakravarti

V. Rangaswami Iyengar, D. Venkataramaiya, C. Krishna Rao, B. K. Garudachar and Harianna as members.

Subjects to be taught.—For the Elementary course, the subjects to be taught will be Correspondence and Office Routine, Book-keeping, Type-writing, Commercial Arithmetic, Commercial Geography, Hand-writing and Penmanship, Commercial Morality, and one Language—English, Tamil, Telugu, Mahratti or Urdu, the standard in language being limited to enable the student to acquire sufficient knowledge for simple composition and conversation. For the Secondary course, in addition to the subjects mentioned for the Elementary course, there should be included Estimates of Costs, Short-hand, Precis-writing and Indexing, Banking and Currency, Political Economy, Commercial Law, Office Practice, and Knowledge of wares. Draft syllabuses for each of these courses drawn up by Mr. V Subramanya Iyer in consultation with Mr Lakshminaranayya are also ready for adoption.

Pupils for admission.—The pupils seeking admission into these Commercial classes may be taken to be regular students studying for the Elementary course, (2) regular students studying for the Secondary course and (3) students of the High School Forms taking up one of the Commercial subjects under the School Final Scheme It is desirable also to maintain an Elementary Commercial class imparting instruction in the Kannada Language for the benefit of petty merchants and small traders, and those associated with them in business. In the case of the regular students for the Elementary course, the minimum qualification for admission should generally be the Lower Secondary Examination and in the case of those seeking the Secondary course, the completion of the course of the IV Form of a High School.

The Elementary course may extend over one year, and the Secondary course over a second year. The number of hours of work for each course may be between 25 and 30 per week, and the classes may be held partly in the mornings and partly in the evenings to afford facilities to such as are students of Day Schools or are employed in offices. For the enlightenment of those employed in the Revenue and other Departments of the State, and others who may wish to join, special courses of instruction for three or four hours a week in the evenings may be provided in Commercial Subjects, in Economic Science, Statistics, Public Administration, and such other subjects as may be added by the Board with the approval of Government. For the present the holidays and vacations may be the same as those for the High Schools.

Diploma.—At the end of each course, a Diploma Certificate may be given to such of the students as are considered qualified by the Board of Management appointed by Government. It should be left to the students themselves to appear or not for any of the Examinations such as are held by the London Chamber of Commerce and other public bodies. These examinations, it is understood, are conducted by these Public bodies each for its own aims and in its own way, with the result that schools training pupils for such Public Examinations may devote themselves too much to cramming and that development may become slow. In organizing the course of instruction, it is also necessary to remember that the aim should not mainly be to concentrate attention only on such subjects as may tend to the immediate profit of those undergoing training, but also to raise the general level of commercial knowledge and morality among the people, with readiness to discard old methods where they are proved unsuitable, and to adopt modern methods in their stead.

Fees.—The fees for regular students of Elementary course may be annas 8 a month, and for the Secondary course Re. 1 a month. It should, however, be open to the Board of Management to grant exemptions in the case of deserving students for the next two years. In the case of students seeking instruction in the Vernacular, the Board may levy a uniform fee, the rate not exceeding 4 annas a month for the next two years. In the case of those attending special courses, a uniform fee of Rs. 10 per annum may be levied. The students of High School Forms who optionally study one of the subjects mentioned in Group C. of the School Final Course, may be exempted from the payment of any extra fee as they pay for their general education in the High School.

Cost.—In a sphere where sufficient data cannot be gathered to make fairly accurate calculations, the amounts given under cost may be taken to be very rough estimates Towards the initial charges a sum of Rs. 6,000 will be needed, distributed as below :—

	Rs.
Typewriters	3,000
Books	700
Files and other apparatus	1,000
Furniture and other equipments	1,300
Total ...	6,000

Local Fund and Sanitary (Education), dated 1st May 1913.

Recurring charges—	Per annum Rs.
3 teachers for Commercial Subjects, 1 on Rs. 75, 1 on Rs. 60, and 1 on Rs. 40	2,100
5 language teachers, 1 English (Rs. 30), 4 Vernacular (Rs. 25) each	1,560
1 clerk on Rs. 30, 1 attender on Rs. 12, and 3 peons on Rs. 9, 8 and 7, respectively	792
Contingencies, such as light for Night classes, ribbon, paper, etc. ...	500
Allowance to the Secretary	360
Honoraria for special courses of instruction	1,000
Towards the pay of two substitutes to be employed for two graduate teachers in Government High Schools to be deputed for Commercial instruction, at the rate of Rs. 50 a month each and towards their fees at Rs. 200 for the two teachers together ..	1,400
Total ...	7,712

The recurring cost provided in the Report on Technical Education in Mysore is about Rs. 4,800 per annum for the Elementary and the Secondary courses together. The whole of the establishment is to be regarded as tentative for two years.

6. In conclusion, the aim should be to gradually establish a coherent system of Commercial Education in the State for Elementary, Secondary and Advanced courses, and to enlarge the vision of those engaged in commerce to regard it as not merely an internal or individual matter, but as a matter of world-wide scope and concern for the society.

---

(5) Memorandum drawn up by Mr. V. Rangaswami Iyengar, Superintending Engineer, Southern Circle, on the reorganization of the Engineering and Industrial Schools at Mysore and the working of the Chamarajendra Technical Institute at Mysore, received from the Inspector-General of Education with his letter dated 20th March 1913

CHAMARAJENDRA TECHNICAL INSTITUTE, MYSORE

Preliminary Report on the proposed Chamarajendra Technical Institute in Mysore

The Committee appointed by Government in their Order No. 3585-9—Edn. 462-09-2, dated 28th October 1910, has formulated a scheme for the proper working of the Chamarajendra Technical Institute at Mysore. The details of that scheme are to be found in pages 8, 9 and 10 of the report. According to that scheme, it was proposed to amalgamate the existing Engineering and Industrial Schools in the City of Mysore and locate the combined institution in the new building under progress.

2. The Committee recommended that the Institute should consist of three sections :—

(1) Elementary Engineering including Architecture.

(2) Technical.

(3) Industries and Crafts.

3. The Committee also recommended in para 46 of the report that attached to the Institute there should be a Workshop managed on commercial lines so as to afford training to the students under factory conditions.

4. *Present proposals.*—For the present it is proposed to start at once with the Engineering and Industries and Crafts Sections.

5. As there is already an Art Section where students are taught painting and drawing as a fine art, it is proposed to continue that section as well.

6. A class for commercial subjects such as Book-keeping, Business Correspondence, Short-hand, Type-writing and Banking will also be popular it one be started.

7. The Chamarajendra Technical Institute may thus consist of the following sections :—

(1) Engineering Section.

(2) Industrial Section.

(3) Fine Arts Section.

(4) Commercial Class.

(5) Workshop.

8. It is expected that the building will be ready by the end of June ; but arrangements have been made to get one-half of the building ready earlier, so that if orders are passed, it will be possible to shift the Industrial School to the new building by about the end of May and the Engineering School in June.

9. The management of the school will be vested in a Committee, composed of the following members:—

President.

Inspector-General of Education.

Members.

(1) Superintending Engineer, S. Circle.

(2) Executive Engineer, Mysore Division.

(3) Mr. F. W. Quinton Anderson, B.A.

(4)

10. It will be necessary to have a Secretary for the Committee who should be given a clerk to attend to the correspondence, etc.

The Committee should meet regularly once a month and dispose of all questions that may arise from time to time.

It will be the business of the Committee to carefully scrutinize the expenditure of the different sections, revise and remodel the curriculum from time to time as experience may dictate and make the necessary arrangements for conducting the examinations in various sections and grant diplomas. In short the Committee will perform all the functions necessary for the well being of the Institution and its improvement day after day.

11. It will be a great advantage if a Hostel can be attached to the Institute, but the Government may not, in all probability, feel inclined to incur any additional expenditure at this stage; nevertheless request is made with a hope that when funds permit, Government may be pleased to sanction its construction.

Engineering Section.

With effect from the 1st July 1913, it is proposed to shift the school to the new Chamarajendra Technical Institute, where it will be run as one of the sections of that Institution.

The Workshop of the Industrial Section will be utilized for imparting a certain amount of practical training to the students in Mechanics.

The constitution of the school is defined in Government Notification No. D.—3 of 7th July 1903. It occurred to me that the rules, etc., therein contained may, with advantage, be modified to a certain extent and with that view Mr. B. C. Sreenivas Iyengar, Head Master of the Engineering School, was asked to submit a memo on the subject. A copy of that memo is herewith submitted with my marginal remarks.

The following are the changes contemplated in the constitution and working of the school:—

(1) That minor subordinate classes be abolished.

(2) That the fee to be paid by the students to be reduced to Rs. 2 per month, both for the first and the second year.

(3) That Government supply drawing boards and T-squares and Set-squares, the necessary drawing instruments and books being procured by the students themselves.

(4) That drawing instruments and books be purchased and supplied to the poorer students by the Government and their value recovered in small instalments.

(5) That X'mas vacation be reduced to ten days.

(6) That students need not be compelled to appear for the Madras Technical Examinations.

I would also recommend that during the time the students undergo practical training, which should be made compulsory, a subsistence allowance of Rs. 15 may be paid to each student, to enable him to meet the extra expense incidental to this course. Otherwise there is no doubt that students will try to shirk the practical course which is quite as important if not more than the school course.

If the above views are accepted by the Government and the Committee for the management of the Chamarajendra Technical Institute be appointed, the whole subject of the rules and curricula of the school will be revised wherever necessary and a comprehensive report submitted to Government for approval.

I understand that certain proposals have already been made by another Committee, but it may be advantageous to see what the new Committee have got to say before Government finally passes orders on those recommendations.

Local Fund and Sanitary (Education), dated 1st May 1913.

Industries and Crafts Section.

Instructions will be imparted in the following :—

(1) Carpentry and cabinet-making.
(2) Smithy and fitters' work.
(3) Metal work (brass, copper and bell-metal).
(4) Rattan and mat-making.
(5) Wood-carving.
(6) In-laying.
(7) Engraving.

2. The training imparted to the students will be essentially of a practical nature.

3. A certain amount of general elementary education in English, Vernacular and Arithmetic will also be imparted as it will be found of much use to the students in their future career.

4. The course of training in each of the above branches will be one of three years followed by a further course of two years in the Workshops where the students will be employed on regular work and paid according to their skill and efficiency.

5. The number of students that will be admitted yearly to the different sections will be as follows making in all a total of 65 per year.

(1) Carpentry and cabinet-making	...	20
(2) Blacksmithy and fitter's work	...	10
(3) Metal work ...	...	10
(4) Rattan work ...	...	10
(5) Wood-carving ...	..	5
(6) In-laying ...	...	5
(7) Engraving ...	...	5
		65

6. Admissions to this section will be made in the first week of July of every year.

7. Boys seeking admission shall ordinarily be above thirteen and below sixteen years of age. They should also have received a certain amount of general education, say, corresponding to the second standard.

8. No fees shall be levied ; but students should provide themselves with the necessary books and drawing instruments.

9. Workshop tools, drawing boards, T-squares and Set-squares will be provided for by the Government.

10. The hours of attendance will be from 8 to 12 A.M. and from 2 to 5 P.M. From the second Monday in April to second Monday in May, the school will be held only from 8 to 12 A.M.

11. Out of the total number of hours of daily work, two hours will be spent daily for drawing and general education.

12. The session or year commences on first Monday in July and will consist of two terms. The first term commences on the first Monday in July and ends on the 24th December. The second term commences on the 5th of January and ends on the 30th of June.

13. *Examinations.*—A Board of Examiners will be constituted by the Government for the purpose of holding examinations and granting of diplomas.

14. An examination will be held yearly at which the students who have completed their three years' course and attended not less than 75 per cent of the number of working days will be allowed to sit. The examination will be both oral and practical. Such of the students as satisfy the Board of Examiners will be given a certificate, which certificate will be exchanged for a diploma after the completion of the two years' course in the Workshop.

15. Any student who may fail in the examination at the end of the third year will be allowed to continue for another year and appear a second time for the examination. But if he fails to pass even then he will not be allowed to continue in the school, but may be allowed to come up for the examination at any future time as a private pupil. He will be given only a certificate and will not be eligible for training in the Workshop.

16. *Scholarships.*—A certain number of scholarships will be awarded every year to deserving students ranging in value as below :—

		Rs.
1st year	...	2 per month.
2nd year	...	4 per month.
3rd year	...	6 per month.

Proceedings of the Government of His Highness the Maharaja of Mysore,

17. Every stipendiary pupil of the Institution shall execute a bond prescribed by the Government of Mysore to bind himself to attend the school continuously for a period of five years including the two years course in the Workshop.

18. Boys seeking admission will not be given any scholarship for the first three months, but at the end of this period, they will be given the scholarship of that standard if they are found regular in attendance and hardworking.

19. Pupils will be entitled to fifteen days' casual leave in the year, but not more than four days in any particular month. They will also be entitled to sick leave without forfeiting their stipends for a period of not more than one month in the year if they produce a medical certificate.

20. A fine of half anna calculated on every rupee of stipends for every day of absence over and above the 15 days of casual leave shall be deducted from the stipends. Late attendance will be treated as absence without leave for a full day.

21. Every stipendiary pupil shall, for the first three years after he leaves the school furnish the Superintendent every half year in January and in July with information regarding his occupation and the monthly wages he earns. The Superintendent shall enter the information in the history of the pupils of the Institution.

Initial outlay.—An initial grant of Rs. 10,000 for the purchase of machinery, models, furniture and materials for the school will be necessary:—

		Maximum.	*Minimum.*
Expenditure—			
Staff—One Superintendent	...	350 per month	
One Assistant	...	125 do

Grand Total	...	...	32,160
or say in round figures	...	...	32,200

Local Fund and Sanitary (Education), dated 1st May 1913.

Arts Section.

Instructions will be imparted in the following branches:—

(1) Portrait and painting, etc.

(2) Decorative Art (screen painting, book illustrating etc).

(3) Modelling.

2. The number of students that will be admitted yearly will be restricted to fifteen, he strength of the section being limited to fifty.

3. The course in this section will extend from three to five years.

4. Rules Nos. 3, 6, 7, 8, 9, 10, 11, 12, 13, 16, 17, 18, 19 and 20 of the Art Industries nd Crafts Section shall apply to this section also.

5. Pupils of other schools and persons desiring to learn any of the above branches vill be given instructions in the morning from 7-30 to 10 A.M. every day on payment of he following fees:—

(1) Pupils of other schools—Four annas a month.

(2) Other persons—One rupee a month. Lady students may also be admitted on payment of the usual fees.

6. The control of this section will be under the Superintendent of Industries and Crafts Section.

The recurring expenditure will be as under:—

1. Staff

	Rs.
Three Drawing Masters on (Rs. 80, Rs. 50, Rs. 40)	170
One Instructor for modelling	40
Total ...	210

2. Establishment.

One gardener	8
Contingencies	2
Total ...	10
Total of Staff and Establishment ...	220
Drawing papers, color, etc.	20

3. Scholarships.

Stipends at Rs. 20—2, 20—4 and 10—6 per month	180
Total expenditure per month ...	420
Total expenditure per year ...	5,040
Travelling allowances per year	160
Prizes, etc., allowances per year	100
Total ...	5,300

Commercial Class.

A class for this may be established on the lines proposed for a similar class in Bangare, a report regarding which has already been submitted by Mr. Shama Rao, Inspector-eneral of Education.

It was therein estimated that the non-recurring charge will be about Rs. 6,000. The curring charges were estimated at Rs. 7,712. But I think that it can be reduced to about s. 3,000 as follows in the case of Mysore.

Recurring Charges.

	Per annum Rs.
3 teachers for commercial subjects 1 on Rs. 75, 1 on Rs. 60 and 1 on Rs. 40	2,100
One clerk	360
Two peons at Rs. 7 each	168
Contingencies	372
Total ...	3,000

Proceedings of the Government of His Highness the Maharaja of Mysore,

Workshop Section

As observed by the Industrial Schools Committee in their report in paras 45 and 46, a well equipped Workshop with up-to-date appliances must necessarily be attached to the school and it must be managed on commercial lines. For the purpose of control and supervision, it will be under the Superintendent of Industrial School, but the accounts will be kept separate, so that it may be possible to judge how far the workshop is commercially successful. It is proposed that the workshop be worked as a separate branch of the Industrial School on the following lines:—

1. With effect from 1st July 1913, the Workshop Section of the Industrial School will form a separate department of the school under the general supervision and control of the Committee. The direct management will continue in the hands of the Superintendent.

2. On July 1st, a stock will be taken of raw materials and manufactured articles on hand and the same will be taken over and brought in the books of workshop after a careful and reasonable valuation.

3. A sum of Rs. 13,000 is to be placed at the disposal of the Committee at the Mysore District Treasury as a standing advance, which will form the working capital.

	Rs.
Timber	5,000
Metals	2,000
Labour	2,000
Tools and plant	2,500
Miscellaneous articles	1,500
Total ...	13,000

4. As recommended by the Industrial Committee in para 408, page 11, a sum of Rs. 25,000 will be required for equipment. As Rs. 10,000 has already been allotted for the school, the balance of Rs. 15,000 may be allotted for the equipment of the Workshop Section.

5. All sums received at the sale of articles will be paid into the Treasury and credited to the accounts of the Committee.

6. The Committee will be responsible for the pay of the workmen and all other working expenses including such establishment as the Committee consider necessary.

7. The sum paid to the students as wages during the last two years in the workshop will also be included as wages in workshop expenditure.

8. The whole of the staff will be on temporary footing and they will be paid by the day.

9. The accounts will be audited once a year by the Examiner and the value of stock and the materials at hand being checked by a senior Public Works Department Officer.

No. 8834-40—Edn. 462-09-24, dated Bangalore, the 1st May 1913.

Order thereon.—The question of improving Technical and Industrial Education in the State has been engaging the attention of Government for several years past, and, in October 1910, a Special Committee was appointed to examine the whole subject and submit a report on the measures deemed necessary for the purpose. The exhaustive report prepared by that Committee has received careful scrutiny at the hands of the Education Committee of the Mysore Economic Conference. The scheme embodies a comprehensive programme of elementary and advanced Technical, Industrial and Commercial Education and contemplates a capital expenditure of about 5 lakhs of rupees for buildings and equipment and a recurring expenditure of 3 lakhs per annum in addition to the present expenditure of about half a lakh on Industrial Schools.

2. The Education Committee recommends that the scheme may be taken as a basis for practical action for the next five years and that the full scheme may be brought into operation gradually as circumstances permit. The Government have considered the report and are pleased to express their general approval of the lines.

Local Fund and Sanitary (Education), dated 1st May 1913.

laid down therein for the development of Industrial, Technical and Commercial Education in the State. The report will be published for general information and Government will be glad if the Inspector-General of Education makes arrangements to have the portions of the report relating to manual training and model schools in towns and villages translated into Kannada and widely published. They consider that as suggested by the Education Committee, the scheme should be brought into operation gradually and that in the immediate future some parts of the scheme should be put into operation at a moderate outlay and in a tentative manner, so as to find out how far the advanced instruction will be taken advantage of before giving effect to the more costly proposals.

3. In this view, Government have examined the detailed proposals received from the Inspector-General of Education regarding the establishment of a Mechanical Engineering School at Bangalore, the opening of a Commercial School or Classes in Bangalore and the organization of the Chamarajendra Technical Institute in Mysore by the amalgamation of the existing Engineering and Industrial Schools in that City.

4. The proposals of the Inspector-General of Education meet with the general approval of Government and their main lines as approved by Government are briefly set forth in the following paragraphs:—

I. THE CHAMARAJENDRA TECHNICAL INSTITUTE, MYSORE.

(*a*) The Industrial School and the Engineering School at Mysore will be combined to form the nucleus of the Institute, which will be located in the new building now nearing completion. For the present the Institute will consist of the following sections:—

I. Engineering Section.
II. Industries and Crafts Section.
III. Fine Arts Section.
IV. Commercial School Section.
V. Workshop.

(*b*) The Institute will be under the management of a Committee consisting of the following gentlemen:—

The Inspector-General of Education, President.
The Superintending Engineer, Southern Circle.
The President, Mysore City Municipality.
The Superintendent, Electrical Power Supply, Mysore
Mr. M. Venkatakrishnayya, Head Master, Marimallappa's High School.
The Head Master, Engineering Section.
The Head Master, Industrial Section.
Mr. S. Srinivasa Iyer, Assistant Engineer, Palace Division, will be Secretary to the Committee.

(*c*) The cost of the institute as approximately estimated will be as follows:—

	Recurring	Non-recurring
(i) Engineering Section (net cost) ...	11,000	...
(ii) Industries and Crafts Section—		
Initial outlay for machinery, models, furniture and materials	...	10,000
Staff and menials	12,816	...
Scholarships	12,000	...
Materials	4,200	...
Tools	1,200	...
Contingencies	1,334	..
Prizes	200	...
Travelling allowance	160	...
Library and periodicals	250	...
Total ...	32,160 or in round figures 32,200	10,000

	Recurring	Non-recurring
(iii) Arts Section—		
Staff, establishment, scholarships and contingencies	5,040	...
Travelling allowance	160	...
Prizes, etc	100	...
	5,300	...
(iv) Commercial School—		
Equipment	...	6,000
Staff and contingencies	3,000	...
(v) Workshop—		
Equipment	...	15,000
Working expenses	...	13,000
(vi) Allowance to Secretary to the Committee ...	600	..

The Workshop will be managed on commercial lines and separate accounts will be kept for this section. A lump sum grant of Rs. 13,000 will be placed at the disposal of the Committee for working expenses as laid down in the scheme.

The total cost of the institute will be, non-recurring Rs. 31,000 (excluding the advance of Rs. 13,000 for the Workshop) and recurring Rs. 52,100 or an increase of nearly Rs. 20,000 over the present net cost of the existing Engineering and Industrial Schools.

The expenditure under scholarships should for the present be limited to Rs. 500 per mensem. The Inspector-General of Education should in consultation with the Committee fix the number of scholarships, and no scholarships in excess of this amount should be granted without the express sanction of Government.

(*d*) In the sections other than the Engineering Section, facilities should be provided for persons already engaged in a profession and other casual students taking one or more of the courses in which they may be interested, and for doing practical work.

II. Commercial School, Bangalore.

(*a*) The school will provide an Elementary course in English and Kannada extending over one year and a secondary course in English extending over two years. In addition to these regular classes, arrangements will be made for courses of lectures of an advanced character to be delivered by specialists dealing with commercial subjects, economic science, statistics, public administration, banking, joint-stock enterprise including co-operation and other allied subjects. Provision should be made to give courses of lessons or lectures to persons already engaged in professional work in the subjects in which they may be interested.

(*b*) The school will be located in the Government High School building, where one room will be placed at the disposal of the school and more rooms will be made available out of the ordinary working hours of the High School.

(*c*) The management of the school will be entrusted to a Committee consisting of the Inspector-General of Education as President, Mr. J. S. Chakravarti, Comptroller, Mr. C. H. Yates, Superintendent, Government Press, Mr. B. K. Garudachar, merchant, the Superintendent of the Mechanical Engineering School and the Head Master of the Government High School as members, the Head Master of the High School also acting as Secretary to the Committee.

(*d*) The cost of the school will be approximately as under:—

	Rs.
1. Non-recurring—Equipment	6,000
2. Recurring—Three teachers for commercial subjects ...	2,100
Five language teachers	1,560
Clerical and menial establishments ...	792
Contingencies	500
Allowance to Secretary	360
Honoraria for special courses of lectures...	4,000
Provision for training teachers ...	1,400
Total ...	10,712

or Rs. 11,000 in round figures.

Local Fund and Sanitary (Education), dated 1st May 1913.

III. Mechanical Engineering School, Bangalore.

(*a*) The following subjects will be taught in the school for the present:—

(1) Management and care of steam and oil-engines.
(2) Management, care and erection of machinery and working of mills.
(3) Electrical work including operating.
(4) Care and driving of motor cars, and
(5) Carpentry including cabinet work.

(*b*) The initial and recurring charges are estimated as under:—

	Rs.
Buildings and equipment (non-recurring)	24,049
Staff including clerical and menial establishments, working expenses, contingencies and scholarships	19,620

(Limited to Rs. 15,780 in the 1st year and to Rs. 17,700 in the 2nd year).

The scholarships proposed should be granted preferably to students from the districts.

(*c*) A new building will be erected for the school on the triangular piece of ground between the Government High School and the Revenue Survey Offices, but pending its construction the school will be held in the Sheshadri Memorial Hall.

(*d*) The curriculum of studies, the standard of educational qualification and the limit of age for admission proposed by the Inspector-General are approved. Government would, however, lay stress on the need for providing facilities to persons already engaged in professional or other work for taking a course of practical work in particular subjects in which they may be interested.

(*e*) Government are pleased to appoint Mr. S. Venkata Subba Setti, Assistant Engineer, as Superintendent of the School for a period of three years.

(*f*) The school will be placed under the management of a Committee of the following gentlemen:—

The Inspector-General of Education, President.
Mr. C. F. Beames, Chief Electrical Engineer.
„ V. Rangaswami Iyengar, Offg. Superintending Engineer.
„ K. Sreenivasa Iyengar, Offg. Executive Engineer.
„ M. G. Rangaiya, Assistant Engineer.
„ Ramachandra Rao Scindia, Merchant.
„ S. Venkata Subba Setti, Superintendent of the School, Secretary.

5. Government having signified their assent to the general lines of the working of the several schools as set forth in the Committee's report on technical education and the detailed memoranda submitted by the Inspector-General of Education, it will be left to the Inspector-General of Education in consultation with the Committee of each school to scrutinize the details and make such minor changes and frame subsidiary rules and instructions as may be necessary to secure the efficient working of each institution. The Inspector-General of Education should in particular see that the cost of the several institutions does not exceed the limits indicated in this order.

6. The members of the several Committees appointed above will hold office for a year and will be eligible for re-nomination at the end of that period. The Committees will have, subject to the general control of the Inspector-General of Education, full power to deal with all questions of internal management of the institutions concerned and will meet as frequently as necessary for disposing of their work. Members who absent themselves from three consecutive meetings of the Committee will be held as having vacated their seat on the Committee.

7. It will be the duty of each Committee to send to the Inspector-General of Education and for that officer to forward to Government, half-yearly reports of the work and progress of each school. At the close of each year Government will

appoint a separate Committee to inspect these institutions and examine how far each of them has been working efficiently and fulfilling the objects for which it was started.

8. With the exception of men already in the permanent service of Government, the staff employed in all these schools will be placed on a temporary footing.

9. The cost of maintaining the Mysore Industrial School and the Engineering School is now charged to Local Funds General. The present rate of expenditure is Rs. 32,000 per annum. All expenditure in excess of this amount involved in bringing the three institutions sanctioned in this order into existence will be borne by State Funds.

10. The question of granting foreign scholarships and the deputation of officers to foreign countries for the advanced study of industrial and commercial subjects are reserved for separate consideration.

11. The Inspector-General of Education is requested to submit a detailed report on the working of the existing Industrial Schools both Government and aided with suggestions and proposals for enhancing their usefulness.

12. Government will welcome proposals from local public bodies or committees for the starting of schools in the districts on a grant-in-aid basis on the lines laid down in paras 14, 15, 17, 70, 101, 102 and 113 of the report of the Committee. The Inspector-General of Education will on receipt of such proposals make arrangements to furnish estimates of cost and afford such other reasonable facilities as may be necessary to start the schools and maintain them in an efficient condition.

13. Government greatly appreciate the promptitude with which the Inspector-General of Education and Mr. V. Rangaswami Iyengar, Superintending Engineer, developed and submitted these detailed schemes for the orders of Government.

C. S. BALASUNDARAM IYER,
Secy. to Govt., Depts. of Edn., Agri. & Industries & Commerce.

To—The Inspector-General of Education in Mysore.
The Chief Engineer in Mysore.
The Secretary, Economic Conference.
The Director of Industries and Commerce.
The President, Mysore City Municipality.
The Comptroller, Mysore Government.
The Chief Electrical Engineer in Mysore.
The Heads of Departments and Deputy Commissioners.

Exd.—C. B.

APPENDIX.

SCHEME ON TECHNICAL EDUCATION IN MYSORE.

I. Preliminary.

The Government Order of 28th October 1910, reproduced in the Appendix, appointed this Committee for the purpose of formulating a definite policy and plan of work for developing industrial education within the State. We were asked to consider the subject in all its aspects and submit a full and detailed report laying down a comprehensive programme with defined courses of training.

2. The first meeting of the Committee was held on 25th November 1910, at which, at the request of the Committee, Mr. V. Rangaswamy Iyengar undertook the duties of Secretary to the Committee. Work was interrupted for a time by the departure of Mr. Weir on leave from 19th April 1911. On his return, Mr. Weir attended a meeting, on 27th June 1911, by which date the Committee had formulated most of the recommendations embodied in the report.

The sudden death of Mr. Weir on 31st July 1911 deprived us of the services of a most valued colleague. Before proceeding with the report, we desire to place on record our high appreciation of the active interest Mr. Weir evinced in our work and our profound regret at his premature death.

3. We have found some difficulty in devising a programme, which, while satisfying the requirements of the Government Order as regards comprehensiveness, would at the same time be well within the limited resources of the State. At an early stage of our deliberations, we came to the conclusion that an annual additional outlay of Rs. 3 lakhs would be a reasonable expenditure for the development of industrial education in the present financial circumstances of the State.

As complete institutions cannot at once be established for every form of technical or commercial education, we have thought it necessary to content ourselves with recommending the establishment of two large institutions, one in Bangalore and the other in Mysore. Even these will not have all the equipment necessary according to western standards for a long time to come. But we believe that, by laying down a syllabus and appointing a few competent instructors, we would be making at least a commencement in providing specialised training for boys anxious to prepare themselves for industrial occupations.

4. In the years 1874-78, there was an Engineering School in Bangalore, in which higher education in engineering and forestry was given, and that education sufficed to train officers, one of whom officiated as Chief Engineer of this State a little while ago and another has been occupying the office of the Conservator of Forests in Mysore. And yet the College of the Seventies employed only one European Executive Engineer and one Indian Lecturer. Conditions are more favourable now and more money can be spent on technical education. If in some of the subjects, the training given locally is found to be inadequate, it may be supplemented by a more extended course in one or more of the leading institutions of Western Countries.

II. Existing Industrial Schools.

5. There are at present seven Government Industrial Schools in the State. The one at Mysore was started in March 1892. The other schools were started under Government Order No. 14668-77—Edn. F. 4-96, dated the 7th April 1903, which says: "The object in view should be not the imparting of any ideal, theoretical or scientific course of instruction but the teaching of such industries and trades on improved methods as are adapted to supply the present wants of the people, such as carpentry, weaving, silk-rearing, iron work, rattan work, lacquer work, etc., and to turn out a number of pupils fully equipped with the means of earning their livelihood."

The weaving schools were expected to train young boys in weaving various kinds and patterns of cloth on fly-shuttle looms, so that the weavers of the locality concerned might introduce improvements in their looms and be enabled to increase their profits by the resulting saving of time and labour.

6. The Mysore School has a full-time Superintendent helped by an Assistant and maistries. The other schools are looked after by persons who hold appointments in the local High or Anglo-Vernacular Schools. These men are not able to give sufficient time to their additional duties and the schools are virtually left in charge of maistries. In spite of these defects, the weaving sections of these new schools have done good work by demonstrating to the public the advantages of using fly-shuttle looms.

Cloths of finer counts unknown before are now produced. In Melkote and Hole-Narsipur, silk and cotton yarn are dyed locally to a certain extent. The school at Channapatna is doing very good work. The Mysore school has developed in all directions.

7. Besides the above, there are eleven aided and three private schools. Carpentry is taught in eighteen schools, blacksmith's work in four, rope-making in two, and each of the following industries in one or more institutions:—

(1) Pottery and tile-making.
(2) Fitter's work.
(3) Masonry.
(4) Agriculture.
(5) Lacquer work.
(6) Musical wire-making.
(7) Nature imitation art in wood.
(8) Embroidery.
(9) Lace-making.
(10) Knitting.
(11) Brass work.
(12) Drawing in all branches.

Of the aided institutions, the schools at Kolar and Tumkur have done excellent work.

8. The expenditure incurred on Government institutions excluding materials used in workshop mounted in 1910-11 to Rs. 32,262. The grant paid in aid of industrial schools amounted to Rs. 8,71(Thus the total annual expenditure according to the accounts for 1910-11. amounted to Rs. 40,97 *vide* Appendix II).

9. Notwithstanding the good work they are doing, we consider that the Government Schoo are not maintained in a proper state of efficiency and need to be reorganised.

III. General Outline of Institutions Proposed and their Object.

10. It is suggested that facilities should be provided for giving instruction in all the three grade of technical education, higher, secondary and primary. In the elementary courses, instructior should be given to the artisan classes and to people actually engaged in business and trades, such as-

Building,	Manufacture of carpets,
Carpentry,	Mats,
Furniture-making,	Cooking utensils (brass, copper and bell-metal
Weaving,	Artware,
Shoe and boot-making,	Pottery,
Tailoring,	Printing, etc.

The secondary technical education should have for its object the training of mechanics, assistar foremen, teachers for industrial schools, etc. In addition to instruction in one or more trades, th men of this class should have some general training in correspondence, commercial arithmeti elementary mechanics, physics and chemistry

The higher technical education should qualify the students for the management of factories an other large industrial concerns. An attempt should be made to provide commercial and busines training for men in all grades of occupations.

11. It is suggested that a College of Technology should be started in Bangalore to give instru ion in engineering and in special industries. If, by reason of the equipment being inadequate, th instruction given in any subject is found to be defective, the students will have to finish their educa ion in other superior institutions in British India or England or other foreign countries.

12. For secondary education, a model school of Technology should be maintained in Mysor Government have already decided to start an institution of this kind, to be called "The Chamarajer Ira Technical Institute," with which will be amalgamated both the existing Engineering School an the Industrial School in Mysore. A building at an estimated cost of Rs. 2,41,215 is under constru ion for this purpose and is expected to be ready early next year.

13. The existing industrial schools in the State should be improved and developed as far as ci cumstances permit.

14. For all classes of institutions to be started in other centres, model curricula, staff ar approximate estimates are given. Any town which wants one or more institutions of the class named may make its own selection from the given list.

15. In many towns and large villages, the cost of starting model institutions may be prohibitiv This difficulty may be overcome by establishing special classes morning or evening, or a course ectures. For instance, where a fully equipped commercial school cannot be started, one or tw commercial classes may be provided in connection with an existing educational institution. Whe even this is found too costly, morning or evening classes for the same purpose, may be organise When there is not much demand for such classes, lectures may be arranged for, for an hour or s once to three times a week, merely to rouse interest in the subject. Where local lecturers are not be had, itinerant lecturers may be appointed to visit given centres at periodical intervals. The ma object is to bring every form of education within the reach of the classes of people who desire it, some suitable form at first, and more highly developed forms as resources permit and as the impor ance of the subject begins to be understood.

16. The two large institutions proposed at Bangalore and Mysore should be maintained entire at Government cost. If the districts wish to take a prominent share in the benefits, students shou be sent up at the cost of Municipalities, guilds of tradesmen, weavers, etc. Government will al give a few scholarships to selected students.

17. It is recommended that the District Boards, Municipalities and other local institutions, well as associations and guilds of tradesmen, be encouraged to start institutions or classes or organi lectures in subjects which, in their opinion, are calculated to multiply the occupations of the people increase the volume of business in the locality. If the local authorities or inhabitants make up the mind to contribute a substantial share of the cost, Government should not hesitate to pay the balan and help to bring into existence the institutions needed.

IV. College of Technology in Bangalore.

18. It is suggested that a College of Technology be established in Bangalore to give instructi in higher engineering and industrial arts.

Object. The object of the institution should be to train students who have already received a fair amou of general education so as to qualify them for taking a leading part the management of industries and commerce in the country. T training in commercial and economic subjects including systems of administration in foreign countr will be of great value to officers of Government who are likely to become heads of districts. Some the trained students will be fit for recruitment to the State Public Works and Electrical Depa ments.

19. The course including workshop practice and laboratory may be divided into three sections as under :—

Curriculum.

(i) Higher technical education.
(ii) Instruction in special industries.
(iii) Higher commercial training.

(1) Higher Technical Education.

20. The following subjects may be included in the first section :—

(i) Civil engineering, including sanitary and municipal engineering.
(ii) Mechanical engineering.
(iii) Electrical engineering.
(iv) Architecture and building construction.
(v) Economic geology and mineralogy.

Drawing should be given a prominent place in the first four divisions, and lessons should be given in photography. The detailed courses in pure and applied sciences might be settled by the staff when appointed. The instruction which the Institute of Research and the Central College may consent to give in these subjects to students of the College of Technology should be fully availed of, so that as far as possible, there may be no overlapping of courses of study in the three institutions.

The course in this section should be one of three years for each branch, the first year's course being common to all and the remaining period being devoted to special training in the selected branch.

Students who have passed the Intermediate or First in Arts Examination may be considered eligible for admission.

(2) Special Industrial Education.

21. In this section, the College should, as far as possible, provide facilities for giving instruction in the following industries :—

(1) Textiles, dyeing, bleaching and printing.
(2) Ceramics and manufacture of glass.
(3) Tanning and leather work.
(4) Manufacturing of oil, paints and soaps.
(5) Sheet metal work
(6) Brewing.
(7) Motor engineering.

The full course in this section should also be one of three years. The passed candidates of the technical schools may be considered eligible for admission to this section. The course of studies should be of the standard needed to train the pupils for employment as managers of mills or other similar posts or as headmasters of technical and industrial schools in the mofussil.

(3) Higher Commercial Training.

22. The subjects to be taught in this section should include some or all of the following :—

(1) Commercial mathematics
(2) Accounting and auditing.
(3) Banking.
(4) Mercantile law and practice.
(5) Economics.
(6) Economic geography.
(7) Statistics.
(8) Political economy.
(9) Public finance.
(10) Public administration.
(11) Local and municipal institutions.
(12) Problems of transport and railways.
(13) Co-operative associations and organization of industries.
(14) Commercial history—History of industry and commerce.
(15) One foreign language, either German or French.

Some of the subjects under commerce should be of interest to officials and the general public. The lectures in those subjects should be open to the public as far as possible.

For officials and others who cannot attend during the day, special lectures may be given in the evenings.

The course in commerce should be one of two years. There may be one professor and one instructor for the present and the students may be supplied with the necessary reference books from the library.

The minimum qualification for admission for regular students should be the successful completion of the Intermediate in Arts or other corresponding examination.

(4) Workshop Practice and Library.

23. The present Public Works workshop should be developed and utilised for affording practice to the students of the College. A competent Superintendent should be appointed.

The library should contain books on civil, mechanical and electrical engineering, industries and commerce. The libraries of the Civil Engineers' Association (and the Economic Conference) may be developed and utilised for this purpose for the present.

Later on, a museum may be started in conjunction with the library.

24. As the resources of the State do not admit of the duplication of institutions, it is suggested that the existing workshops and libraries be developed and utilised so that the expense of providing new ones may be saved.

Staff.

25. Similarly, the State cannot afford to have a large staff of professors and teachers. Three or four highly qualified professors may be employed and the rest of the staff may consist of lecturers locally trained.

Having regard to the financial exigencies of the State, it is better to make a commencement with the institution with such staff as funds will allow at first. We have to choose between higher training with the aid of an inadequate staff or no training at all

26. A professor for mechanical and electrical engineering, one for textile engineering, one for architecture and building and one for commerce, will be needed at once

In order to save expense, some of the engineer officers stationed in Bangalore may be asked to lecture for a day or two every week.

For some time to come, the latest books and journals on each subject should be provided and the students left to acquire knowledge by studying them under the general guidance of the professors and the lecturers.

In a few subjects, instruction may also be given by means of special lectures either morning or evening, so that those who are interested in the development of particular industries for which the State cannot at present afford to provide regular courses in the College, may acquire some expert knowledge.

27. The cost of the staff may be estimated as under —

	Rs.
(1) Four professors, Rs 500—800, average Rs. 650 per mensem ..	31,200
(2) Four lecturers, average Rs. 200 each per mensem	9,600
(3) Experts and demonstrators	10,000
(4) Miscellaneous staff	6,000
(5) Experiments in industries and commerce	10,000
(6) Workshop	7,500
(7) Library, museum, etc.	5,000
Total ...	79,300 or say 80,000

The expenses may be reduced by employing engineers and professors of existing colleges to give instruction for a few hours every week. They may be given some allowance for doing the work. The total cost for the next five years should not exceed Rs 75,000 a year.

28. The whole of the staff at least for the next five years may be temporary and no member should be engaged for more than three years at a time. This is necessary for three reasons. The most important one is that Government will be able to sanction proposals speedily without the fear of imposing a permanent burden on the State. The establishment may be reduced after due notice if the finances of the State are found to be unequal to the strain. Secondly, it is not desirable to saddle Government with a large permanent staff, for whom employment will have to be found or compensation given, if it becomes necessary to dispense with their services. The third reason is that temporary men can be changed till properly qualified men are secured for our work. A permanent officer may often no doubt have a higher incentive for his work, but he is also likely to lose interest and become dissatisfied if he should not receive promotions as rapidly as members of other branches of the Government service.

29. The teaching staff will be expected to keep touch with experiments in industries and with the working of all technical and industrial institutions in the State.

Capital Outlay.

30. The College may have to begin work partly in hired buildings. A sum of about Rs. 3 lakhs will, for the present, suffice for opening the College. After a period of about five years, some additional expenditure on buildings and equipment may be necessary.

Ways and Means.

31. This institution should be maintained entirely from State Funds. Donations may, however, be accepted if public spirited gentlemen desire to contribute. Fees levied from students will, to a certain extent, supplement the State Grant.

Administrative Control.

32. The College should be under the direct control of a Principal or Director, who will work under the general guidance of a council consisting of Government officers and non-official gentlemen the latter selected chiefly from among those connected with industries, manufactures or trade.

V. CHAMARAJENDRA TECHNICAL INSTITUTE IN MYSORE.

33. The proposed Chamarajendra Technical Institute at Mysore, which will be formed by the algamation of the existing Engineering and Industrial Schools in that City, should consist of three tions :—

(i) Elementary engineering including architecture.
(ii) Technical.
(iii) Industries and crafts.

Engineering Section.

34. Candidates seeking admission into this section must have passed the Matriculation or the iool Final Examination.

Instruction should be imparted in –

1. Civil engineering including architecture (buildings, roads, irrigation and sanitation).
2. Mechanical engineering.

The students should be given a certain amount of training, in the workshop, in building construc- ı and in business correspondence and estimating. The course should be one of three years.

Scholarships.

35. Three scholarships of Rs. 7 and two of Rs. 6 each at the end of the first year, and two of 10 and two of Rs. 9 each at the end of the second year may be awarded to the first two persons the list of successful candidates in each of the two branches

Technical Section.

36. Candidates seeking admission into this section, must have passed the Matriculation or the iool Final Examination. The subjects of study should be :—

1. Drawing.
2. Mathematics.
3. Elementary physics.
4. Elementary chemistry.
5. One of the following special subjects :—
   (*a*) Machine work.
   (*b*) Weaving and dyeing.
   (*c*) Photography including process work.
   (*d*) Commercial subjects such as book-keeping, business correspondence, shorthand and type-writing and banking.
6. Workshop practice.
7. Gymnastics and drill.

The course will be one of three years.

37. Intelligent and capable students desirous of becoming foremen in factories may be given a ther course of one year in practical work.

Four scholarships of Rs. 5 each at the end of the first year and four of Rs. 7 each at the end of second year may be given to the first boy in each of the groups.

Industries and Crafts.

38. Sons of artisans and boys of other classes (who are unable to continue their studies and o have no other means of earning their livelihood) may be admitted into this section to learn a de.

Instruction may be imparted in any one of the following crafts :—

(*a*) Cabinet-making.
(*b*) Carpentry.
(*c*) Carving (wood and ivory).
(*d*) Basket and cane work.
(*e*) Smithy work.
(*f*) Machine work.
(*g*) Fitters' work.
(*h*) Foundry work.
(*i*) Sheet metal work.
(*j*) Printing.
(*k*) Weaving and dyeing.
(*l*) Brick work and masonry.
(*m*) Engraving.

39. As the school develops, some of the following subjects may be selected and added to the ırse of instruction :—

(*a*) Building construction.
(*b*) Land surveying.
(*c*) Plumbing.
(*d*) Carriage building.
(*e*) Painters' work.
(*f*) Electrical work.
(*g*) Motor driving.
(*h*) Boot-making and leather manufacture.
(*i*) Watch and clock-making.
(*j*) Typography.
(*k*) Tailoring.
(*l*) Pottery.

General Subjects.

40. A knowledge of the Vernacular, English and Arithmetic up to the Lower Secondary ndard may be imparted. The other general subjects may be :—

Drawing.
Business methods.
Modelling (for a few selected pupils).

The course should be one of three to five years in accordance with a progressive course of studies divided into 3 to 5 sections to suit the respective courses.

Scholarships.

41. Boys seeking admission into the first class of this section should pay fees for three months, at the end of which they may get the scholarship of the class, if they are regular in attendance and hard-working and if scholarships be available. If the boy be an artisan, he should be given scholarship from the date of his admission. A student seeking admission with previous knowledge of the industry may be taken into the standard for which he is fit on payment of a fee for one month. He should get the scholarship of the class for which he is fit from the second month. All students should bind themselves to attend the school continuously for a period of at last three years.

42. Pupils of other schools may be given instruction in drawing alone. The rates of fees for the different standards may be fixed after the institution is started and is in working order.

There may be evening classes in drawing and lectures in a few special subjects for artisans working outside.

43. Classes for imparting instruction in printing, book-binding, etc., may be opened in the Government Press in Mysore and Bangalore, and they may be under the control of Mr. Yates, Superintendent, Government Press. A grant may be given for the maintenance of these classes.

44. Pupils in all sections should be examined and given a diploma at the end of their course by a Board of Examiners appointed by the Mysore Government. They may also appear for the Madras Government Technical Examinations.

45. The institute should have a workshop equipped with up-to-date appliances. Every endeavour should be made to give training of a high order, special attention being given to developing in the pupils' habits of discipline, neatness and accuracy.

The workshop should have two sections one for practice by pupils of the Engineering and Technical sections and the other by those of the Industries and Crafts section

46. It is an axiom that a student is best trained in a factory and it is therefore necessary to have a workshop managed on commercial lines. The students of the Industries and the Crafts section should not be given a diploma unless they have attended the commercial workshops for a reasonable period. They should put in longer hours of work and get wages for the work actually done.

47. The control of the institute should be vested in a Superintendent.

EXPENDITURE.

	Rs.
Superintendent	500
Four Headmasters	700
Twelve lecturers	1,165
Thirty-four instructors	1,335
Menials	200
	3,900
Two hundred and seventy scholarships ranging from Rs. 2 to 10 ...	1,086
Materials	600
Tools	300
Contingencies	194
	2,180
Grand Total per mensem ...	6,080
or per annum ...	72,960

Deduct—	Rs.	
Probable receipts from fees and sales	18,960	
Net expenditure at present incurred on the Mysore Industrial School	20,000	
Net expenditure at present incurred on the Engineering School	9,000	
		47,960
Net excess expenditure now required per annum		25,000

48. An initial outlay of Rs. 25,000 for the commercial workshop for the purchase of materials and Rs. 25,000 for equipment with machines, etc., will be necessary. The total capital expenditure will be Rs. 50,000.

VI. IMPROVEMENT OF EXISTING INDUSTRIAL SCHOOLS IN THE STATE.

49. With a view to improving the existing Industrial Schools in the mofussil, the following proposals are made:—

There are now six Government Industrial Schools in the State. Those at Hassan and Melkote should be taken over by Government and a new one opened at Chitaldrug. There will thus be nine

mofussil Government Industrial Schools in the State including the three newly proposed, as detailed below :—

Name of place.	*Industries to be taught.*
1. Channapatna	Lacquer work, carpentry, musical wire and smithy work.
2. Chiknayakanhalli	Weaving, coir work and carpentry.
3. Chitaldrug	Weaving, carpentry and smithy work.
4. Dodballapur	Weaving and carpentry.
5. Hassan	Carpentry, cane work and smithy work.
6. Hole-Narsipur	Weaving, carpentry and smithy work.
7. Melkote	Weaving, carpentry and cane work.
8. Molakalmuru	Weaving and carpentry.
9. Sagar	Carpentry, rattan work and smithy work.

50. The subjects of study may be :—

(1) One or more of the industries mentioned above against the schools.
(2) Drawing.
(3) General education : reading, writing, arithmetic, and business methods.

A progressive course of studies may be prescribed by Government The duration of the course should be one of three years in the case of lacquer work, musical wire-making, drawing, weaving and cane work and of three to five years for carpentry and smithy work.

51. The details of establishment are given in para 54. Industrial Schools can never be expected to prosper unless they are properly organised and carefully and intelligently supervised. It is, therefore, suggested that they be placed in charge of full-time Superintendents. They must be experienced men possessing the power of organization. They must also have a general knowledge of the industries taught in the school in their charge. Such men cannot, under ordinary circumstances, be secured on a lower pay than Rs. 100 a month. It is suggested that such men should start on Rs. 75 per month. All the Superintendents should at first be placed in that grade. Those that have done really good work for at least two years may be promoted to the higher grades. Others that have failed to produce good reasults in this period should be replaced by passed men from Technical Colleges and by men trained in the College of Technology to be started in Bangalore.

Provision should be made for giving two instructors in some of the industries if the number of students be sufficiently large.

52. Students trained in the school must be able to design and give clear sketches of articles they undertake to make. They must also be able to estimate accurately the value of the articles they have to prepare. They must know where the various materials required by them can be profitably purchased and where they can sell their manufactured articles to advantage They must be able to indent in writing for the materials required for their work. It is therefore suggested that instruction in drawing be imparted and that pupils be equipped with a certain amount of general education before they leave the school.

Scholarships

53. Provision may be made for 420 scholarships for all the nine schools to be distributed in accordance with the strength of the schools.

Boys seeking admission into the schools should pay a prescribed fee for a period of at least three months when they may be given the scholarship of class A, if they have been regular in attendance and hard-working, and if scholarships are available. *Bona fide* artisans should get scholarships from the date of admission. All boys should bind themselves to attend the school continuously for at least three years.

As boys of these schools have to make a living by the trade they learn, they will not be fit for this unless they work at it for sometime on commercial lines. It is, therefore, suggested that there should be small workshops worked on commercial lines attached to these schools. Boys should be paid wages for work done and they should put in longer hours of work. They should not be given a diploma unless they have had practice for two years in a commercial workshop.

Details of Expenditure.

54. The following is a rough estimate of staff, etc., required :—

		Rs.	
9	Superintendents	900	Maximum cost.
41	Instructors...	1,025	
18	Teachers and clerks	405	
	Half-time teachers	40	
27	Menials	162	
420	Scholarships ranging from Rs. 1-8-0 to Rs. 5	1,050	
	Materials for boys	700	
	Tools	300	
	Contingencies	158	
	Total per mensem ...	4,740	
	Do per annum ..		56,880

DEDUCT—

The net cost of the mofussil industrial schools including grants-in-aid to Melkote, Hassan and Hole-Narsipur schools	17,400	
Probable income from sales and fees from the reorganized schools	14,480	
		31,880
Net additional cost of the nine schools		25,000

An initial provision of Rs 9,000 for equipping all the nine schools with tools, etc., and of Rs. 21,000 for the purchase of materials and payment of wages will be necessary.

VII MODELS OF TECHNICAL INSTITUTIONS.

A—(1) Technical Schools.

55. *Object.*—The object is to prepare students for scientific, mechanical, and constructional occupations according to the special requirements of each locality The students should be given an opportunity of obtaining a knowledge of the use of tools and instruments.

The course hereunder prescribed is intended as a preparatory scientific and practical training for young men intending to follow an industrial career

56. *Courses of Instruction—*

General

(1) Mathematics
(2) Elements of physics and chemistry.
(3) Drawing.
(4) Engineering workshop.
(5) Carpentry workshop

Special Subjects.

Training may be given in addition in one or more of the following subjects :—

(1) Mechanical engineering
(2) Building construction, including earthwork and roads
(3) Electrical engineering
(4) Estimating.
(5) Land Surveying.
(6) Hydraulic engineering, including management of tanks and canals.
(7) Mining
(8) Metalware work.

57. *Staff and Equipment—*

(NOTE.—The staff suggested will probably suffice to give instruction in two or three special subjects)

Establishment.

		Rs.
Headmaster		250
Drawing master...		75
Two assistant masters at Rs. 75 each		150
Three special assistants at Rs. 50 each		150
Workshop Superintendent		100
Foreman, superintendent or maistri		50
Office establishment		75
Total ...		850
Per year ...		10,200
Workshop expenses		700
Repairs to machinery and buildings		1,000
Total ...		11,900
or, say ...		12,000

If a new building cannot be provided at the outset, a begining may be made by hiring one. An engineering and carpentry workshop may be provided at a cost of about Rs. 10,000.

58. *Cost.*—The initial capital cost will vary from Rs. 25,000 to Rs. 50,000 and the yearly expenditure will be about Rs. 12,000.

In cases where economy is important, the cost may be reduced by a proportionate reduction of the subjects and staff. The minimum amount required for this class of institutions may be put down at Rs. 6,000 per annum.

59. Industrial Schools will be in greater demand than technical institutions for some time to come, the difference between the two being that in the latter there will be more theory and in the former more practice. Boys trained in industrial schools will probably find employment more readily than those educated in technical schools. The latter class of institutions will give a training of more scientific, and therefore more permanent value.

(2) Art Trade Schools.

60. *Object.*—The object of an art trade school is to give instruction in the application of art to ndustry and in the observance of the principles of grace and harmony in nature to the preparation of bjects of trade and daily use. The articles manufactured must, it is true, be durable and serviceable. But, in art trades, the worker should particularly bear in mind grace of form and harmony of colour nd not be merely a mechanical producer of useful wares.

61. *Subjects to be taught.*—A selection may be made for giving instruction in one or more of the ollowing subjects :--

(1) Wood-carving, including sandalwood carving and inlaid work.
(2) Furniture design and cabinet making.
(3) Decorative painting, including interior decoration.
(4) Sculpture, including stone-carving.
(5) Photography.
(6) Graphic art.
(7) Gold and silver smithy
(8) Etching, engraving and lithography.
(9) Lace-making and embroidery.

Where a complete school cannot be established, one or more of the arts can be taught by opening special classes in an existing industrial school or a school of general education.

62. *Cost.*—The capital cost of an art trade school may be roughly estimated at Rs. 25,000, including buildings and equipment. The recurring expenditure may amount to Rs. 6,000 including materials. The cost will, however, depend on the number of pupils and of subjects selected.

63. The course of instruction for each trade should ordinarily be one of three years, of which he first should be a preparatory course. In some special subjects, such as gold and silver smithy, students will require longer practice. Such practice may be afforded by extending the course by one or more years as required.

64. *Preparatory course.*—The subjects taught in the preparatory course should be:—

(1) The elements of geometry.
(2) Arithmetic.
(3) English and Kanarese composition.
(4) Use of scales, squares and drawing instruments.
(5) Geometrical drawing and geometrical ornamentation.
(6) Free hand and model drawing.

For those who have aptitude, the elements of algebra, physics and book-keeping may also be ught.

During the closing period of the training, particular attention should be given to preparation of signs and detailed estimates of cost.

65. The standard of admission may be general education corresponding to the Lower Secondary other equivalent examination. But there should be no rigid restrictions in this respect. Students ined in trade or craft schools or sons of artizans may also be admitted into art trade schools.

(3) Industrial Schools.

66. These schools are intended to train boys in particular industries that they may, after leaving the school, follow the industry taught and earn a living by it. The work should be mostly practical and very little of theory should be taught.

67. The subjects of study may be as under:--

I. One of the following trades:—

1. Carving.
2. Cabinet-making.
3. Carpentary.
4. Carriage building.
5. Painter's work.
6. Lacquer work.
7. Smithy work.
8. Fitter's work.
9. Musical wire making.
10. Tinsmith's work.
11. Metal work (hammered and cast).
12. Cane and basket work.
13. Weaving.
14. Dyeing.
15. Tailoring.
16. Boot and shoe-making.
17. Book-binding.
18. Brick work and masonry.
19. Land surveying.
20. Rope-making.
21. Mat-weaving.

II. Drawing.
III. General education—Reading, writing and arithmetic.
IV. Business methods.
V. Modelling.

The course of instruction should be one of 3 to 5 years according to the nature of the industry ken up.

68. The staff may consist of a superintendent, a foreman for each of the industries taught in a school, a drawing master, and office establishment to the extent needed (including teachers for neral education).

Each school may take up 2 or 3 industries according to the requirements of the locality and may st roughly Rs. 5,000 a year (staff, material tools, etc., included).

69. A school which trains and sends out boys that they may make a living by working at a trade, cannot successfully do so unless it has a workshop working on commercial lines attached thereto. The initial cost of equipping such a workshop with tools, etc, will vary according to the requirements of the industries selected It may be roughly estimated as ranging from Rs, 1,000 to Rs. 6,000. A fixed provision of about Rs. 2,000 will be required for materials, etc., for the commercial workshop.

70. These industrial schools will prosper only if the people of the locality take an active interes in them. It seems important that new schools should be started only in places where people come forward with contributions towards the upkeep of such institutions.

Craft Schools or Lower Industrial Schools.

71. These schools are for imparting to the sons of raiyats instruction in rural crafts or industrie so as to enable them to make and repair their own agricultural tools, implements and other requisites.

72. Instruction may be imparted in one or more of the following special subjects according to the requirements of each locality :—

(i) 1. Rural carpentry (such as making country carts, agricultural implements, such as ploughs, doors, windows, etc)
2. Smithy.
3 Basket work.
4. Rope-making.
5. Kambli-weaving.
6. Weaving (cloths of lower counts).
7. Sericulture and silk-reeling.
8. Mat-weaving.

(ii) Elementary drawing

(iii) General education in the vernacular.

73. The course should be one of one to three years. A small business workshop may be attached to each school, where the pupils should be required to work for a further period of one to two years receiving wages for work done This should complete the training.

74. The school will cost about Rs 250 to 600 per annum, according to the number of subjects taught. The cost of equipping such school with tools, etc., will be Rs 100 to 300. An initial allotment of Rs. 200 for purchase of materials, etc., will also be necessary.

75. In places where separate schools cannot be established, it should be sufficient, if special classes in local schools are arranged for. The annual cost would then be much less.

(*4*) *Commercial Schools.*

76. A proper business education for all classes of people in Mysore is an urgent necessity. In many walks of life the people are following old time practices which hinder progress. If, however, business principles are applied to daily avocations, unintelligent and wasteful labour will be lessened. The importance of co-operative effort and mutual helpfulness should be recognized. The production, distribution and uses of merchandise should be better understood. The means of utilizing Government help and the benefits of organization should be brought home to all classes of people.

77. Higher commercial education will be necessary as a preparation for business life to young men inheriting large agricultural and industrial properties and also for Government officers and managers of all large concerns.

The basis of higher commercial education must be economic science, commercial history, commercial law and commercial geography. The education must enable the student in after-life to handle great affairs in a merchant's or manufacturer's office and he should be able to trace and analyse the profit and loss in every department of a large business.

78. Provision is made in the curriculum of studies for the College of Technology for instruction in Higher Commerce. A separate institution is not necessary for this purpose.

Secondary Commercial Education.

79. This should include :—

(1) Commercial correspondence, penmanship, handwriting, and type-writing.
(2) Phonography or phonetic short hand.
(3) Business practice and methods.
(4) Book-keeping.
(5) Estimates of cost
(6) Commercial arithmetic and geography and commercial law.
(7) Office practice and knowledge of wares.
(8) Commercial morality.

80. Lower commercial education should include a training for the formation of character in the modern sense. The habits of punctuality, diligence and discipline should be specially inculcated. The student should be taught to cultivate a sense of honor and to understand his duties and relations to his fellowmen and the State.

The subjects taught should be the three R's, book-keeping. both Indian and European, correspondence and a knowledge of the resources of the country. Instruction should be given in the elements of commercial morality.

Cost.

81. Where a complete commercial school is not started, only a few selected subjects from the list given above should be taken up.

We have provided for commercial classes both in the College of Technology and in the proposed technical institute in Mysore. A special school of the elementary standard will cost probably Rs. 1,200 per annum and that of a secondary standard Rs. 3,600. But as business training is essential even along with general education classes, the teaching of commercial subjects should be provided in every town, and, where separate classes are not feasible, at least continuation schools or lectures should be arranged for.

82. We attach great importance to the value of a course in economic science, statistics and public administration for every officer of the Revenue Department.

(5) Girls' Industrial Schools.

83. Industrial education for girls is a matter of slow growth in a country where only one woman in 144 can read or write and where religious and social restrictions are so many and so rigorous.

84. The girls' institutions may be considered under three heads.—

(1) Elementary domestic subjects schools.
(2) Secondary domestic subjects schools.
(3) Industrial and craft schools.

85. The general education needed by girls in this country is a course calculated to foster in them habits of diligence, order, thrift, cleanliness, neatness and accuracy.

Every girl should be taught sewing as is done in Japan.

To all classes of girls, household economy should be taught, to girls of the higher classes lessons in ordering, adjusting and managing a house, and to those of the lower classes, elementary lessons in house work, housekeeping, sewing and cooking.

86. Courses of study—

(1) *Elementary Domestic Subjects Schools.*

Domestic economy (elementary lessons in house work and house-keeping).
Sewing.
Cooking.
Laundrying.

(2) *Secondary Domestic Subjects Schools.*

Reading, writing and arithmetic. Instruction in household economies (housework and management of the house).

Hygiene.
Home medicines, nursing and midwifery.

Special Subjects.

Music.
Freehand drawing.

(3) *Industrial Schools for Girls.*

The curricula will have to be specially prepared where a high class industrial school is needed. Such a school will sooner or later be necessary in places like Bangalore and Mysore.

The girls should have gone through one or the other of the domestic subjects schools before preparing themselves for any special industry or art trade.

The main object should be to teach the girls of the poorer classes some sort of industry so as to enable them to gain their livelihood after they have finished their scholastic career.

The trades in which instruction may be given are—

Embroidery.	Upholstery.
Lace-making.	Dairying.
Knitting.	Bread-making.
Millinery.	Making preserves.
Photography.	

Along with each subject, instruction should be given in drawing, designing and estimating

87. Each class of school may be started with at least two teachers at the commencement. The elementary school may cost about Rs. 600 per annum, the secondary school Rs. 1,500 per annum, and a girls' industrial school about Rs. 3,000. The expenditure will increase with the number of subjects and of pupils requiring instruction.

Cost and staff.

88. In villages, the girls may be given instruction in cooking, house management, field work, care of domestic animals and also in special trades like mat-making, basket work, rope-making, bamboo and cane work.

Wherever a regular domestic subjects school for girls cannot be established for want of funds, classes for teaching special subjects may be attached to an existing girls' school. In the last resort, morning classes or lectures may be arranged for.

B. Special Classes. Continuation Schools or Classes and Lectures.

89. A detailed description of each of the suggested types of smaller technical and industrial schools having been given, it is proposed in this section to suggest other forms of provision for technical education suited to places which, from poverty of resources or want of facilities, are unable to adopt one of the suggested types in all its completeness. The alternatives suggested are (*a*) Special classes, (*b*) Continuation schools or classes, and (*c*) Lectures.

(a) Special Classes.

90. Where suitable accommodation is available either in the local school or in close proximity to it, special classes for instruction in any of the courses suggested for model schools may be held during the usual working hours of a school These classes may be in charge of a teacher specially appointed for the purpose but under the general management of the Headmaster of the local school The cost of maintaining a single class of 30 pupils may vary from Rs 150 to Rs 400 a year according to the course selected and the qualifications of the teacher

(b) Continuation Schools or Classes.

91. Where separate accommodation is not available for special classes, morning or evening classes for instruction in selected subjects may be held in existing school buildings. These classes may be conducted by local teachers who have obtained technical training or until trained teachers become available by skilled artisans under the guidance of a teacher of the local school. The class may be held for two hours twice or thrice a week The minimum remuneration for each days' work may be 8 annas in the case of a teacher of an elementary or middle school and Re. 1 in the case of a high school teacher These classes should be open not only to regular students but also, as far as possible, to all others who wish to attend them.

(c) Lectures

92. Organised courses of lectures on subjects suggested for model schools may be delivered in selected places by competent local teachers or itinerant lecturers specially appointed for the purpose. The aim of instruction should be to give the pupils information on points likely to be of great practical value to them and by a description of the material, tools, etc., employed in the industry to stimulate interest in their calling

The salary of a whole-time lecturer, when one is appointed for the purpose, may according to his qualifications be from Rs 50 to Rs. 100 In the case of competent local teachers undertaking the work, the minimum monthly allowance should be Rs 20.

VIII. Scholarships and Foreign Training.

Scholarships given in India outside the State.

93. The scholarships offered by Government to Mysore students wishing to prosecute their studies in specified subjects in Colleges outside the State, are the following —

Ten scholarships of the value of Rs 15 to 20 each, tenable for three years in one of the technical or commercial Colleges, or schools of Arts in Bombay, Madras or Calcutta.

Three of the value of Rs. 30 a month, tenable for three years in an Engineering College.

Two of Rs. 25 each, tenable for four or five years in the Madras or Bombay Medical College.

Two of Rs. 10 to 15, tenable for three years in a College of Agriculture

The maximum yearly grant required for these scholarships is Rs 13,790. The actual budget allotment for the year 1911-12 was Rs. 14,559

94. There were during the past year 17 students holding medical scholarships in Bombay or Madras, 10 holding engineering scholarships in the Engineering College at Madras, 2 holding agricultural scholarships in Coimbatore, 29 holding technical scholarships in Bombay, Madras or Calcutta and 2 holding scholarships in the Teachers' College, Madras. The actual amount paid to these students per month amounted to Rs. 1,340 or per annum to Rs. 16,080, of which a sum of Rs. 9,420 was to be met from State Funds and Rs. 6,660 from Local Funds General.

95. Besides these professional and technical scholarships, scholarships for general education were awarded to 6 students studying in the Mahomedan Anglo-Oriental College at Aligarh, and to 4 students studying for the B. A. Honours Course in Madras. The total amount spent on these scholarships was Rs. 3,000.

Thus the scholarships held by students prosecuting their studies in Indian Colleges outside the State during the year 1911-12 amounted to Rs. 19,080.

The provision seems to be adequate and the scholarships are fairly well distributed.

Scholarships held in Foreign Countries.

State Fund Scholarships.

96. Until now only two scholarships appear to have been granted from State Funds, one for Law, and the other for Medicine.

Damodar Dass Charities Fund Scholarships.

97. Rules for the grant of scholarships for scientific research and technical education from the Damodar Dass Charities Fund were first issued in May 1906. Ordinarily two scholarships of £200 each are granted every year, and each scholarship is tenable for two years or such other period as may be fixed by the Mysore Government, having regard to the subject selected for study or research. The scholarships are granted to students selecting one or more of the following subjects :—

I. Chemistry.
II. Physics.
III. Application of chemistry or physics to agriculture or the various arts and industries.
IV. Medical research, in any branch including hygiene and bacteriology.
V. Mechanical engineering.
VI. Mining and metallurgy, including electro-metallurgy.
VII. Electrical engineering.

In special cases these scholarships are granted also for the encouragement of higher studies in Sciences other than those specified above.

The following table shows the subjects for which these scholarships were held during the past year :—

Subject	Place of study	Number of scholarships	Amount
			Rs.
Medicine	England ...	2	6,000
Science	Do ...	1	3,750
Electrical standardising	Do ...	1	3,000
Electrical engineering	America ...	1	3,000
Engneering with special reference to architecture.	London ...	1	3,000
Forestry	Oxford ...	1	4,500
Agriculture	England ...	1	3,645
Agricultural Chemistry	Germany ..	1	3,000
Law (paid from State Funds)	.....	1	3,750
			33,645
Omitting scholarships given for medicine, science, forestry and law			18,000
Scholarships for purely technical subjects			15,645

Additional Scholarships proposed by the Committee.

98. The Committee feel that the necessity for making adequate provision for the training of young men sent to Europe in industrial subjects has not received sufficient attention, and they, therefore, feel it necessary to urge that during the next few years two scholarships of £300 each be granted annually from the State Funds, to students offering to study any one of the following subjects :—

1. Chemical industries.
2. Textile industry (including dyeing and bleaching).
3. Tanning and the manufacture of leather goods.
4. Iron and steel work.
5. Wrought metal industry.
6. Machine construction.
7. Electrical industries.
8. Ceramics and glass manufacture,
9. Manufacture of candles, greases and industrial oils.
10. Paper and cardboard manufacture.

It is to be understood that the selected students are expected to study principally the practical nd commercial details and information that may be of service to them in starting the industry in hich they have qualified themselves on their return to the State. The students selected should ndergo a preliminary training in an Indian Institution before leaving for Europe or other countries.

Travelling Professors or Commissioners.

99. The Committee attach great importance to the necessity of the State being in touch with he latest developments in arts and industries in other parts of the world, and with this view they ecommend that two local officers should be constantly placed on deputation in foreign countries each or a period of not less than six months at a time. This arrangement would cost the State annually bout Rs. 30,000 for salaries, passage money, and allowances.

100. If the proposals of the committee are accepted, the annual expenditure on account of echnical scholarships and foreign training would stand thus :—

Subjects	Period	No.	Monthly rate	Maximum yearly amount
cholarships paid in India—	Years		Rs.	Rs.
Technical	3	10	15 or 20	7,200
Engineering (when necessary) ...	3	3	30	3,240
'amodar Dass Charity Fund Scholarships—				
Subjects specified in the rules ...	2 or 3	2	250	18,000
dditional Scholarships proposed by the Committee—				
Industrial subjects	3	2	375	27,000
'ravelling professors or Commissioners—				
Arts and Industries	Not less than 6 months.	2	...	30,000
Grand Total ...	...	...	...	85,440

The estimated expenditure on scholarships in India and on technical scholarships in foreign countries will amount to Rs. 10,440 and Rs. 18,000, respectively, and these sums may be met from the present grants from the funds concerned.

The extra expenditure required for the additional technical scholarships and for the travelling commissioners proposed will together amount to Rs. 57,000, for which provision has been made in the new scheme (*vide* Appendix III).

IX. Proposals for Gradual Development.

101. Our scheme in effect provides for starting one large institution in Bangalore one in Mysore and also for improvement in the equipment and teaching of the existing industrial schools in the State.

Beyond this, it merely makes provision for an annual lump sum grant of Rs 93,000 to be given as subsidies and grants-in-aid to those willing to start similar institutions in other parts of the State (or for establishing model Government Schools).

102. We have given some particulars of model institutions to enable a selection to be easily made. We attach special importance to the adoption of measures whereby every town or village requiring education in any particular subject shall have an opportunity of making a start with the minimum of outlay necessary for such a purpose.

103. The total additional expenditure proposed for buildings, equipment, etc., is Rs. 5 lakhs in the first three years and the annual expenditure proposed is Rs. 3 lakhs. This is exclusive of the amount already spent on industrial education in the State, as explained above. After three years both the capital and recurring outlay will have to be increased if it is found that satisfactory progress is made in the meanwhile.

104. The entire scheme as explained already should be treated as tentative. No permanent pensionable appointments need be made until Government are satisfied with (the successful working of the new movement in the earlier stages).

X. Administrative Control and Estimate of Cost.

105. At present the control of industrial education in the State is vested in the Inspector-General of Education. In future, a special officer will have to be appointed for the purpose on a salary of about Rs. 1,000. He will work either as an Assistant to the Inspector-General of Education or the Director of Industries if one is appointed, or if Government see fit, he may be treated as the head of an independent department. No officer should be in charge of the department for more than three years at a time unless he has special aptitude for the work as evidenced by the results achieved

106. There should be at least one Inspector for the supervision of schools and for helping local authorities in starting new schools. This officer should also be liable to be changed once in two or three years unless re-appointed.

107. The approximate cost of direction will be as under:—

Direction Charges.	*Per annum.* Rs.
(1) Director at Rs. 1,000 per month	12,000
(2) Inspector at Rs. 300—500	4,800
(3) Office establishment at Rs. 400 per mensem	4,800
(4) Travelling allowances and all miscellaneous expenditure ...	3,000
Total ...	24,600
or, say, ...	25,000

108. Every technical institution should have a Committee of management with which the leading private gentlemen engaged in trade, industry or education should be associated. This is the principle on which all technical schools are managed in European countries. The head of the school and the local officers of the education and technical Departments of Government should also form members of the Committee.

Total Cost.

109. An abstract estimate of cost of the proposed developments is given in Appendix III. The main heads of expenditure are as under:—

	Rs.
(1) College of Technology in Bangalore	75,000
(2) Chamarajendra Technical Institute in Mysore ... ... (Additional expenditure only.)	25,000
(3) Improving existing industrial Schools ... ... (Additional expenditure.)	25,000
(4) Subsidies or grants-in-aid to help local bodies or associations to start technical institutions including the establishment of Government model institutions	93,000
(5) Scholarships and foreign training ... ... (Additional expenditure.)	57,000
(6) Direction and control	25,000
Total ...	3,00,000

The capital outlay (*vide* Appendix III) will be Rs. 5 lakhs to be expended in the first three years. The Committee consider that time should not be lost in starting the institutions required till new

buildings are constructed for them. Work may be allowed to be begun in hired premises to enable the people to make an early start.

XI. Conclusion: summary of recommendations.

110. There are commercial and technical colleges on the Continent of Europe which are maintained mainly from private contributions and from fees paid by students. In many of the individual States in North America, technical education is given free. In Mysore, we have to provide for the requirements of the State within the limits of its resources and encourage private effort and contributions as far as possible. Expensive arrangements, whether for buildings or for professors, at this stage, should be severely discouraged if the institutions are not to prove a burden and get into disfavour both with the authorities and with the public.

111. No apology is needed for suggesting a scheme of technical education as indicated in this report. Education on these lines is, in our opinion, overdue in this country.

So long ago as 1888, His Excellency the Viceroy in Council emphasised "the need for scientific methods to develop the material resources of India * * so that Indians may better hold their place in the markets of the world where competition is carried on with an intensity of purpose which has been compared to the conditions of warfare."

In a Council speech in 1906, the late Viceroy, Lord Minto, said "Technical instruction in other countries is growing apace * * The success of modern industries and the preservation of indigenous industries is every day becoming more and more dependent on scientific and technical knowledge and if the resources of India are to be developed, such development must depend largely upon local enterprise and upon recognition of the absolute necessity of expert training." Mr. Montagu, the Under-Secretary of State for India, spoke in the same strain in introducing the Indian Budget in Parliament last year.

112. Foreign countries are spending colossal sums on technical education. One High School in Berlin, the Charlottenburg Technical High School, is maintained at an annual outlay of Rs 10½ lakhs. The more recently started Manchester Institute in England costs Rs. 6 lakhs per annum. They spent Rs. 75 lakhs in order to bring the former institution into existence and Rs 45 lakhs on the latter. Japan has also started large institutions and is besides maintaining students in all the leading Technical Universities of Europe and America.

No one can question the necessity or importance of the proposals we have put forward. The expenditure we have recommended, small though it is, will enable Government to make a modest beginning.

113. Our recommendations may be summarized as follows:—

(1) That Government do incur a capital expenditure of at least Rs. 5 lakhs for buildings and equipment, and an additional recurring expenditure of 3 lakhs per annum for developing industrial and technical institutions in the State.

(2) That a Director with a capacity for organising such institutions be appointed on such salary as he may be had for.

(3) That the scheme of technical education as laid down above be introduced and developed under the advice of the Committees for education and for Industries and Commerce of the Mysore Economic Conference.

(4) That arrangements be made for starting (at once one or two classes to form the nucleus of a future) College of Technology in Bangalore, work being begun in hired premises till proper buildings and equipment are provided. Facilities for workshop and laboratory practice should be arranged for.

(5) That arrangements be made for starting the Chamarajendra Technical Institute in Mysore from the commencement of 1913-14.

(6) That every town and important village, desirous of starting any of the technical institutions, as per models given above, be assisted by the Director in starting and maintaining such institutions on receipt of an application from the District Boards, Municipalities or Associations or Guilds of private citizens through the head of the district.

(7) That, since any permanent development of industrial education in the districts will depend on the extent to which voluntary effort on the part of the people is enlisted, every application for an institution or class should be accompanied by an offer to meet one-half or other percentage of the entire cost of such institution or class, as Government may fix in each case. (A few model institutions of the same class may be started entirely at Government expense.)

(8) That the entire scheme be tentative for a period of three years, which may be extended to five. The scheme may be revised and reconsidered at the end of five years.

(9) That scholarships be given to help the Mysore students to prosecute their studies in technical and commercial subjects in England and other foreign countries or Indian Colleges outside Mysore to the extent recommended.

(10) That two officers be constantly placed on deputation in Europe, America and Japan to keep touch not only with the most modern systems of industrial and technical education but also with progress in industries and commerce.

BANGALORE,
10th September 1912.

APPENDIX I

Proceedings of the Government of His Highness the Maharaja of Mysore, Local Fund and Sanitary (Education), dated 28th October 1910, appointing the Committee

NO. 3585-9—EDN. 462-09-2, DATED BANGALORE, 28TH OCTOBER 1910.

ORDER.—The Government consider that the subject of improving the Industrial Schools in the State should engage early attention and that it is essential that a definite policy and plan of work should be adopted so as to secure the best possible results in this important branch of education. They are accordingly pleased to appoint a Committee consisting of the undermentioned gentlemen for considering the subject and submitting their proposals —

(1) Mr. M. Visvesvaraya, Chief Engineer (President).
(2) ,, J. Weir, Inspector-General of Education in Mysore.
(3) ,, V. Rangaswamiengar, Executive Engineer.
(4) ,, C. Krishna Rao, Headmaster, Government High School, Bangalore.
(5) ,, G. Subbaswami Iyer, Superintendent, Industrial School, Mysore.

2. The Committee is requested to go into a consideration of the subject in all its aspects and submit a full and detailed report, within six months, indicating among other things, how the Industrial Schools should be conducted according to a comprehensive programme and what defined courses of training should be systematically followed

3. The Inspector-General of Education will furnish the Committee with all information that may be required about the working of the existing Industrial Schools and other necessary particulars connected with them.

Statement showing particulars of Government and Aided Industrial Schools in the Mysore State for the year 1910-11.

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

Report on Public Instruction in Mysore for the year 1911-12, submitted by the Inspector-General of Education in Mysore, with his letters No. 1669—252, dated the 30th October 1912, and No. 4734—263, dated the 4th November 1912.

No. 9157—EDN. 62-12-5, DATED BANGALORE, 19TH MAY 1913.

ORDER THEREON.—The office of the Inspector-General of Education in Mysore was held by Mr. J. Weir till the end of July 1911, when in consequence of his lamented death, Mr. H. V. Nanjundayya, M.A., M.L., was placed in executive and administrative charge of the Education Department which he retained, in addition to his duties as Councillor, till he was relieved by Mr. M. Shama Rao, M.A., on 18th June 1912.

2. The year was one of steady and substantial progress in education. The number of institutions, both public and private increased from 4,267 to 4,478 and their strength from 138,153 to 149,214, of whom 124,324 were boys and 24,890 were girls. The percentages of boys and girls under instruction to the total male and female population of school-going age rose from 27·9 to 30·1 and 5·7 to 6·2 respectively. Owing to the virulent outbreak of plague in almost all the districts many of the schools suffered badly in attendance, some of them having had to be temporarily closed during the prevalence of the epidemic.

3. The expenditure on Public Instruction increased from Rs. 18,79,133 to Rs. 19,48,018, of which a sum of Rs. 12,35,175 was met from State Revenues. A sum of about three lakhs of rupees was expended on educational buildings during the year, the more important of them being the new buildings for the Physics and Chemistry Laboratories of the Central College, the High School building at Bangalore, the addition and improvement to the High School and Students' Home at Tumkur, the construction of the Chamarajendra Technical Institute and the installation of electric light for the Maharaja's College Students' Home at Mysore.

The average expenditure on Education during the year per head of population amounted to Re. 0-5-8 against Re. 0-5-6 in the previous year.

4. The number of students on the rolls of the three English Colleges in the State decreased from 438 to 394. The results of the Central and the Maharaja's Colleges in the B.A. Degree Examination of 1912 were satisfactory but they were rather disappointing in the Intermediate Examination. Further arrangements were made to equip the colleges in accordance with the requirements of the University Regulations. The new Physics Laboratory of the Central College was completed, while the Chemistry Laboratory is nearing completion and it is intended to open the Chemistry B.A. Class in July 1913 after obtaining affiliation in that subject. The High School Department of the Maharaja's College has been placed under a separate Head Master and the College Library has been well equipped.

5. There was appreciable improvement in secondary education during the year. The number of boys in the secondary stage of education increased from 14,772 to 16,109. The percentage of boys in the secondary stage to the total number of boys under instruction in public schools was 16·2. As in the previous year the results of the High Schools in the Matriculation Examination were not satisfactory except in the case of the Aided Wesleyan Mission High School, Mysore. In this connection it has to be mentioned that Government have recently sanctioned a scheme for the award of Secondary School-Leaving Certificates in the schools of the State from the academical year 1912-13.

6. The progress made in primary education was encouraging. The number of public primary schools for boys increased from 1,866 to 1,955 and their attendance from 64,956 to 69,492, of whom 5,189 were girls. The number of private institutions which are mostly primary schools increased from 1,807 to 1,911 and their attendance from 22,904 to 25,723, of whom 774 were girls. The total number of boys in the primary stages of all schools was 104,607 as compared with 96,974 in 1910-11. The percentage of boys in the primary stage to the total school-going population increased from 23·5 to 25·3.

The question of the expansion of the primary education has been engaging the attention of Government. A special provision of rupees one lakh for opening new primary schools and of rupees one lakh for primary school buildings has been sanctioned in the State budget for 1912-13, in addition to the usual provision of Rs. 5,000 for opening primary schools and Rs. 50,000 for buildings in the Village School Fund budget. To ensure the proper and full utilization of the funds set apart, an officer has been appointed as Special Assistant to the Inspector-General of Education for the expansion of primary education. A draft Bill has also been prepared and published for making elementary education compulsory in the State.

7. Female education continued to increase in popularity, the total expenditure under this head amounting to Rs. 2,30,600. The number of public schools for girls rose from 294, to 305, of which one was an English College, one an Oriental College, two were High Schools, two were Normal Schools, one an Industrial School and the rest Middle and Primary Schools. The number of girls under instruction also increased from 22,974 to 24,890. One Brahmin girl passed the Matriculation Examination and another passed the Sanskrit Branch of the Kannada Pandits' Examination and 12 girls passed the Lower Secondary Examination. The chief difficulty in the way of the spread of female education is the want of qualified female teachers. A special provision is being made in the budget for replacing male teachers in girls' schools by competent women teachers.

8. There was an increase in the number of schools for Mahomedans which rose from 310 to 319, the number of pupils being 19,357 against 18,632 in the previous year. Of these 14,490 were boys and 4,867 girls. The percentages of Mahomedan boys and girls under instruction to the total Mahomedan male and female population of the school-going age were 66·68 and 25·45 respectively. These percentages are very good in their way but they have not contributed to any appreciable increase in the number of Mahomedan boys in the College and High School classes which continued to be small.

9. It is a matter for great satisfaction that education is becoming popular among the backward classes such as Holeyas, Madigas, Korachas and others. The number of schools for Holeyas and Madigas increased from 95 to 102 and their attendance from 2,247 to 2,581, of whom 329 were girls. Seven Panchama students passed the Kannada Lower Secondary Examination from the Panchama School at Malvalli with five in the 1st Class. It is praiseworthy that a League known as the Panchama Education League has been started in Mysore and monthly fees, etc., are paid to the poor Panchama boys.

10. The number of technical schools increased from 24 to 26, of which 1 was an Engineering School, 3 were Commercial Schools and the remaining 22 were Industrial Schools. The number of pupils receiving instruction in these schools increased from 1,478 to 1,506. A scheme for the improvement of technical education in the State is under the consideration of Government.

11. It is satisfactory to note that the sloyd which is so excellently adapted to train and give a practical turn to the youthful intellect has made good progress during the year, the number of Paper Sloyd Classes having increased from 37 to 49. The Inspector-General of Education is requested to consider the best means of co-ordinating it with other subjects so as to turn it to the best advantage as suggested in para 116 of his report.

12. Government have persued with interest the observations of the Inspector-General of Education regarding the religious and moral education imparted in the schools of the State and they will be glad to have his proposals and suggestions for placing it on a more satisfactory footing with a view to make it fulfil its proper and legitimate objects of forming the character of the young men receiving instruction in the schools and of training them up so as to become loyal citizens of the State and godly and truth-loving members of society.

13. The Government are glad to observe that the inspection work done by the Inspecting Officers during the year was satisfactory and that the appointment of a 3rd Assistant Deputy Inspector of Schools for Mysore has placed the inspection of the schools in that district on an efficient footing.

Local Fund and Sanitary (Education), dated 19th May 1918.

14. Government desire to express their appreciation of the efficient manner in which the Department was administered by Mr. H. V. Nanjundayya under whose able and experienced guidance very satisfactory progress has been made in several directions during the year.

Proceedings of the Government of His Highness the Maharaja of Mysore, Local Fund and Sanitary (Education), dated 20th May 1913.

READ—

Letter No. 10429—576, dated the 13th March 1913, from the Inspector-General of Education in Mysore, submitting a list of schools recommended for increases of monthly grants from the 1st July 1913, and requesting that these grants amounting in all to Rs. 408-8-0 per mensem or Rs. 4,902 per annum, may be sanctioned and included in the Education State Fund budget for 1913-14.

No. 9180-1—EDN. 311-12-3, DATED BANGALORE, 20TH MAY 1913.

ORDER THEREON.—Government are pleased to sanction increases of monthly grants to the following schools with effect from the 1st July 1913; and the total amount required, *viz.*, Rs. 3,090 per annum. will be included in the budget for 1913-14:—

Name of school	Amount of present grant	Amount of increase recommended	Amount of increase sanctioned
	Rs.	Rs.	Rs.
1. Wesleyan Mission Kannada Girls' School, Siddikatte, Bangalore	150+15 for scholarships	50	35
2. Wesleyan Mission Kannada Girls' School, Chamrajpet, Bangalore	25	10	5
3. Wesleyan Mission Kannada Girls' School, Basavangudi, Bangalore	30	10	2
4. Wesleyan Mission Kannada Girls' Branch School, Davangere	12	3	3
5. Wesleyan Mission Kannada Girls' School, Harihar	15	5	5
6. London Mission Kannada Girls' School, Anekal	10	5	5
7. Roman Catholic Mixed School, Tathikuppe, Kankanhalli Taluk	7	3	3
8. Wesleyan Mission Kannada Girls' School, Tyamagondlu	15	10	7
9. Wesleyan Mission Kannada Girls' School, Kyatasandra, Tumkur Taluk ...	10	5	5
10. Wesleyan Mission Kannada Boys' School, Gulur, Tumkur Taluk	15	5	3
11. National Kannada Girls' School, Kodigenahalli, Maddagiri Taluk	10	5	5
12. Kunchetigar Anglo-Vernacular School, Mysore	20	15	15
13. Convent English Girls' School, Mysore ...	57½	42½	42½
14. Lakshmivilas Balika Pathasala, Belur ...	10	5	5
15. Weaving School, Chitaldrug	15	15	15
16. Kolar Mission Normal and Training Institute, Kolar	75+25 for scholarships.	75	35
17. Mahadev Industrial School, Bangalore ...	30	15	10
18. Roman Catholic Kannada Boys' School, Harobele, Kankanhalli Taluk ...	5	2	2
19. Wesleyan Mission High School, Mysore ...	300	10	10
20. Wesleyan Mission High School, Bangalore ...	300	10	10
21. London Mission High School, Bangalore ...	300	10	10
22. Aryabalika Pathasala, Kunigal	20	5	5
23. London Mission Girls' Day Schools at (1) Cubbonpet, (2) Hosapet, (3) Anepet, and (4) Kurubarapet	150	20	20
Total ...	.....	.....	257½ per mensem or 3,090 per annum.

2. The increases of grants recommended to the other schools mentioned in the Inspector-General's list cannot be sanctioned.

To—The Inspector-General of Education in Mysore.
The Comptroller, Mysore Government.

Proceedings of the Government of His Highness the Maharaja of Mysore, General (Reports), dated 29th May 1913.

No. G. 7631-80—G. R. 11-12-1, DATED BANGALORE, 29TH MAY 1913.

ORDER.—The annexed calendar for the year 1913 of the dates prescribed in the rules for the constitution and conduct of business of the Mysore Representative Assembly as modified by the Government Orders noted in the margin is forwarded to the Deputy Commissioners of Districts for information, guidance, and punctual compliance.

No. G. 4450-89—G. M. 235-06-1, dated 18th January 1907.
No. G. 1762-802—G. R. 4-07-3, dated 6th September 1907.

2. The attention of the Deputy Commissioners of Districts is invited to the instructions laid down in the Government Orders referred to above, particularly to paras 3, 4 and 5 of the Government Order of the 18th January 1907, regarding the compilation of the subjects to be discussed at the assembly.

3. The Deputy Commissioners are requested to advise the members of the assembly to attend the Palace Durbar in prescribed Palace Dress for Nuzzur and also to regularly attend the meetings of the Assembly during the whole of the session.

K. R. SRINIVASIENGAR,
Offg. Secy. to Govt., Gen. & Rev. Depts.

To—The Deputy Commissioners of Districts.
The Heads of Departments.
The Compiler, *Mysore Gazette*, for publication in Part I of the *Mysore Gazette*.

DASARA CALENDAR FOR 1913.

1. *By the middle of Ashadha, 17th July 1913.*—The names of members deputed by the Local Fund Boards, the Municipal Councils and the recognised associations should be notified to the Deputy Commissioners. (Rules 6 and 7 of Notification No. G. 1803—G. R. 4-07, dated the 6th September 1907.)

2. *By the end of Ashadha, 2nd August 1913.*—(*a*) Taluk members and District Fund Boards, Municipal Councils and recognised Associations should send to the respective Deputy Commissioners memoranda of representations and suggestions on the subjects desired to be brought forward for discussion at the next meeting of the Assembly at Mysore. (Rules 11 and 12 of the notification.)

(*b*) List of persons deputed and a correct list of elected taluk members as they now stand, together with information as to the number likely to attend the meeting, should be sent to the General and Revenue Secretariat.

3. *By the 5th Bahula of Sravana, 21st August 1913.*—Every Deputy Commissioner should hold at the district headquarters a meeting of members in order to select finally the subjects to be sent to the Secretary to Government, General and Revenue Departments, for inclusion in the consolidated list (Para 2 of Government Order No. G. 4450-89—G. M. 235-06-1, dated the 18th January 1907.)

4. *By the beginning of Bhadrapada, 1st September 1913.*—Compilation of the memoranda of subjects to be discussed in the Assembly with the Deputy Commissioner's remarks prepared in accordance with Rule 13 of the Notification of the 6th September 1907, and paras 3, 4 and 5 of the Government Order of the 18th January 1907, referred to above, should reach the General and Revenue Secretariat.

5. *Eleventh Suddha of Asvija, 10th October 1913.*—Advance copies of all addresses to be presented or speeches to be delivered on the opening day of the Assembly should be sent to the Secretary to Government, General and Revenue Departments, so as to reach him on or before the 10th October 1913. (Para 11 of Government Order No. 4450-89—G. M. 235-06-1, dated 18th January 1907.)

6. *Fourteenth Suddha of Asvija, 13th October 1913.*—Opening day of the Assembly (Rule 15 of the Notification of the 6th September 1907.)

Government Proceedings No G. 6787-819—G. M. 36-07-39, dated the 16th May 1908, directing among other things, the exclusion of the offices of the Superintending Engineers and Executive Engineers, Hassan, Kadur and Shimoga, from the list of those whose menials are entitled to the free supply of clothing.

2. Note No. 306, dated the 3rd September 1912, of the Secretary to Government, Public Works Department, requesting a reconsideration of the above order in the case of the Superintending Engineers, Northern and Southern Circles, as also of the Executive Engineers of Kadur, Hassan and Shimoga on the ground that the former are Provincial Officers having to travel over a wide area of the Province including the malnad tracts and the latter are in the malnad districts where the issue of warm clothing to menial servants is a necessity.

No. G. 6766-7—G. M. 68-12-24, DATED BANGALORE, 1ST MAY 1913.

ORDER THEREON.—After a careful consideration of the question, the Government are pleased to direct that the Superintending Engineers be included in the list of officers whose menial establishments are entitled to the free supply of white and warm clothing under the Government order of the 16th May 1908 read above but that the number of menials to be so supplied be limited to two for each Superintending Engineer.

2. Government do not see sufficient grounds for the issue of free clothing to the menials of the Executive Engineers.

Proceedings of the Government of His Highness the Maharaja of Mysore, General (Miscellaneous), dated 22nd May 1913.

No. G. 7388-436—G. M. 326-12-1, DATED BANGALORE, 22ND MAY 1913.

ORDER.—The condition of private printing presses in Mysore has, for some time past, been engaging the attention of His Highness' Government. The increase of the number of printing presses in Mysore (from 11 in 1885-86 to 52 in 1911-12) shows that there is a large opening for those who wish to take up printing as a profession. With a view to afford facilities for those who are desirous of improving their knowledge of the art of printing and also of the management of presses, the following arrangements are contemplated, and will be carried out if applications are received for such help.

2. The Superintendent, Government Press, will inspect any private press that welcomes his assistance and offer such suggestions to the proprietor thereof as he deems fit in order to improve the stock of type, the methods of management the system of account-keeping and other subsidiary matters connected with its general efficiency. If necessary, he will put private presses in direct communication with the European market in the matter of purchasing type and other materials required by them. Generally he will tender advice in all matters concerning the management of private presses to the proprietors thereof.

3. Further, with a view to encourage the spread of the knowledge of the printing art in the State and to provide an adequate supply of trained labour to the several private printing presses, Government have decided to open a printing class at Bangalore in the Commercial School to be started from 1st July next. To begin with, the instruction that is to be imparted therein by Mr. Yates will be free and elementary in character.

4. Arrangements will be made to hold a day printing class, the hours of attendance being so regulated as to be most convenient for the class of pupils that seek admission to it. If, however, a day class is found unsuitable or inconvenient, evening classes may be arranged for. These and other details concerning the classes will be settled after the receipt of detailed proposals from the Inspector-General of Education and Mr. Yates, which will be awaited.

5. Government will be prepared to consider the question of providing for higher instruction and training in the several branches of the art of typography, if the results of the scheme now sanctioned satisfy them that improved knowledge and skill in this industry will be appreciated and utilized by the public.

K. R. SRINIVASIENGAR,
Offg. Secy. to Govt., Gen. & Rev. Depts.

oop Commanders	...	Three Stars one above the other.

Jamadars.

roop Commanders, 2nd and 3rd Grades (drawing Rs. 100 and Rs. 90). Two Stars one above the other.

Jamadars.

roop Commanders, 4th and 5th Grades (drawing Rs. 80 and Rs. 70). One Star.

Bd.—C. R.

Proceedings of the Government of His Highness the Maharaja of Mysore. General (Military), dated 26th May 1913.

READ—

Correspondence ending with letter No. 4112, dated the 1st April 1913, from the Chief Commandant, Mysore State Troops, submitting proposals for the formation of a "Forge Fund" for the Local Service Regiment, and requesting that in order to make the fund self-supporting, the sanction of Government may be obtained to a contribution of Rs. 12-9-0 per mensem, being either paid by Government or from the "Manure Fund."

No. G. 7506-7—MILY. 293-11-6, DATED BANGALORE, 26TH MAY 1913.

ORDER THEREON.—In order to relieve the "Chanda Fund" of the shoeing charges of the Local Service Regiment, it is proposed to form a separate "Forge Fund" for the Regiment similar to the one already formed for the Imperial Service Regiment. The probable monthly receipts to and expenditure from, the "Forge Fund" proposed to be constituted are as follows:—

Receipts.

	Rs.	a.	p.
(1) Contribution from 16 officers at 12 annas each ..	12	0	0
(2) Contribution from 381 Rank and File including Farriers at 5 annas each	119	1	0
(3) Sale proceeds of old shoes of 397 horses of the Regiment at Rs. 4 per 100 horse shoes	15	14	0
(4) Conservancy Fund for 229 horses at 1 anna each ...	14	5	0
Total ..	161	4	0

Expenditure.

(1) Shoeing charges for 397 horses at 7 annas each, payable to Farriers for purchasing shoes and nails ..	173	13	0
Total ...	173	13	0

From the above estimate of receipts and expenditure, it is seen that in order to make the fund self-supporting an additional contribution of Rs. 12-9-0 per mensem is necessary. The rates of subscription proposed to be charged are the same as those in force in the Imperial Service Lancers and it is reported by the Chief Commandant that it is not possible to increase these rates.

2. The Government consider that the present practice of crediting the subscriptions recovered from men of the Regiment to the "Chanda Fund" and meeting the shoeing charges therefrom, is incorrect and should be discontinued. They are pleased to sanction the proposal of the Chief Commandant for the formation of a separate "Forge Fund" for the Local Service Regiment. They are further pleased to direct that, for a period of three years with effect from 1st July 1913, the actual difference between the receipts and expenditure of the "Forge Fund" not exceeding Rs. 12-9-0 per month be met by the "Manure Fund" as a contribution therefrom. The Chief Commandant, Mysore State Troops, is requested to see that every effort is made to make the fund self-supporting before the expiry of the above period.

K. R. SRINIVASIENGAR,
Offg. Secy. to Govt., Gen. & Rev. Depts.

To—The Chief Commandant, Mysore State Troops.
The Comptroller, Mysore Government.

Exd.—C. R.

Proceedings of the Government of His Highness the Maharaja of Mysore, Public Works, dated 2nd May 1913.

READ—

Memo dated the 8th November 1912, by the Secretary to Government in the Public Works Department, soliciting preliminary sanction to carry out improvements to "Ballabrooie" bungalow at Bangalore at a cost not exceeding Rs. 4,000, in order to adapt the building for residential purposes.

2. Memo No. 55, dated the 5th February 1913, from the same officer submitting, for sanction, two estimates, one amounting to Rs 9,794 for carrying out the necessary repairs and improvements and the other to Rs 2,218 for improvements and additions to the electric installation in the building.

No. 549-53—3533-37, DATED BANGALORE, 2ND MAY 1913.

ORDER THEREON.—The building was till recently used as an office by the Medical Department and was therefore not suited for residential purposes. To make it thoroughly habitable, some improvements to the main bungalow and considerable alterations in the out-house accommodation had to be carried out. The works carried out according to the estimates referred to in the Public Works Secretary's note may be grouped under the principal items as shown below:—

	Rs.
1. Improvements to the main building, out-houses, water-supply and garden ...	6,533
2. Repairs to the building and out-houses	3,261
3. Improvements to the electric light installation	2,218
Total .	12,012

2. Government having permitted Mr. Visvesvaraya to occupy the bungalow, a consolidated estimate is hereby sanctioned for Rs. 12,012 for all necessary improvements carried out to the building.

3. As regards the rent payable for the building, the total cost, including that of improvements now effected, comes to Rs. 50,000. According to paragraph 2 of Government Proceedings (Public Works) No. 291-324—2149-82, dated the 26th March 1908, the rent to be paid at ½ per cent of the capital cost is Rs. 250 per mensem. As, however, a part of the building and the out-houses are used for Government purposes, the rent payable for the portion occupied as residence has been duly calculated and fixed at Rs. 200 per mensem.

4. Depreciation charges at 5 per cent on the cost of the electric installation will be recovered separately by the Electrical Department as is usual in such cases.

KARPUR SHRINIVASRAV,
Offg. Secy. to Govt., Public Works Dept.

To— The Secretary to Government, General and Revenue Departments.
The Superintending Engineer, Southern Circle, (with the sanctioned estimates).
The Comptroller, Public Works Branch.
The Chief Electrical Engineer to the Government of Mysore.
The Private Secretary to the Dewan.

Exd.—C. R.

Proceedings of the Government of His Highness the Maharaja of Mysore, Public Works, dated 12th May 1913.

READ—

The Administration Report of the Electrical Department for the year 1911-12, submitted by the Chief Electrical Engineer with his letter No. 5495, dated the 3rd November 1912.

No. 251-4—C. P. S., DATED BANGALORE, 12TH MAY 1913.

ORDER THEREON.—From the report read above it is observed that the Revenue and Expenditure were estimated at Rs. 15,50,000 and Rs. 7,68,000. These figures were subsequently revised to Rs. 15,56,000 and Rs. 7,72,500; and the actuals amounted to Rs. 16,65,692 and Rs. 6,81,063.

2. The expenditure includes an outlay of Rs. 49,970 on capital works and a charge of Rs. 2,87,380 debitable to depreciation and suspense accounts. Deducting these amounts, the net revenue and working expenses stood at Rs. 13,21,979 and Rs. 3,43,713, respectively, against Rs. 12,54,013 and Rs. 3,45,166 in 1910-11.

3. The financial results of the scheme to end of 1911-12 have been as follows:—

		Rs.	Rs.	Rs.
Capital outlay to date	...	.....	.....	83,12,627
Gross earnings	...	.....	161,22,157	
Working expenses	...	28,30,655		
Depreciation	...	22,69,266		
Interest on capital	...	28,71,833		
			79,71,754	
Net profit earned in 10¼ years (*i.e.*, from March 1902 to end of June 1912)		...	...	81,50,403
Average net profit per year		...	...	7,88,748

This represents a return of 9·48 per cent per annum on the capital outlay.

The scheme has been very successful financially and there are prospects of its further rapid development in the years to come.

4. The Bangalore and Mysore Transmission lines were equipped with aluminium lightning arresters in order to improve their efficiency. The Mysore-Bangalore Telephone line was also completed during the year.

5. Mr. H. P. Gibbs, Chief Electrical Engineer, terminated his services in the State with effect from 1st August 1911, after a total service of nine years and four and half months and he was succeeded by Mr. C. F. Beames, M.A.I.E.E., Government are pleased to place on record their appreciation of the satisfactory manner with which the Department has been managed by these officers. They also note that the staff rendered satisfactory service during the year.

Proceedings of the Government of His Highness the Maharaja of Mysore, Public Works, dated 14th May 1913.

READ—

Government Proceedings No. 502-5—C. P. S. dated the 15th November 1912 sanctioning the proposals submitted by the Chief Electrical Engineer for the encouragement of the use of electricity in private houses and other large establishments for the purposes of cooking, heating, etc.

2. Demi Official Letter No. 9 dated the 10th January 1913 from the Chief Electrical Engineer submitting a revised schedule of rates for power supply.

No. 270-3—C. P. S. DATED BANGALORE, 14TH MAY 1913.

ORDER THEREON.—Government are pleased to approve of the annexed schedule of rates submitted by the Chief Electrical Engineer in accordance with paragraph 3 of the Government Order of the 15th November 1912 referred to above, for supply of electric power within the City limits for cooking and heating units of a larger capacity than 20 points maximum demand.

2. The supply should, for the present, be confined to Public Institutions, such as, Hospitals, Students' Homes, etc., limiting the total supply to a maximum of 50 horse power until the existing resources are improved.

3. Orders will separately issue regarding the revision of corresponding rates in the Civil and Military Station of Bangalore.

KARPUR SHRINIVASRAV,
Offg. Secy. to Govt., P. W. Dept.

To—The Chief Electrical Engineer to the Government of Mysore.

The Secretary to Government, General and Revenue Departments.
The Provisional Secretary, Economic Conference.

SCHEDULE OF RATES FOR THE SUPPLY OF POWER FOR HEATING UNITS.

RATES FOR POWER.

		Rs.	a.	p.	
First 50 B. T. U. consumption	... at	0	1	9	per B. T. U. per month.
Second do or fraction thereof	... at	0	1	3	do.
Third 50 B. T. U. consumption or fraction thereof or above 150 B. T. U.	.. at	0	0	9	do.

Meter hire.—Of Re. 1 per month will be charged for each meter installed for heating service.

Minimum charges.—Of Rs. 6 per month shall be paid for current supplied to a complete electric stove, range or other electrical heating appliances or combination of heating appliances consuming more than 1,200 watts.

NOTE.—The above schedule is subject to the following conditions:—

(1) That the individual consumer's normal demand for current used exceeds 20 points or 1,200 watts.

(2) That the consumer, at his or her own cost, instals the necessary circuit or circuits complete with regularly specified safety devices and switches to admit of the operation of such heating appliances being entirely independent of the recording meter installed for lighting purposes

(3) That current for electric light is not, under any circumstances, taken from the supply mains, feeders, or wiring appliances installed for the operation of electric heating appliances.

Proceedings of the Government of His Highness the Maharaja of Mysore, Public Works, dated 30th May 1913.

No. 682-6—4437-41, DATED BANGALORE, THE 30TH MAY 1913.

ORDER.—With a view to enable the Public Works Department to cope with the increase of work in recent years and to provide for better supervision, Government are pleased to approve of the distribution of the work of the Department and the Secretariat, between the Chief Engineer and the Deputy Chief Engineer, as shown in the accompanying schedule.

KARPUR SHRINIVASRAV,
Offg. Secy. to Govt., Public Works Dept.

To—The Secretary to Government, General and Revenue Departments.
The Superintending Engineers of Circles.
The Superintending Engineer, Cauvery Reservoir Works.
The Comptroller, Public Works Branch.

End.—C. R.

MEMORANDUM.

Subject to modifications which may be considered necessary from time to time the work in the Public Works Secretariat is distributed as indicated below:—

Subjects to be dealt with and disposed of by the Chief Engineer and Secretary	Subjects to be dealt with and disposed of by the Deputy Chief Engineer and Under-Secretary
1. Roads and buildings in general. 2. Establishment questions (in consultation with the Deputy Chief Engineer). 3. Departmental reports. 4. Questions relating to— (1) Department of Electrical Engineering and Cauvery Power Scheme. (2) Cauvery Reservoir Scheme. (3) Mysore City Improvement Schemes. (4) Water-Supply, Drainage, Sanitation, and (5) Telephones. 5. Public Works Budget (in consultation with the Deputy Chief Engineer). 6. Questions involving principle and relating to Departmental organization and discipline (in consultation with the Deputy Chief Engineer). 7. Acquisition of lands required for purposes other than irrigation. 8. Rents of buildings. 9. Miscellaneous account matters (other than irrigation). 10. All other questions of the Department not specifically mentioned in this Memorandum.	I. Irrigation works—Construction and Administration. (1) Irrigation projects and questions connected therewith. (2) Irrigation accounts. (3) Levy of water rates. (4) Acquisition of lands for irrigation works. (5) Questions relating to raiyats' contribution towards irrigation works. II. Buildings of architectural importance, Town improvements, Health Resorts, etc., Bangalore City improvements, including Lal-Bagh, Cubbon Park, etc. III. Famine programmes, famine relief works, etc. IV. Check inspection of offices and works (in consultation with the Chief Engineer) to enforce strict observance of existing orders. Final orders to issue with the approval of the Chief Engineer. V. Completion and revision of Departmental codes, rules, and orders issued from time to time, and initiation of new compilations. IV. Miscellaneous:—Stores, Indents, Cash, Insurance, short leave to subordinates and officials.

NOTE:—(1) While on tour, both the Chief Engineer and the Deputy Chief Engineer will inspect all Public Works, the above distribution notwithstanding.
(2) All communications shall be addressed to the Chief Engineer and Secretary to Government, Public Works Department, as heretofore.

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

Note No. 168, dated 25th March 1913, from the Secretary for Railways, submitting for sanction, authorization rolls aggregating Rs. 31,810 for the working of the Bowringpet-Kolar Railway for the year 1913-14, and stating that it is only a preliminary estimate.

No. 1338-42—Ry. F. 21-12-13, DATED BANGALORE, 26TH—31ST MAY 1913.

ORDER THEREON.—The authorization rolls submitted by the Secretary for Railways aggregate Rs. 31,810 and the Financial Secretary has proposed an addition of Rs. 1,000 to meet the cost of audit establishment. The total of the rolls thus made up amounts to Rs. 32,810 and this estimate is provisionally sanctioned.

E. A. S. BELL,
Secy. to Govt. for Railways.

To—The Secretary to Government, General and Revenue Departments.
The Financial Secretary to the Government of Mysore.
The Comptroller to the Government of Mysore.
The Comptroller, Public Works and Railway Branch (through the Financial Department).
The Engineer-in-Chief, State Railway Construction Department.

Serial No.	Proceedings: Number	Date	To whom sent	Subject and Order
6	R 6623—Ft 4-12-23 ...	10	Consvr. of Forests in Mysore	Forwards petition dated 31st January 1913, from pandit Mahadev Prasad *in re* the sale of certain Beete logs in the Mysore woodyard, and observes that when the Forest authorities found that proper bids were not forthcoming at the sale, they would have done well to call for tenders by public notification instead of privately accepting the offer of any person, and that in such cases it is undesirable for the Head of a Department to act independently of his subordinate officer as has been done in this instance.
7	R 6625-6—Ft 140-12-2 ...	10	Consvr. of Forests in Mysore and Comptr.	Sanctions the retirement of M. Subba Rao, Forest Ranger, IV grade, in charge of the Holalkere Range, who has completed his 55th year, from the 1st July 1913.
8	R 6673—Ft 48-12-7 ...	13	Compiler, *Mysore Gazette*	Notifies the extension by four months, of furlough for three months granted to Mr. H. Ramiah, Assistant Conservator of Forests and District Forest Officer, Kolar, in Notification No. R. 4797 —Ft 48-12-5, dated 4th March 1913.
9	R 6674 ...	13	Consvr. of Forests ...	Forwards copy of the above.
10	R 6675—Ft 153 12 2 ..	13	Compiler, *Mysore Gazette*	Notifies the grant to Mr. P S Govinda Rao Assistant Conservator of Forests and District Forest Officer, Tumkur District, of 12 days privilege leave, with effect from the 10th February 1913
11	R 6676 ..	13	Consvr of Forests ..	Forwards copy of the above.
12	R 6709 11- Ft 58-12-6 ..	14	Consvr. of Fts., Comptr. and Engr. in Ch., State Ry. Construction	Sanctions a further expenditure of Rs. 431-4-0 for the purchase of a saw mill to be put up near Shimoga.
13	R 6713-4—Ft 117-12-2 ...	14	Consvr. of Forests and Comptr.	Directs that one more chance be given to A. Govindarajalu Naidu, B.A., Head clerk on probation, Conservators' Office, to pass, at least, the Forest and Departmental Examinations, and that failing which he be reverted to his substantive appointment.
14	R 6717-9—Ft 148-12-2 ...	14	Rev. Comr., Dy. Comr., Mysore and Consvr. of Forests	Sanctions the acquisition of certain land in the Muttur village, Hunsur Taluk, for the laying out of an approach road to Mutter Forest Lodge.
15	R 6720 ...	14	Compiler, *Mysore Gazette*	Forwards a declaration statement in respect of the above.

Proceedings			Subject and Order
Number	Date	To whom sent	
R 6880—Ft 159-12-2 ...	19	Comptroller ...	Forwards a Remittance Transfer Receipt for Rs. 53 received from the Agricultural Collector, Malabar District, being half the net revenue realized by the sale of honey and wax collected from the arches of Bavali Bridge and requests that the amount may be credited to the Forest Department.

Serial No.	Proceedings: Number	Proceedings: Date	Proceedings: To whom sent	Subject and Order
17	Pol 989—Ft 164-11 ...	24	First Assistant to the Hon'ble the Resdt.	States that the Durbar are of opinion that the appointment of a referee for final settlement of the boundary dispute between the Mysore State and South Canara is not necessary and that if the Madras Government prefer it, the Durbar will be prepared to consider the suggestion to have the boundary clearly identified by an officer of either Government before deputing joint representatives for final settlement of the boundary.
8	Pol 988—Ft 81-12-4 ...	24	Do ...	States that the Durbar do not desire to restrict the use of the Begur Bavali cart-track to the carting of timber alone by the Madras Government and that they have no objection to the cart-track being used for the passage of traffic of all kinds.
9	R 7124—Ft 65-12-9 ...	27	Compiler, *Mysore Gazette*	Notifies the settlement of the Heggavadi Block I in the Gundlupet and Chamrajnagar Taluks as State Forest from 1st July 1913.
10	R 7174-5—Ft 73-12-2 ...	28	Consvr. of Forests and Rev. Comr.	Directs the cancellation of the sale of cane crop in the Agumbe and Balehalli blocks in the Tirthahalli Taluk as the area had not been reserved as State Forest at the time of the sale in question.
11	Pol 1004—Ft 84-11-7 ...	30	First Assistant to the Hon'ble the Resdt. in Mysore	Forwards three bills for an aggregate amount of Rs. 1,903-8-10 being the portion debitable to the Madras Government, of the expenditure incurred in maintaining the boundary between Mysore and South Canara and requests that the Madras Government may be kindly moved for the payment of the amount.
12	R 7243-4—Ft 189-11-4 ...	30	Consvr. of Forests and Comptr.	Declines to sanction the institution of civil suits at Government expense for the recovery of certain advances amounting to Rs. 708-2-7 made to certain contractors of Mangalore for the execution of certain works in the Jagor valley range, Kadur District, and observes that as the Range Officer made these advances to men of straw at his own risk, he should be directed to collect the monies at his own expense by instituting civil suits, if necessary.
13	R 7245—Ft 154-12-2 ...	30	Consvr. of Forests ...	Declines to sanction his recommendation to grant acting allowances to P. Krishna Rao, Head Accountant, and N. Narasimhiengar, Deputy clerk of his office, for having discharged the duties of the Personal Assistant and Head Accountant respectively, consequent on the death of Mr. C. Lakshmana Rao, as these officials had not been appointed to officiate in or to be in charge of the said appointment.

GENERAL AND REVENUE SECRETARIAT.
